Project Name: Ortega Street Bridge Over Mission Creek Replacement Project

Contact Information:

City Project Manager: Jim Colton

Phone: (805) 564-5514

E-mail: JColton@SantaBarbaraCA.gov

Estimated start of construction: Summer 2011

Duration of construction: 12 months

Project Description:

This project is designed to replace the structurally deficient Ortega Street Bridge over Mission Creek. The project will include construction of a new, slightly wider bridge structure to improve the hydraulic conveyance of Mission Creek. Other improvements include the relocation of utilities, transition walls, street drainage improvements, and creek planting of native riparian vegetation.

Project Progress:

The City has received environmental clearance to proceed with the project; therefore final design is in progress. Authorization to begin Right of Way negotiations has been received and ROW work has begun. The ROW process is estimated to last approximately one year and is scheduled to be completed Fall of 2010. Pending construction authorization from Caltrans, construction is scheduled for the summer of 2011.
