DEC 22 2006

CITY OF SANTA BARBARA
PLANNING DIVISION

Dec 18, 2006
650 Miramonte Dr
Santa Barbara, Ca 93109
[illegible]

Dear Jan,

Be sure to save the Sanchez House and outbuildings. The community really needs housing that is safe. The proposed development is totally out of scale, too big, and destroys what is there, which is [illegible] to all people. Please save all structures and [illegible], and all open space. Save the neighborhood from the Condo project.

I was away for a while, but a lot of people signed petitions & wrote letters against the project. We don't understand why the last hearing did not take these into consideration and stop the project.

The Architectural Board of Review is supposed, by its own law, to protect & preserve Santa Barbara, so this must have been forgotten for a little while. Please remind them that the [illegible] [illegible] [illegible] outbuildings [illegible] the 1925 [illegible] [illegible] [illegible] should remain intact to provide [illegible] housing etc for the community.

Please be sure the people never [illegible] here. Save the Westside neighborhood from destruction, overcrowding & danger.

Be well Be Good Be Happy

[illegible] from 1946 to 1951 [illegible] and
Mrs Mudray bought it from the family.
She told me she never wanted it
torn down and she indicated she
safeguarded it by a caveat or
something like that but we haven't
found the trust or whatever as
the trustee we cannot find. Apparently
he sold it to the developers who did not
appreciate the value of the present
housing as it is until we start talking
this way.

The Houses and land are very
safe and good and should be kept
there for the community. The Native
American Land is priceless Chumash
Healing Area Thousands of years and
should never be bulldozed or disturbed.
The Creek is nearby and all is very Sacred
Indian Burial and living sites so it
should be absolutely protected. Don't dig
anymore.

The big proposed structures totally
[illegible] to the area. The Park
needs open space not huge structures around
it. Just save community Housing. Don't
allow the development. Save Historic
Santa Barbara.

Please send this information to the [illegible] at HEARINGS
I need to know the historic
status also. Call me
at 4626508. Thank [illegible]

opy

CITY OF SANTA BARBARA
PLANNING DIVISION

PETITION to SAVE HOUSING at 1236 San Andres St.
We the undersigned want to Preserve the House and BUILDINGS. We petition the city of Santa Barbara to SAVE HOUSING there. It is very appropriate to the neighborhood, one story with yard space and trees and views of the sky and trees-mountains are behind the trees. Dont build 4 2 story Condos and 4 2 car garages here. Too Big. Preserve Open Space. Preserve The neighborhood

ABR

Neighborhood Preservation Ordinance re: 1236 San Andres St

A. Present house is one story, safer in Earthquake than proposed 2 story Condos

B. Save the present house + yard + never grade the land then the ground is stronger + is not destabilized

C. There are very important trees to be preserved They greatly benefit the community - Help the children + adults have a wonderful time

D. The Condos do not fit in this area at all - these are Bungalow type or wood houses generally, with porches + yards in front and side + back with a lot of open space. Trees are prevalent The development does not consistent with the scenic nature or character of the neighborhood. Condos are Huge + takes up all the space. This is not healthy

E. Condos are way too big, massive + oversizable. Not appropriate to the neighborhood. The other houses have been there a long long time. Preserve the West Side neighborhood.

F. Two story + great bulk of prospective project cuts off public views so people can't see the trees of the park + the mountains if you can see them. Keep the neighborhood open. Let the light through

We believe the Neighborhood should be Preserved. Don't demolish it save the House + Buildings and Yard + Trees Don't grade. Let the Neighborhood Be -

1236 San Andres

Please realize that the House and buildings and Yard are Historic as Redwood is the wood of 2 houses. They were around 5,000 or pw 6,000 yrs ago more or less. The third structure is excellent. The 1925 City paperwork shows beams of redwood, which is more than Redwood Mudsills 2x6 batter Girders 4x4, First Floor Joists 2x6 So Save the House and all around. Be Well The Forms of the City show Redwood as part of the Form - So there is a lot of redwood in these Houses - Very Strong Old fashioned Structures. They went through the 1925 Earthquake, 2 anyway So please save them. Please consider the Houses + Building and Yard Historic. Let all stay there.

Date Signature name

Start Here We believe that the house is Historic as city records show that the structures had Redwood Beams in 1925. The City Records are historic too. It's been there a long time. Save these Redwood Houses (2) and the other structure The Yard is Historic as it still exists The structures are near the Creek which area was probably occupied by people for hundreds if not thousands of years. Therefore please consider the 1236 San Andres site + structures Historically significant.

