Santa Barbara, Calif

Adams School Bioswale

"Speak for the Creeks" Exploration

Name: _____ Teacher: _____ Date: _____

Grade: _____ Age: _____ Name of your School Watershed: _____

WHY ARE WE RESTORING THIS AREA?

As part of this restoration project, a concrete channel was removed over the summer to create a more natural wetland called a **bioswale**. *Bioswales help clean the water on its way to the ocean and provide food, water, and places to live for birds and other wildlife.*

Draw a sketch of this area as you imagine it will look when the plants have grown bigger and there is water in the bioswale.
