ARCHITECTURAL STYLES

An architectural style is a specific way a building was designed that is characterized by unique and notable qualities. A style may include such elements as form, method of construction, materials, and regional character. As an ever evolving art, architecture is normally classified as a chronology of styles that reflect changing fashions, beliefs and religions, or the emergence of new technology. Historic architectural styles therefore convey the history, culture and development of a community. This brief architectural styles guide is designed to provide the basic tools necessary to recognize some of the prevalent historic architectural styles that exist within Santa Barbara. This is only a selection of styles and more styles of Santa Barbara architecture will be added as they are completed.