To the City of Santa Barbara re: 1236 San Andres St.

Please conserve + protect the house and buildings of Santa Barbara, this one in particular at this time. The ancient redwood trees are in this town and in this house and the second house. Let the trees be here. They make life wonderful. All the buildings are excellent. The front house is a very extraordinary redwood tree which came by boat and was enough for five houses and they all still stand. The historic value is excellent. The tree was 5,000 years old and helps the whole community to be well. People love redwood. It is excellent. Preserve and protect it. The House is not huge and is excellent space for people. The tree was huge and should always be remembered so don't take it to the dump or anything like that. The Historic value is very extensive. The Park is very beautiful behind the houses and is part of the ecology of the town. Preserve all of it.

The Archeology is extensive here. It is a very sensitive prehistoric area. The map shows it really needs to be conserved near the water. The area is full of Burial Ground thousands of years. The map shows it has Indian, Spanish and American historical sites. The Indians in the yard have been there for a long time and should never be disturbed. Keep all remains in place. Never move them. The Indians always help the people be well so don't be afraid

p2 Children should never ever be bad then life is easier for everyone. The children are good in the Park very often. They will have a better life if the trees are there and the open space is there. Let the redwood trees stay. Keep the housing. The site is historically significant let it stay.

The one story buildings are strong and safety factors are very important in California A three earthquake is too much generally for the Condo project. The Indians try to make things stronger but it is not really safe at all compared to the extraordinary strength 14-16 of the ground clear of difficulty. The present housing is strong, excellent and satisfactory to all people who know it is redwood. Low cost housing is necessary. Preserve our neighborhoods. I was there as a child and the house is still excellent and peaceful. Keep historic resources. Just leave it alone. Never dig up the Indian Areas. Never develop.

Two story Condos are massive and unsuitable to the neighborhood and entirely out of keeping with the Historic old houses of this neighborhood. Save Santa Barbara neighborhoods. Don't demolish ever. Leave this house intact. Let the yard thrive. This is a good example of Santa Barbara architecture over a long period of time. It went through the 1925 earthquake and apparently was moved to this place in August 1925. It has historic beams of the period of good size like old time construction It will not fall down. Just save our housing.

August 16, 2001

p3. Further notes-

The House has front yard, side yards, back yard. It makes it historic. Save the yards. Don't develop

The Paul Westbury family was here 1946 to 1951 when Mrs Mudrey and her husband Simon bought the house. Mrs Mudrey was in possession of it 55 years and chose to stay here. She was a very stabilizing factor in the community and told me she never wanted anything bad to happen to the property. She wanted the house to stay and be protected and preserved; so save Santa Barbara. Never allow the house and property to be hurt in any way. Keep all the trees. They are extraordinarily wonderful. We have treasured childhood memories. We learned to roller skate on the front sidewalk with the Hernandez kids - Anita and Delores - and watched their grandmother make tortillas in their kitchen. It was a great neighborhood but their house is gone now so you can save this one. It was a very old tree too. The back yard is priceless and Camp Conestoga had mules once in a while. Bohnett Park still has trees that were there. Let them live. Keep the view of the trees and mountains behind by not building-

If you want some more history, my sister was among the first wave of baby boomers. They signed the papers about 6 weeks before she was born. My next sister came 14 months later. It was the time of wringer washers, ice boxes, a dog for the kids, kittens found next door. Milk

was delivered to the door. The doctor came to the house. If that's not history I don't know what is. Its full of cultural history. The fruit trees were fantastic Save the trees. Some are still there.

There are all kinds of Chumash things in the ground so never dig, never grade and never take them out. They help everyone to be well. They help people be knowledgeable so designate it all special. It is special. It was landmark long time ago, so keep the Burial grounds intact and let the Indians be. 41 Tribes have been here, catalogued over time may be more Please never disturb the site. The creek has many people living there over time so never disturb it and more. Anyway its a peaceful place. Don't bulldoze. Don't build. Save open space. Various ceremonial places abound, so leave all intact. It has a very rich cultural history over thousands of years, so let it be.

Smithsonian has relics that are attached to that area so never disturb things. Leave them to be what they are. It is very important. Do not do

Canalino was here Let them be.

