Subject: Public Comment - 4/18/24 PC Agenda - Item III State & Hope
Date: Saturday, April 13, 2024 9:37:46 AM

Chair Baucke & Commissioners,

Please accept the following comments related to Item III, the State & Hope multi-family housing project.

We live in the neighborhood on Grove Lane and are very interested in the project. We support housing on the site, and hope the result is a project that provides much needed affordable and market rate housing, amenities for the neighborhood, and helps to revitalize the entire Upper State area.

It is important to begin by reminding decision makers that efforts that took place to eliminate the possibility of specific plan for the entire site are unfortunate and troubling. 600 plus units is a lot of units, especially when the Sears site is considered. Overall, lack of a specific plan most likely negatively impacts the area and neighbors.

We ask the Planning Commission (PC) to give strong consideration to the comments made by the ABR, notably ABR member Richard Six, at their hearing on March 4, 2024. Note comments related to the need for additional work on massing and articulation to improve street frontages and ensure the quality of interior plaza and paseo spaces. Also, comments related to concern that public spaces would be shaded due to orientation and massing.

Similar to the comments we submitted to ABR, we ask that the PC and decision makers give specific attention to the following:

- <!--[if !supportLists]-->• <!--[endif]-->Streetscapes that interact well with State Street and surrounding streets and development.
- <!--[if !supportLists]-->• <!--[endif]-->Public spaces that have dimensions to be useful not only for commercial tenants, but also reasonably sized groups, events, entertainment, etc.
- <!--[if !supportLists]-->• <!--[endif]-->Open, visible connections from public space to State Street. The project should serve as an amenity for the entire neighborhood.
- <!--[if !supportLists]-->• <!--[endif]-->Public spaces that take advantage of natural light.
- <!--[if !supportLists]-->• <!--[endif]-->Architecture and design that relates to Santa Barbara but isn't necessarily tied to downtown; variety, color, interesting lighting, trees that will become specimens, street furniture, etc.
- <!--[if !supportLists]-->• <!--[endif]-->Don't let the threat of vagrants limit design and outdoor furniture.

Finally, there seems to be a consensus the community deserves more restricted affordable units. With all these units proposed, the height limit exceeded, and the anticipated impacts, what is the neighborhood getting in return? What is the community benefit? Affordable units and a project that is an also an amenity for those being impacted are critical.

The project has the potential to be the focal point of Upper State. We have faith in the project team and City staff and decision makers to deliver such a project.

Sincerely,

Steve & Cecilia Fort
816 Grove Lane

[You don't often get email from kcdiane07@gmail.com. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

Hello,

I'm emailing to say that I support The Neighborhood project at State and Hope. I'm a resident of the Groves (Peach and Apple Grove Lanes) so I gave the project team the feedback that we would greatly appreciate them adding a playground to the design. As there are no playgrounds on the south side of State Street between Los Positas and Five Points Shopping Center. And there are 20+ kids age 8 and younger in our neighborhood alone.

Best,

Kasey Downey

RE: 3805 State Street PRE2022-00216

Commissioners:

I live on Calle Esperanza and my house backs up to Hope Avenue. I can see La Cumbre Plaza from the second story of my home; I know this area well. The Macy's site is an obvious location for a high-density residential & commercial development. This is not a NIMBY lament about new construction. It is a plea for good, comprehensive planning which is the purview of the Planning Commission. The proposed development at La Cumbre is clearly aligned with the recent trend for denser, taller developments sited along major public transit routes. The linkage of denser development to the accessibility of public transit is a core tenet of the State of California's efforts to promote the construction of more housing. I am concerned that the linkage of new housing to adequate transit arrangements in this project is weak. I am concerned about the impact of the proposed development on upper State Street and how the proposed development "plugs into" the existing street network; in particular, how mass transit, automotive, e-bike, bicycles, and pedestrian circulation along with the locations marked parcel delivery spaces & retail loading on the plans are layered together along State Street.

