# RESIDENTIAL ZONING STANDARDS <br> <br> INFORMATIONAL PACKET 

 <br> <br> INFORMATIONAL PACKET}

# QUESTIONS? <br> Additional information regarding the planning process can be <br> obtained at the Planning Counter at 630 Garden Street <br> (805) 564-5578, PlanningCounter@SantaBarbaraCA.gov 

## INSTRUCTIONS

This informational guide provides a summary of zoning regulations for residential projects. It is not designed to preclude the use of the Zoning Ordinance. If there are any discrepancies between the information provided in this handout and the Zoning Ordinance, the Zoning Ordinance prevails.

## WHAT IS ZONING?

Zoning is the separation of a community into districts, or "zones," that regulate land uses and the intensity of development. A zoning designation is assigned to every parcel in the city. The city has two zoning codes: Title 28 covers the Coastal Zone and Title 30 is used in areas outside the Coastal Zone.

Zoning regulations can be found online in the City's interactive Municipal Code. Each zoning district has its own Chapter that describes uses allowed and building regulations. For residential zoning, review Chapters 30.20 in areas outside the Coastal Zone, and 28.15, 28.18, and 28.21 in the Coastal Zone.

## HOW DO I BEGIN?

Your first step is to find out some basic information about your property including if it is in the Coastal Overlay Zone (S-D-3), the lot size, slope, and zoning designation. You may find this information in several ways. Parcel specific information is available 24-hrs a day online through the City's Accela Citizen Access (ACA) Portal. Another way to look up information is through MAPS (Mapping Analysis \& Printing System) a publicly-accessible online mapping application. You may also ask a planner at the Planning Counter during business hours: (805) 564-5578, PlanningCounter@SantaBarbaraCA.gov.

## HOW DO I USE THIS TABLE?

Use these tables if you are looking for a quick guide to common development standards for your project (such as setbacks or open yard) or to calculate the maximum number of dwellings permitted on a lot. Note that fractions are to be rounded down to the nearest whole number, except for affordable housing projects under either State Density Bonus or the City's Inclusionary Housing requirements.

| Accessory Dwelling Unit | 0 spaces, except 1 uncovered space per unit in High Fire Areas and Coastal Zone, see code for additional parking exceptions §30.185.040 / §28.86 |  |  |  |  |  |  |  |  |
| Affordable Housing | 1 uncovered space per unit, or less, for Density Bonus Gov. Code §65915 |  |  |  |  |  |  |  |  |

## HOW MANY DWELLINGS ARE PERMITTED ON A LOT?

## How to Calculate Dwelling Units Per Acre

To calculate the dwelling units per acre, the lot area in square feet is divided by 43,560 (square feet in an acre). The resulting acreage is multiplied by the General Plan/Coastal Land Use Plan density range.

## Dwelling Units Per Acre Calculation Example:

Lot Size: 20,000 sq.ft. $\div 43,560=0.46$ acres
General Plan Density Range: 15 to 27 du/ac
15 to 27 du/ac X .46 acres $=6.9$ to 12.4 (rounded) 6 to 12 units

## How to Calculate New Lots for a Subdivision

To calculate the number of new lots allowed for a subdivision or lot split, divide the lot area in square feet by the minimum net lot area required per the zoning designation and slope. Newly created lots must also conform to the General Plan/Coastal Land Use Plan density range (dwelling units per acre).

New Lots Calculation Example:
Lot Size: 72,000 sq.ft. Zone: RS-10 or E-2 Slope: 15\%
Minimum Net Lot Area: 15,000 sq.ft. per newly created lot
72,000 sq.ft. $\div 15,000$ sq.ft. $=4.8$ (rounded) 4 new lots

## How to Calculate Base Density

If the property is zoned for two-unit or multi-unit, on lots over 7,000 sq.ft., divide the lot area by the minimum square feet of lot area required per unit. On lots less than 7,000 sq.ft., check the table for allowable number of units; only one or two units may be allowed even if the zoning is for multi-unit.

## Base Density Calculation Example:

Lot Size: 12,000 sq. ft. Zone: R-M or R-3
Minimum Net Lot Area: 3,500 sq.ft. per unit
12,000 sq. ft. $\div 3,500$ sq. ft. $=3.4$ (rounded) 3 units

## How to Calculate Variable Density

Variable density is suspended outside the Coastal Zone. Applicable on lots 5,000 sq. ft. or more, the minimum lot area per unit varies based on the number of bedrooms. To calculate the maximum number of units, divide the lot area by the minimum square feet of lot area required, per bedroom type, per unit.

