Project Name: Cabrillo Boulevard Bridge Over Mission Creek Replacement Project

Contact Information:

City Project Manager: Hal Hill, Project Engineer

Phone: (805) 564-5444

E-mail: hhill@SantaBarbaraCA.gov

Estimated start of construction: September 2009

Duration of construction: 24 months

Project Description:

This project is designed to replace the Cabrillo Boulevard Bridge over Mission Creek. It will also replace the deteriorated retaining walls along both sides of Mission Creek, from State Street to approximately 160 feet south of Cabrillo Boulevard.

The Bridge will be replaced in three stages: (1) drive pilings for the new bridge, (2) remove and replace the northerly side of the Bridge and (3) remove and replace the southerly side of the Bridge. The new Bridge railings will replicate the style of the 1927 Bridge railing. The new retaining wall between State Street and Cabrillo Boulevard will be constructed of faux sandstone concrete. A temporary pedestrian/bicycle Bridge will be installed downstream from Cabrillo Boulevard during Stage 3 construction.

Project Progress:

The plans and specifications are 95% complete. The City is in the process of obtaining right of way and a streambed alteration permit. The project is scheduled to go out to bid in June 2009.