The proposal under review includes 642 residential units, 642 bicycle parking spaces and over 1000 parking spaces for cars. Given these numbers, it is reasonable to assume that this area along upper State Street will grow dramatically in population (and therefore increased traffic moving in multiple modalities) over the next decade. The Macy's site is among the first, but certainly not the last, of big new developments around La Cumbre Plaza, and only the latest addition to new residential developments along this stretch of outer State Street¹. It is also reasonable to assume that public transit and bicycle traffic will increase substantially. Again, it is reasonable to assume that 642 residential units combined with 27,748 square feet of new commercial space will generate substantial pedestrian movement in and out of the development and increased demand for public transit connections; there will be need for more, not fewer, buses on State Street. The April 11, 2024, PC Staff Report notes: *City staff and MTD are working with the applicant on strong connections to transit, as the subject site is adjacent to a High Priority Transit Corridor.* So, where are the provisions for strong mass transit connections in this plan? Positioning bus stops on top of the existing bike lanes along the edge of State Street in front of a large new urban neighborhood will create problems, not eliminate them. Transit planning that might have been adequate when La Cumbre was a shopping plaza will not be adequate when La Cumbre is a residential community of the density projected. The location of bus stops needs to be indicated on site plans and relationship between lanes that will carry bus traffic and bike lanes clarified. Neighborhood residents are very familiar with the congestion caused by inadequate provisions for buses, cars, and bicycles along State Street. The congestion caused by one commercial

¹ The list includes: The Marc at 3885 State; Estancia at 3714 State; HASB The Gardens on Hope, 251 S. Hope; upcoming HBSA projects at 15 S. Hope & 200 N. La Cumbre & 3883 La Cumbre Plaza Lane. All of these projects are within easy convenient walking distance of the Macy's site.

establishment – Chick-fil-A – is a well-known example (to Chick-fil-A's credit, it has worked to remedy the situation). The proposed development at La Cumbre dwarfs the Chick-fil-A situation. Multiple modes of transportation will need to be accommodated. The creation of one right turn lane in-bound at State and Hope is inadequate

In a January 9, 2023, letter to The Independent detailing the City's support for new development on the Macy's site, Mayor Rowse wrote: *The surrounding community deserves deliberate and sustainable planning. A project of this magnitude will have impacts that will transform the north side of the city well into the next century.* The mayor is correct about the impact of this development and about the community's right to deliberate and sustainable planning. To expect an existing roadway design that calls for bicycles, e-bikes, buses, and automobiles to negotiate the same narrow space along the side of State Street, a system that barely works at present, to handle a transformative development of this size with the addition of single right turn lane at State and Hope seems naively optimistic.

Thank you for your attention to these concerns.

Public Comment #4

To: Planning Commission, City of Santa Barbara
Subject: Concept review of 3805 State St (April 18, 2024)

The staff report (pages 7 and 8) notes that both the Land Use Element (via policy LG4) and the Housing Element (via policy 2.5) encourage smaller rental units. The explanation of AUD zoning given on page 11 of the Land Use Element recommends an average unit size of 600 sqft in the Priority Overlay zone. Smaller units were recommended by the 2015 PC Housing Subcommittee.

But AUD zoning does exactly the opposite. A defect in the AUD density table makes projects with average unit size 600 sqft financially impossible.

The 3805 State St project perfectly demonstrates this defect.
Its proposed design will result in **zero** moderate income market rate units.

A related issue: the Housing Element site inventory.
The site inventory entry for 3805 State St shows a capacity of 685 units, with 17 for moderate income.
The site inventory entry for 3845 State St shows a capacity of 535 units, with 131 for moderate income.
Why the great disparity?

To be consistent with RHNA goals, the 3805 State St project should include 123 moderate income units.
Why does the survey show 17, rather than 123?

Please note the relevance of Housing Element Program HE-15.

Steven A. Johnson
319 W. Cota St
SB CA 93101

AVERAGE UNIT-SIZE DENSITY INCENTIVE PROGRAM

The purpose of an Average Unit-Size Density Incentive Program is to encourage smaller, more affordable units through established unit sizes, while allowing flexibility for larger units, which help subsidize the cost of the smaller units. Under this program, there are two multi-family land use designations: Medium-High Residential and High Residential and an additional Priority Housing Overlay. When combined with other uses, such as commercial or office, these residential uses are characterized as mixed-use.

For mixed-use designations, the non-residential portion of a project is calculated independent of the residential density. The amount of non-residential square footage is regulated through the Development Plan Ordinance, and the overall scale and design of the proposed structure (both residential and non-residential) is regulated by Municipal Code and Design Review Process (height, setbacks, parking, etc.), including findings of neighborhood compatibility.

The multi-family residential and mixed-use land use designations calculate residential densities based on average unit sizes. For example, in the Medium High Density designation the range could be from 1,450 square feet project average for the lowest densities to 805 square feet for the highest densities. In the High Density designation, the range could be from 1,245 square feet project average for the lowest densities to 970 square feet for the highest densities. In addition, the Priority Housing Overlay could allow additional units above the High Density incentive program if built at **600 square feet**.

