

Agenda Memorandum

To: Water Commission
From: General Plan Sub-Committee
Date: April 28, 2010
Re: Comments to General Plan EIR

We are providing you with the updated draft Comment Memorandum prepared after our April Water Commission meeting. We incorporated all the written Comments received from Commissioners Keller and Thomas, and the Comments provided by Commissioner Smith at the meeting. We hope we have done so as accurately and effectively as possible. Commissioner Keller's Comments are at the beginning of the Memorandum in reference to the EIR SUMMARY. We included Commissioner Smith's Comments at the Gibraltar and Desalination headings, and where appropriate on those subjects in the other sections of the document. We incorporated all of Commissioner Thomas' Comments where we found most appropriate and we appreciate the input on Wastewater issues and otherwise, as we do with all the Comments received.

Other than the additions noted above, we made minor changes, only in the introductory section on the first page. We changed the figure for current year State Water yield found at p. 5 to reflect the most recent update. The Committee has made no changes to the Memorandum as we submitted it prior to the April meeting, other than as explained here.

As we have been informed, we must complete this effort at our May meeting as the Comment Memorandum must be submitted on or before May 17 and it would be our intent to submit it on May 11.
