

## Police Department Locker Room Remodel

The Police Department building received a much needed facelift for the men's locker rooms. The goal of the project was to improve the existing space by installing new lockers, flooring, and paint, along with opening up the floor plan. The project took place in stages to accommodate the Police Departments 24/7 schedule. Roughly 150 old lockers were replaced in two areas. The completed locker rooms are clean, bright, and open, and have been well received by Police Department staff.

Old locker room was cramped, aged, and dirty

Newly renovated locker room is open, bright, and clean