For each land use designation the target unit size is approximately 1,000 square feet, sufficient to accommodate two bedrooms. In 2009, two bedroom units were the most highly demanded unit type on the market, given the City's historically low 2.35 persons per household demographic (compared to 2.72 for the county and 2.92 for the state), and the financial advantages of joint tenancy or home/office use.

The permitted densities under this incentive program are both minimums and maximums per the respective designation. Larger sized units are permitted within each "average unit size" category, although a corresponding number of smaller units are then required in order to achieve the "average size". Single family homes and multi-family projects that develop at the base density of 12 - 18 dwelling units per acre are exempted from the minimum requirement and are not subject to unit size limitations.

Therefore, the residential density for any given project under this program is calculated by the number of average size units that can fit into the building envelope (or volume of space) that is established by development review standards including design review considerations. The smaller the average size unit, the greater the density up to a maximum of either 27 du/ac under the Medium High Density designation, 36 du/ac under the High Density designation, or 63 du/ac under the Priority Housing Overlay.

Additional density incentives are also available for all affordable projects, on a project-by-project basis consistent with the City's Affordable Housing Policies and Procedures.

You don't often get email from carson.jf.bruno@gmail.com. [Learn why this is important](#)

Hello -

I am unable to attend in person the Thursday, April 18 Santa Barbara Planning Commission meeting and would like to submit this written public comment in support of **The Neighborhood at State & Hope**.

As a Santa Barbara resident who lives at State and La Cumbre, I write to enthusiastically support the proposed project at the La Cumbre Plaza currently occupied by Macy's.

I have been impressed by the community outreach that **The Neighborhood at State & Hope** team have conducted in explaining what this mixed-used development will be and am encouraged by how this project can positively impact and enhance this portion of the Santa Barbara community.

Daily, I go on neighborhood walks. Aesthetically, the current state of this city plot is absolutely eye-sore. But more importantly, the lack of multi-modal housing and commercial activity in the area poses a significant threat to the livability of the City. This project will enhance the walkability and bikeability of the region - a necessity for Santa Barbara to do its part in combating the effects of climate change - while also creating a vibrant community in which to live, work, shop, and play. The best aspect about Santa Barbara is the community and currently this portion of Santa Barbara lacks character and community. **The Neighborhood at State & Hope** will change that.

Santa Barbara needs more projects like this, and I write to encourage the Commissioners to provide feedback that will enhance this project, not water it down. **The Neighborhood at State & Hope** presents an opportunity for Santa Barbara to invest in livable community development and warrants the City's positive support.

Thank you,

Carson Bruno (he/him/his)

I respectfully am submitting comments for consideration regarding the upcoming April 18 Planning Commission Conceptual Review Hearing Response

I firmly support revitalizing Upper State Street with infill housing.

Housing is a major climate, economic, and social justice issue. Please support quality rental housing and a vibrant neighborhood near services, schools, transit, and jobs. We need to move forward on housing as a community and stop delaying projects to the point they don't pencil or become another luxury hotel.

Thank you,

Rebecca Tannebring Tucker

Some people who received this message don't often get email from patriciawsaley@gmail.com. [Learn why this is important](#)

Dear Planning Commissioners,

You have before you on Thursday one of the largest projects ever proposed in Santa Barbara. The “ground rules” for this proposal are different than others in the past, given local government’s limited discretion under the State Bonus Density Law and other State legislation intended to expedite housing production. That said, it is really important to review this proposal carefully as it would change the character of the Outer State Street area and set a precedent Citywide. I respectfully request that you consider these issues in your deliberations tomorrow:

1. Housing Affordability - Common sense tells us that the more units proposed, the cheaper each unit is to build as the fixed costs are spread across more units. This project proposes 642 units, of which only 54 or 8.4% (per the applicant’s letter) are deed-restricted affordable. The Keyser-Marston economic study demonstrated that there is a multiplier effect from market-rate housing that generates demand for additional affordable housing at a rate of 20 Affordable units per 100 market units built, or 20%. The scale of the project argues for a greater percentage of affordable units, particularly since 8.4% deed-restricted affordable unit would be insufficient to meet the project's own demand, let alone make a dent in the deficit in the city. General Plan consistency is part of your review including Housing Element Policy H2.2: “Increase Production of Affordable Housing - Encourage and provide development opportunities and incentives to increase production of affordable housing.” Please encourage the applicant to increase the percentage of affordable to, at a minimum, offset its own demand of 20% Affordable units (or 128 units).

