Project Name: ARRA Sidewalk & Access Ramps

Contact Information:

City Project Manager: Amanda Flesse, Project Engineer
Phone: (805) 564-5424
E-mail: AFlesse@SantaBarbaraCA.gov
Contractor: Toro Enterprises, Gary Cran
Phone: (805) 857-1254

Project Description:

The project consists of the installation of 59 sidewalk access ramps on priority pedestrian corridors and the repair of over 30,000 square feet of sidewalk. The priority corridors have been established through coordination between Public Work staff and the Access Advisory Committee (AAC) and its precursor, Staff Advisory Access Committee.

A primary role of the AAC is assisting staff by making recommendations on how to prioritize accessibility-related capital projects for completion as part of the six-year Capital Improvement Plan, assisting the ADA Coordinator with a variety of program access improvements and special projects, and providing education and positive intervention to assist other entities in the community to comply with access requirements.

The access ramps will be installed on priority corridors consisting of Modoc Road (4 ramps), Milpas Street (2 ramps), Coast Village Road (6 ramps), De la Vina Street (7 ramps), Gutierrez Street (20 ramps), State Street (11 ramps), and Micheltorena Street (9 ramps). See attachment 1 for locations and styles of the sidewalk access ramps.

This project will complete the majority of remaining access ramps needed along these corridors. Locations ineligible for Recovery Act funding will be installed by a future Public Works project or through the land development process.

The sidewalk maintenance locations focused primarily on the corridors listed above, then on as needed basis citywide. See attachment 2 for locations of sidewalk maintenance.

The completed Project will enhance accessibility Citywide in conformance with the Americans with Disabilities Act.