## Variable Density Calculation Example:

Lot Size: 12,000 sq. ft. Zone: R-M or R-3
4 - One-Bedroom Units [1,840 sq.ft. lot area per unit X 4 Units $=7,360$ sq.ft.]
2 - Two-Bedroom Units [2,320 sq.ft. lot area per unit X 2 Units $=4,640$ sq.ft.]
6 Total Units - Minimum Net Lot Area $=12,000$ sq.ft. (7,360 sq.ft. $+4,640$ sq.ft.)

## How to Calculate Average Unit-Size Density (AUD)

AUD is only available outside the Coastal Zone. To calculate the maximum number of units, find the average unit size on the AUD Program Table under the property's General Plan Land Use designation (Medium High, High, Priority). Multiply the maximum dwelling units per acre by the lot area. The resulting area is divided by 43,560 (square feet in an acre).

## AUD Density Calculation Example:

Lot Size: 12,000 sq. ft. Zone: R-M or R-3
General Plan Land Use: Medium-High Density
Average Unit Size: 1,000 sq.ft. per unit
[22 du/ac X 12,000 sq.ft. $=264,000$ ] $\div 43,560=6.06$ (rounded) to 6 units

## How to Calculate State Density Bonus

The table in the Density Bonus Program application summarizes the amount of density bonus allowed based on the level of affordability. To calculate the maximum number of units, apply the maximum bonus percentage (\%) per the table in state law to the baseline density (which is the maximum residential density allowed under the Zoning Ordinance or General Plan/Coastal Land Use Plan). Any resulting remainder is rounded up to the next whole number. If using General Plan density, the resulting units are still limited by the average unit size or bedrooms per unit per the zoning ordinance.

## State Density Bonus Calculation Example:

Lot Size: 12,000 sq. ft. $\div 43,560=0.27$ acres
General Plan Density Range: 15 to 27 du/ac
15 to 27 du/ac X . 27 acres $=4.05$ to 7.2 (rounded) 5 to 8 units
$+20 \%$ Density Bonus = $.20 \times 8=1.6$ (rounded) to 2 extra units

## How to Calculate AUD Inclusionary Housing

AUD rental housing projects with 10 or more units must provide at least $10 \%$ of the units at affordable rental rates; projects of 5 to 9 units may either build one affordable unit or pay a $\$ 25 / \mathrm{sq} . \mathrm{ft}$. in-lieu fee. To calculate the number of Inclusionary Units, multiply the total number of units on the project site (excluding any density bonus units) by $10 \%$. If the resulting remainder is 0.5 or more, round up to the next whole number. For any remainder less than 0.5, a Fractional In-Lieu fee is required. To calculate the Fractional In-Lieu Fee, divide the amount of the remainder by the total number of Inclusionary Units required. Multiple that amount by $\$ 25$. The resulting amount is multiplied by the total square feet.

## Inclusionary Housing Calculation Example:

Lot Size: 20,000 sq. ft. Zone: R-M or R-3
General Plan Land Use: High Density
Average Unit Size: 1,100 sq.ft. per unit; Total Square Feet $=15,400$ sq. ft.
[ $31 \mathrm{du} / \mathrm{ac} \times 20,000$ sq.ft. $=620,000$ ] $\div 43,560=14.23$ (rounded) 14 units
$+10 \%$ Inclusionary $=.10 \mathrm{X}=1.4$ (rounded) to 1 extra unit
Fractional In-Lieu Fee Example:
$[.4 \div 1.4=.28] \times \$ 25 \times 15,400$ sq.ft. $=\$ 110,000$

TABLE B: RESIDENTIAL DENSITY REQUIREMENTS

| Title 30 Zoning Designations | $R S-1 A$ | $R S-25$ | $R S-15$ | $R S-10$ | $R S-7.5$ | $R S-6$ | $R-2$ | $R-M$ | $R-M H$ |

## © <br> HOW DO I FIND MY LAND USE DESIGNATION?

Finding the General Plan or Local Coastal Program land use designations and density tiers (dwelling units per acre) can be found in a few ways. The easiest method, is to find your parcel on the General Plan Map or Coastal Land Use Plan Map. Use the map legend to find the maximum dwelling units per acre (du/ac). These maps are not parcel-specific, so if you can't tell exactly where your property is, you can also look up the designation using the property search function in the City's Accela Citizen Access (ACA) Portal or by searching the address through MAPS (Mapping Analysis \& Printing System). In MAPS, select the "Planning" layer to find the Land Use Designations and Priority Housing Overlay.

CITY'S GENERAL PLAN MAP