2. Environmental Review - If ever a project calls for a thorough environmental analysis, it is this one. The goal is not to impede the processing of the project, but to ensure that City decision-makers and residents understand the potential impacts and associated mitigation measures, as CEQA intends. Areas that merit project-specific analysis include:

- **On-site and nearby circulation** - Dennis Doorman’s letter outlines the concerns of multi-modal transportation in the vicinity and the potential effects of 642 additional units and new commercial space in this busy area.
- **Parks and recreation** - This part of Outer State Street does not have parks or large public spaces. MacKenzie Park is approximately 1 mile from the site but no other park or open space is nearby. This proposal includes a one-third reduction in open space in this already deficient area, which would make a finding of consistency with Parks and Recreation GP policies difficult to make. The ABR comments relating to project open space are particularly relevant and hopefully will lead to a redesign to maximize the usable open space onsite, including possibly adding a public park.
- **School age population** - The project is located within the Hope School District boundary. The proposal includes 225 two- and three-bedroom units (35% of total) that could reasonably house school-age children. My understanding is that the Hope District is a “basic aid” district meaning it is primarily funded from property taxes and not based on Average Daily Attendance which would directly compensate the district for each new child attending. I’m sure the district will be very involved in this process and will comment on anticipated impacts and mitigation.

3. Design and height - Thinking of the precedent this project would set, where the height limits in the Charter are waived, is unsettling. The State legislature's thinking was apparently that taller buildings would produce more housing and affordability, although this project proposes only 8.4% deed-restricted affordable units. The existing tower on the Macy's building is some 75' tall and the proposal seeks to exceed that by one or two feet. The overall design of the project is important, especially as this is the first of what may be many projects of this density.

To close, I'd like to reiterate what Steve and Cecilia Fort wrote in their April 13th email to you:

“Finally, there seems to be a consensus that the community deserves more restricted affordable units. With all these units proposed, the height limit exceeded, and the anticipated impacts, what is the neighborhood getting in return? What is the community benefit? Affordable units and a project that is also an amenity for those being impacted are critical.”

Thank you,

Patricia Saley, AICP

Comment:

April 17, 2024

Nina Meyer (Former Owner – Skin Deep Beauty Products, Gifts & Salons)

RE: The Neighborhood – State & Hope

Santa Barbara, California

My sisters and I opened our business 43 years (1980) ago in the San Roque Plaza (3405 State Street) – Skin Deep Beauty Products, Gifts & Salons. Although we retired last year, thousands of our customers will continue to enjoy Skin Deep as the new owners carry on serving the Northside/State Street residents and all of Santa Barbara County. As we have a long and heartfelt concern for the Northside as business owners and San Roque residents beginning in the 1960's, I would like to comment on Jim and Matthew Taylor's proposed development of The Neighborhood – State & Hope.

During our many years in business, we experienced various decades of change throughout our Upper State Street commercial neighborhood. In the early years (1970 – 1990) there was a thriving variety of retail stores, restaurants, offices and other professional business operations in this area. At that time The Northside Business Association lead by Harold Sumida (Sumida Nursery) was a brilliant driving force in supporting business owners to promote successful growth. La Cumbre Plaza was a vibrant, beautiful, and very popular shopping and dining destination for all of Santa Barbara and far beyond. For a variety of reasons, the business landscape drastically changed over time and many operations ceased to exist at La Cumbre Plaza and in the nearby vicinity. This created a dismal and frustrating environment – for business owners who continued to remain open and for many customers in our community. Although we maintained a very loyal customer base, we observed a drastic decline of customers who were visiting tourists and others who left the area due to a lack of needed housing. Fortunately, in more recent years there has been a slow but noticeable renaissance of new stores and several restaurants nearby but not at La Cumbre Plaza – which has remained dormant for the most part other than a few anchor tenants that thankfully remain.

Along with a somewhat negative business environment on Upper State Street in earlier years as described above, for many years we were challenged with finding employees who could afford to live nearby or generally anywhere in Santa Barbara or Goleta. Many of our staff commuted to Ventura and Lompoc so that they could afford to work with us. We lost many valued employees (and customers) because of their need to leave the area in order to afford the cost of living. The Taylor's new development will reinvigorate the Northside

with a much needed combination of residential housing together with commercial operations. The beautiful contemporary design of The Neighborhood will compliment Santa Barbara's Spanish architectural influence and enhance all surrounding areas. It will become a wonderful opportunity for nearby residents, local workforce employees, visitors, and customers to shop, dine, live and enjoy a lovely new venue. This development will also draw many new customers to support other areas of the Northside for shopping, dining and other services.