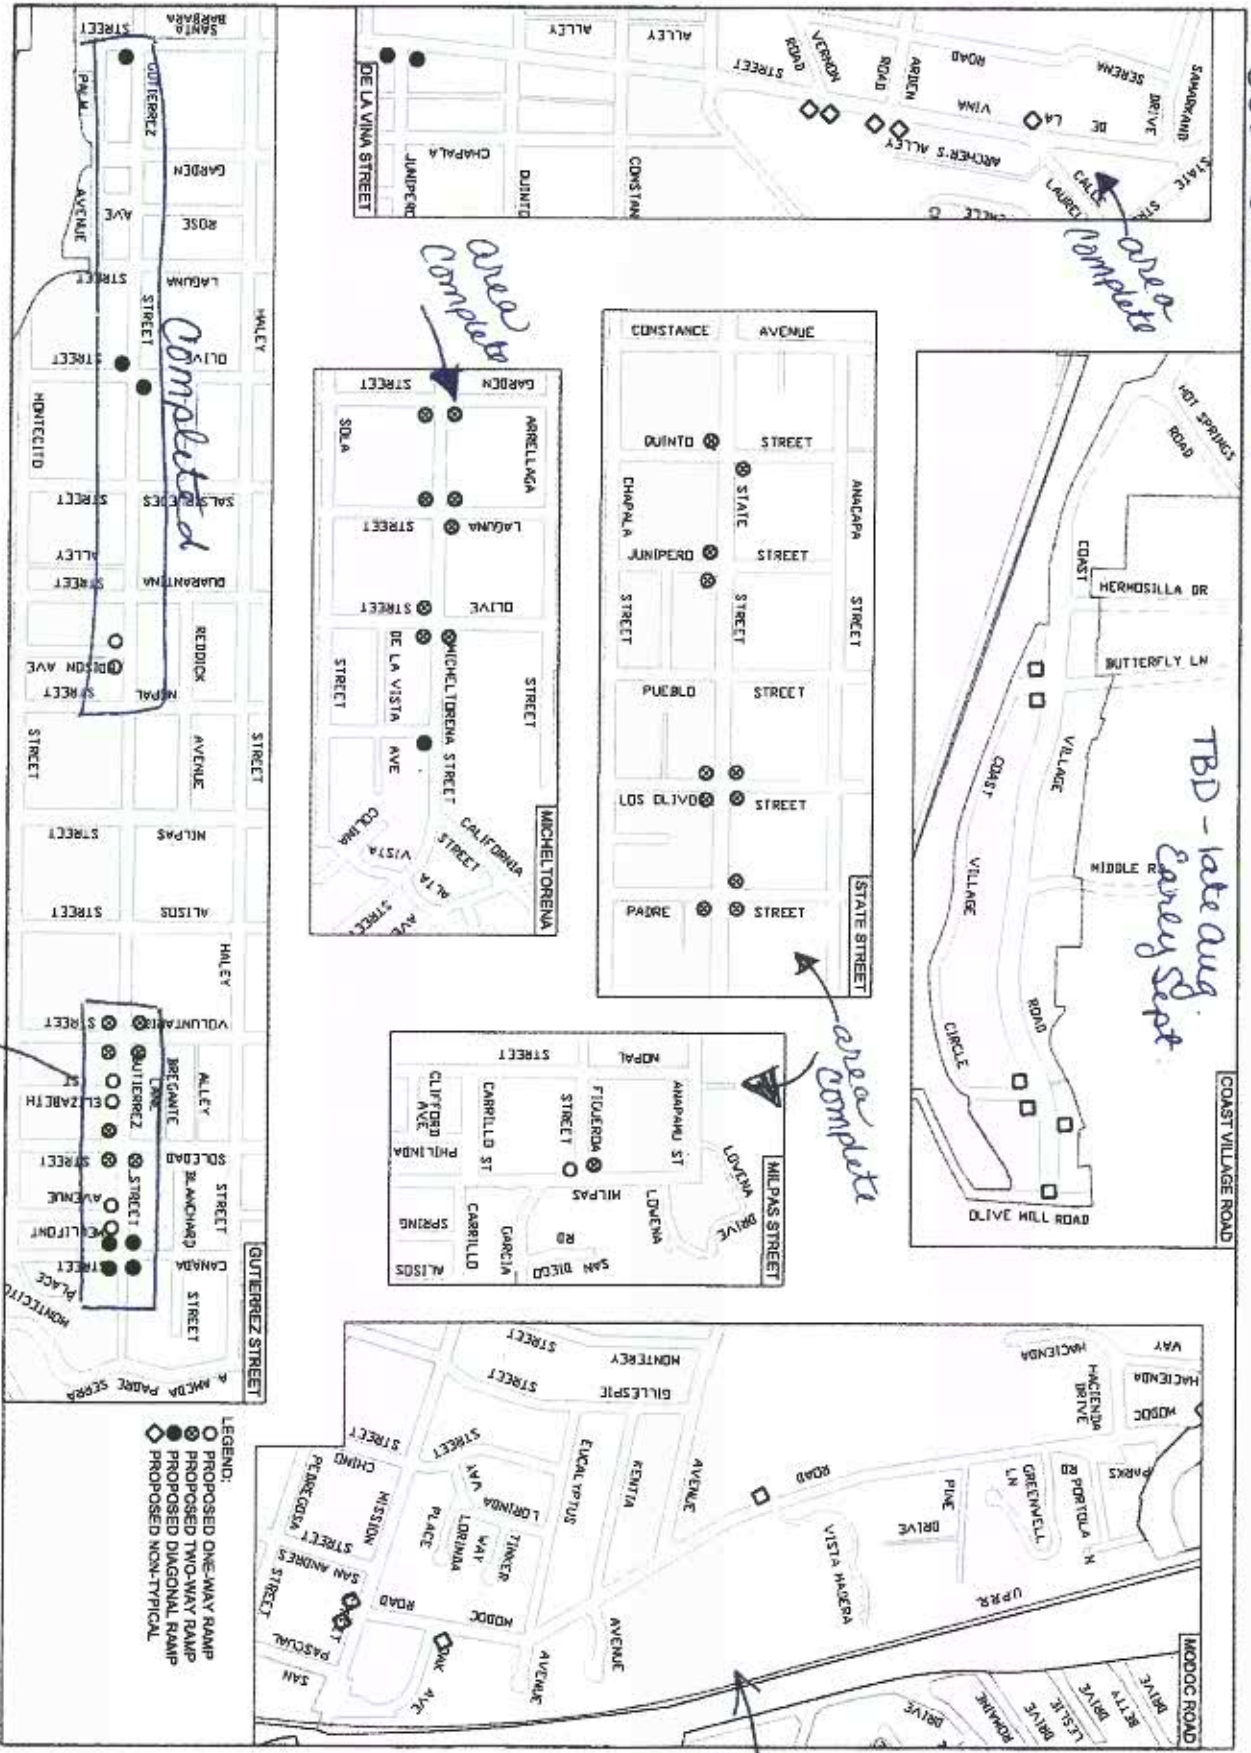

Public Outreach

The Public Works department has continued to step up and inform the public of ongoing projects. Information on this project will be sent out to adjacent properties prior to construction. During the design of the project, City staff worked closely with private and City utilities to make sure their work is completed prior to our significant road restoration work.

Construction for this project will begin in late June and will continue through the end of September 2010.