The Purpose of the Architectural Board of Review is to "promote the general public welfare of the City and to protect and preserve the natural and historic charm and beauty of the City and its aesthetic appeal and beauty." (Ord 3257 § 35; Ord. 3646 § 1, 1974)

The buildings at 1236 San Andres need Preservation as they reflect the character of the Westside neighborhood. The Redwood is extraordinary. Redwood houses are exceptional. Both residences are Redwood. The structure is strong 2x6, 4x4, 2x4 etc. The garage is gone. It was a true antique. Don't lose any more. The other buildings are extraordinarily well built and worthy of Preservation.

The yard exemplifies the era and is part of the historic value of the bungalow type neighborhood.

The residences came through the 1925 Earthquake and continue to provide strength and safety. The Redwood is extraordinary to live in and provided great Happiness and Security when I was a child.

The Indians are still there protecting and living all around there. Their Sacred land is extensive. next to the creek. There were many cultures over time. The outdoor space helps all to be well.

Children really appreciate outdoor space. Indians help everyone to be well. Old Mission Creek area needs to be protected from difficulty. Never grade or hurt the land. Never diminish the unique quality of life in this area. Let the children have a yard. Let there be open space.

Copy

August 23, 2006

The structures at 1236 San Andres St are Historically significant. The front 2 houses are Redwood and went through the 1925 earthquake. The City Permit records show they were there in August 1925. The garage was built in 1927 and it was old growth Redwood. Its gone now. Save the houses and structures. The present structures are very significant Historical Treasures and are very should be designated Historically significant and steps should be taken to preserve all of them. Please preserve all. The Yard is integral to the Historic Value as it has space around all buildings. It has vegetation which was there when I was a child. The workshop was added in 1961-2 by Mr Murdray and is solid in an Earthquake. All these buildings are solid so the safety of the people is assured.

Dont even take out the glass. Save every tree. Never excavate. The Indians are there and need a place to live so dont excavate at all. Let all Be.

8-23-06 Pauline Westbury

PAULA WESTBURY

1236 San Andres

Please realize that the House and buildings and Yard are Historic as Redwood is the wood of 2 houses. They were around 5,000 or PW 6,000 yrs ago more or less. The third structure is excellent. The 1925 city paperwork shows beams of redwood, which is unobtain Redwood Mudsills 2x6 batten Girders 4x4, First Floor Joists 2x6 So Save the House and all around. Be well The Forms of the City show Redwood as part of the Form - So there is a lot of redwood in these Houses - Very Strong Old fashioned Structures. They went through the 1925 Earthquake, 2 anyway So please save them. Please consider the Houses & Building and Yard Historic. Let all stay there.

Date Signature Name

Start Here We believe that the house is Historic as city records show that the structures had Redwood Beams in 1925. The City Records are historic too. It's been there a long time. Save these Redwood Houses (2) and the other structure The Yard is Historic as it still exists The structures are near the Creek which area was probably occupied by people for hundreds if not thousands of years. Therefore please consider the 1236 San Andres site & structures Historically significant.

Neighborhood Preservation Ordinance re: 1226 San Andres St

A. Present house is one story, safer in Earthquake than proposed 2 story Condos

B. Save the present house + yard + never grade the land then the ground is stronger + is not destabilized

C. There are very important trees to be preserved They greatly benefit the community - Help the children + adults have a wonderful time

D. The Condos do not fit in this area at all - these are Bungalow type or wood houses generally, with porches + yards in front and side + back with a lot of open space. Trees are prevalent The development ~~does~~ is not consistent with the scenic nature or character of the neighborhood. Condos are Huge + takes up all the space. This is not healthy

E. Condos are way too big, massive + oversizable. Not appropriate to the neighborhood. The other houses have been there a long long time. Preserve the West Side neighborhood.

F. Two story + great bulk of prospective project cuts off public views so people can't see the trees of the park + the mountains if you can see them. Keep the neighborhood open. Let the light through

We believe the Neighborhood should be Preserved. Don't demolish it Save the House + Buildings and Yard + Trees Don't grade. Let the Neighborhood Be -

Jan –

Please figure out how to save the old-growth Redwood Houses + sites etc Sheds etc from demolition Sometimes its partial – Be well. Most are in the old sections. Landmark All. Harrington Landmarked all of SB 1922 or so with the Smithsonian – & most all of goleta except for wilderness area far away. Please accept my apologies – I have so much to do. Save all Housing. Old is Stronger by far – Be well

Sincerely
Paula Westbury