As we are longtime Santa Barbara residents of more than 60 years, we are grateful to the Taylor Family for proposing The Neighborhood – State & Hope. With their many years of commercial, residential, and recreational development experience they will carefully and successfully bring this exceptional property to its very best use for our entire community.

Sincerely,
Nina Meyer

Public Comment #9

From: [Peter Conn](#)
To: [Community Development PC Secretary](#)
Subject: 3805 State St.
Date: Wednesday, April 17, 2024 2:50:59 PM

Dear Planning Commission,

If a six story building is allowed at 3805 State St., it has to be in what is now the Macy's sunken parking lot along State Street, in order that the above street level part be no higher than the ordinance allowed height limit.

I would like to see some park space with grass and trees for children to play.

Paseos only is not enough high quality open space for families.

This project seems very dense.

Hopefully a tree canopy and other greenery will help cool the area much better than what is there now.

Now there is a high heat island effect. Heat islands need to be eliminated not created nor continued.

I am not addressing the traffic congestion as that is obvious.

There is congestion now without thousands of potential new dwelling units for this whole shopping center piece of land even if this first phase is under 700 units.

We need affordable work force housing not market rate housing.

I'm against any development project that gets special bonus density having any of the units being market rate.

Market rate is not needed. There is adequate available.

Thank you.

Sincerely yours,

Paulina Conn
long time resident of Santa Barbara

[You don't often get email from mlbanister@gmail.com. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

Stuffing 642 units into the already crowded upper State Street area is a bad idea. The adverse impacts on traffic, parking, and surrounding neighborhoods/businesses will be significant and long lasting. Please consider a development with less height and smaller footprint that is more appropriate to Santa Barbara. Thank you, and please add me to your "interested party" list.

April 17, 2024

From: Gerrie Fausett glfausett@gmail.com

Subject: 4/18/24 PC Agenda - Item III State & Hope

Dear Commissioners:

I propose that you conduct an environmental review of this development and that more affordable units are added to the project.

I believe it is paramount to have an environmental review of the proposed development because the size of this project will drastically change the way Upper State Street looks, how traffic moves and how it will affect our local community. It is only common sense to have a review regarding the traffic increase and density with this project. Each unit will likely have 2 cars accompanying it (one for each wage earner). That is 1200+ cars added to the very busy area between Hope and LaCumbre Road.

The proposed 8.4% affordable units would not begin to make a difference in the city's overall need for affordable housing. As you all clearly know, our own children who are grown adults and earning a sizable salary cannot afford to buy in this area. Part of your responsibility is to increase affordable housing; you must require the developers to increase the number of affordable units for teachers, nurses, and other salaried professionals.

This is one of the largest developments to be proposed in Santa Barbara County. Why would we rush through the usual process for a housing project when it has the potential to so greatly impact our community?

Let's do this right, consider this a neighborhood because it is. We live here but our quality of life will not be the same with the size of this project and the impact it will have on our day to day movements. Let's make sure we all know what we are getting into with this project.

