

## Ocean Friendly Garden Installed at Spencer Adams Park

The Surfrider Foundation has partnered with the City along with many other community organizations and businesses to retrofit the lawn at the Spencer Adams Park into an Ocean Friendly Demonstration Garden. The rain gutter downspout has been re-directed into the landscape, the lawn has been removed, and native plants and mulch have been installed just in time for our winter rains. The new garden will prevent runoff, save water, reduce greenwaste, and create a wildlife habitat.
