APPLICATION OF BRIAN D'AMOUR AND JESSICA GRANT, APPLICANTS FOR CITY OF SANTA BARBARA, 236 E. CABRILLO BOULEVARD, APNS 017-191-004 AND 033-120-016, P&R / SD-3 (PARKS & RECREATION / COASTAL OVERLAY) ZONES, GENERAL PLAN DESIGNATION: PARKS / OPEN SPACE, LOCAL COASTAL PLAN DESIGNATION: PARKS / OPEN SPACE (MST2014-00596)

The Laguna Pump Station Facility (Facility) is located between Cabrillo Boulevard and the tide gate structure on Laguna Channel. The overall project consists of limited repairs and maintenance of the existing Facility and tide gate structure, and a restoration plan. The project is proposed in four phases. Phase 1 includes removal of sedimentation and vegetation in the channel, repairs to channel wall, installation of an additional debris rack, repairs to the existing wet well inlet screen, improved lighting, and cameras for monitoring of conditions. Phase 2 includes the repair of the internal mechanics of Tide Gate No. 3, sedimentation removal between the Cabrillo Beachway and tide gates, and replacement of the outflow cover for the storm drain outlet. Phase 3 includes planting native vegetation to replace what is removed from the channel. This will extend the area of restoration for the Cabrillo Bridge Replacement and Lower Mission Creek Flood Control Lagoon Restoration projects scheduled for 2016. Phases 2 and 3 of the project are within Coastal Commission original permit jurisdiction. Phase 4 includes the on-going maintenance of the channel, which entails the removal of excess sedimentation prior to anticipated major storm events.

The discretionary application required for this project is:

1. A Coastal Development Permit (CDP2015-00015) to allow the proposed development in the Appealable Jurisdiction of the City's Coastal Zone (SBMC §28.44.060).

The Environmental Analyst has determined that the project is exempt from further environmental review pursuant to the California Environmental Quality Act Guidelines Section 15301 (b), Existing Facilities.