Respectfully submitted,

Gerrie Fausett
3739 Meru Lane
Santa Barbara, Ca 93105

**STRONG
TOWNS**
SANTA BARBARA

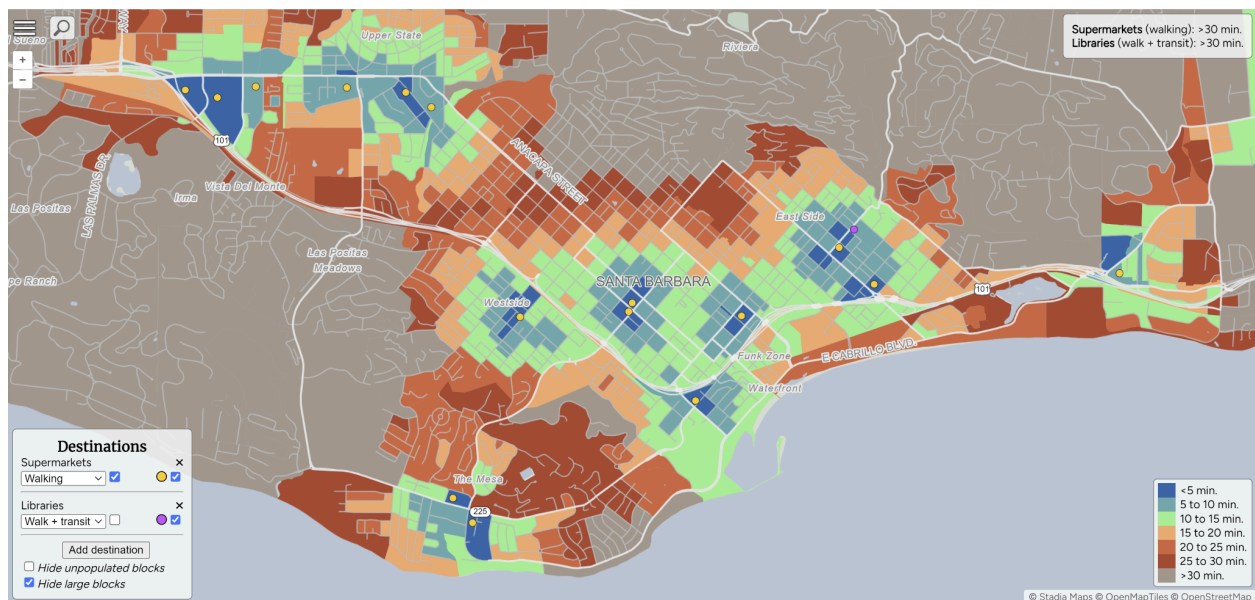

Dear Planning Commission,

My name is Sullivan Israel and I am writing on behalf of the local advocacy group Strong Towns Santa Barbara. Representing over 250 citizens, our group aims to help Santa Barbara become more resilient, fiscally sound, and people-oriented — one step at a time.

I'm writing to you today to express Strong Towns members' support for the State and Hope housing project. This project will bring desperately needed housing to our city, built in a great location. Members of our group visited the Macy's site this past Black Friday, and observed that the parking lots were about half full; clearly this land is underutilized. Bringing over 600 units to this site will provide more diverse housing options for our community, while creating a new neighborhood in which residents will be likely to bike and walk for their daily needs.

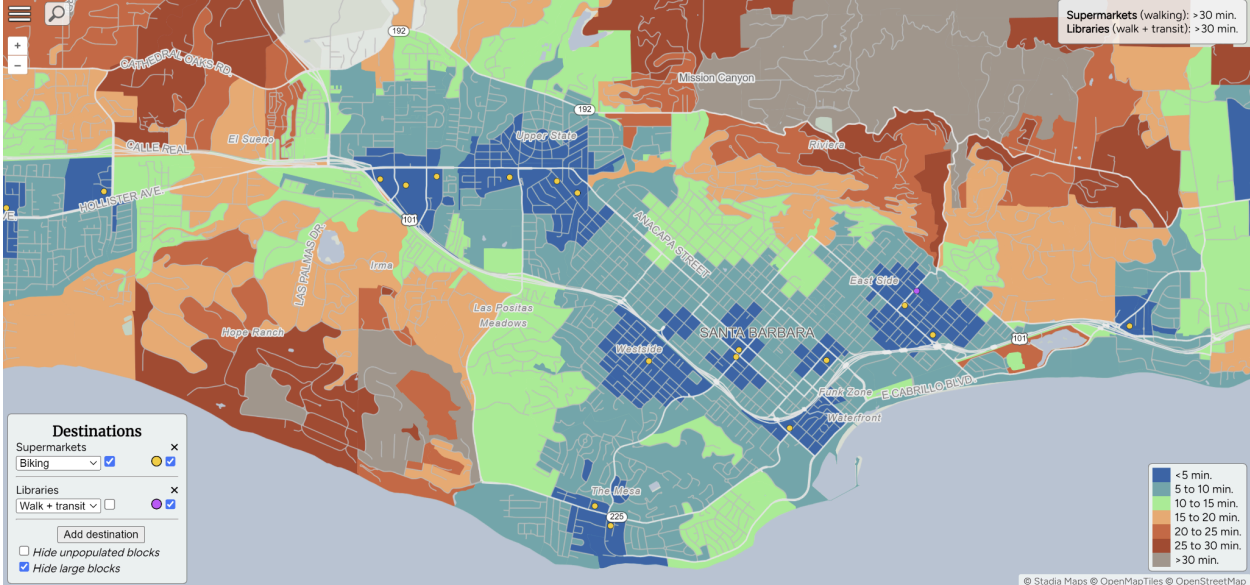

In order to understand the true walking and biking potential of the La Cumbre Plaza site, we can use the tool [close.city](#). Depending on which layers are selected, blocks in blue and green are already within a 5-15 minute walk or 5-15 minute bike ride of supermarkets, meaning density should be prioritized in those areas. New residents who live in blue or green blocks are most likely to walk or cycle for errands.

Here's the map for walkability:

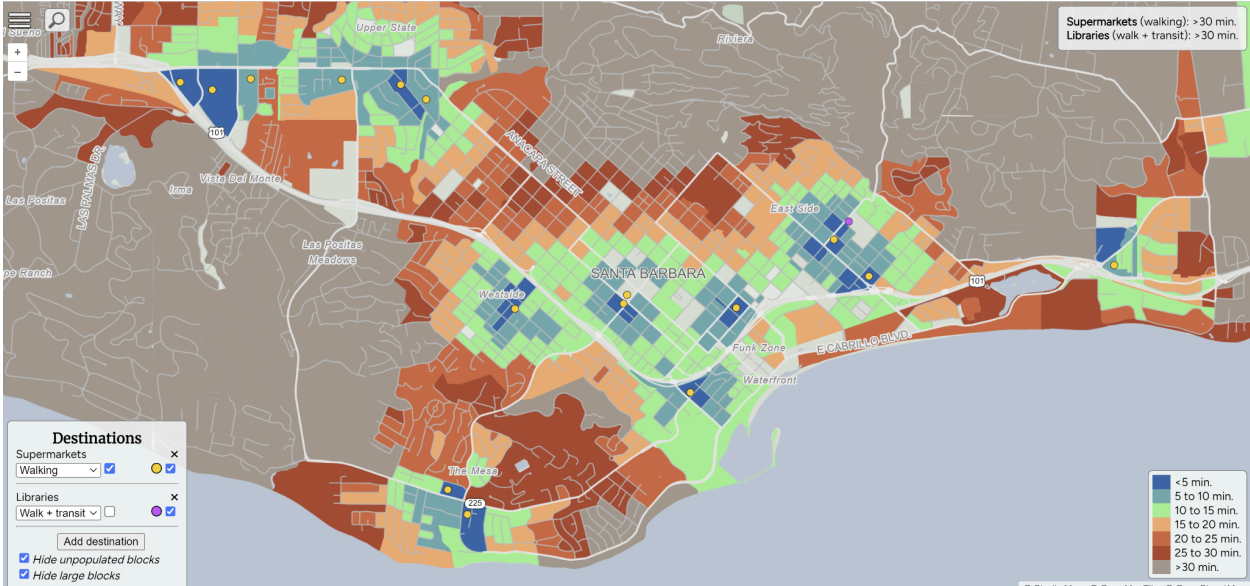

If we look at this first map, which has the walking turned on, and only supermarkets as a destination, we can see that most of the city by area is gray—or completely unwalkable. However, much of downtown, and areas of Upper State and The Mesa have highly walkable areas.

Here’s the map for bikeability:

In both maps, the La Cumbre Plaza area is highlighted in blue, as it is close to multiple markets. However, many of the blue areas in our city have the least density in terms of housing—this is the opposite of how we should be arranging our urban form. In fact, Close.city has an option to view unpopulated blocks, and they appear gray:

The La Cumbre Plaza block does not turn gray due to The Mark development; however, the area is underpopulated considering its walkable and bikeable potential.

Considering where we should develop around this framework—in other words, how we can maximize walking and biking trips through prioritizing areas with the greatest potential for these trips—the State and Hope project is a no-brainer. Indeed, a [new study](#) shows that e-bike owners are far less likely to use a car. However, people will only buy an e-bike in the first place if they live in an area where they feel there are destinations close by and with ample bike parking; the State and Hope project will provide both.

Above: Pictures of the site taken on Black Friday 2023. Even on the day of the year when Macy's should be busiest, the parking lot is hardly full.

Finally, we appreciate State and Hope's inclusion of multiple housing types, from studios to townhomes facing Plaza Dr. Only through building a diversity in types of units will our city provide choice for different types of people including families. This is also how we can solve the housing crisis for all.

We ask that the Planning Commission approves this project and **does not decrease the height, increase setbacks or open space, and does not downgrade the number of units.**

Thank you for your time and consideration.

Public Comment #13

Dear City Planning Staff,

It is my understanding that the project wants to reduce the open space requirement for their project from 15% to 10%. As stated in the staff's report: "The applicant is requesting a development standard waiver under State density bonus law to reduce the minimum open yard area from 56,845 s.f. (15% of net lot area) to 36,727 s.f. (10% of net lot area). Waivers from development standards are afforded by the State density bonus law if the development standard would preclude the project from building at the density entitled by Item III 5 of 35 Planning Commission Staff Report 3805 State Street (PRE2022-00216) Report Date: April 11, 2024 Page 6 State law."

I would urge staff to consider this should not be allowed, because the open space requirement does not preclude the project from building at the density entitled by State Law. They are already seeking a waiver to allow them to build up to 6 stories. That is allowing them to build more units vertically. What is the reasonable need for them to reduce the open space requirement if they are already requesting to build vertically? I urge the applicant and staff can consider my concern for future tenants to have access to enjoyable open space. I urge the applicant/developer to consider creating more green open space on the 1st floor for shared use by all the future tenants. The proposed raised planter boxes are not functional outdoor open space for tenant enjoyment. A small park would be very nice and break up all the hardscape and towering buildings.

Sincerely,

Tatiana

Re: Proposed Housing Development at 3805 State Street

By email: PCSecretary@SantaBarbaraCA.gov;

CC: Clerk@SantaBarbaraCA.gov; sknecht@santabarbaraca.gov;

Dear Santa Barbara Planning Commission:

The California Housing Defense Fund (“CalHDF”) submits this letter to remind the Commission of its obligation to abide by all relevant state housing laws when evaluating the proposed 642-unit housing development, including 27 very low-income units and 27 moderate-income units, at 3805 State Street.

The HAA (Gov. Code, § 65589.5) requires approval of zoning and general plan compliant housing development projects unless findings can be made regarding specific, objective, written health and safety hazards. The HAA also bars cities from imposing conditions on the approval of such projects that would reduce the project’s density unless, again, such written findings are made. Because more than 2/3rds of the project’s square footage is residential use, it falls within the ambit of the HAA (*id.* at subd. (h)(2)(B)). The HAA’s protections therefore apply, and the City must not reject the project, except based on health and safety standards, as outlined above. Furthermore, the Commission also may not deny the project due to subjective development review standards, such as aesthetics, as the HAA only permits consideration of objective standards. (Gov. Code, § 65589.5, subd. (j).)

CalHDF also writes to emphasize that the Density Bonus Law (Gov. Code, § 65915; the “DBL”) offers the proposed development certain protections. The Commission must respect these protections. In addition to granting the increase in residential units allowed by the DBL, the Commission must not deny the project the proposed waivers and concessions with respect to heights, setbacks, and open space, unless it makes written findings as required by Gov. Code, § 65915, subd. (e)(1) that the waivers would have a specific, adverse impact upon health or safety, and for which there is no feasible method to satisfactorily mitigate or avoid the

specific adverse impact. Increased density, concessions, and waivers that a project is entitled to under the DBL do not render the project noncompliant with the zoning code or general plan, for purposes of the HAA. (Gov. Code, § 65589.5, subd. (j)(3).) Of note, the DBL specifically allows for a reduction in required accessory parking in addition to the allowable waivers and concessions. (Gov. Code, § 65915, subd. (p).)

As you are well aware, California remains in the throes of a statewide crisis-level housing shortage. New housing such as this is a public benefit; it will bring increased tax revenue and new customers to local businesses, and it will reduce displacement of existing residents. It will also help cut down on transportation-related greenhouse gas emissions by providing housing in denser, more urban areas, as opposed to farther-flung regions in the state (and out of state). While no one project will solve the statewide housing crisis, the proposed development would be a big step in the right direction. CalHDF urges the Commission to fulfill its obligations under state law and work collaboratively with the applicant to move the project forward.

CalHDF is a 501(c)3 non-profit corporation whose mission includes advocating for increased access to housing for Californians at all income levels, including low-income households. You may learn more about CalHDF at www.calhdf.org.

Sincerely,

Dylan Casey

Public Comment #15

From: [Tamara Diamond](#)
To: [Community Development PC Secretary](#)
Subject: Monster Development at La Cumbre Plaza
Date: Thursday, April 18, 2024 11:23:37 AM

[You don't often get email from tdiamondsb@gmail.com. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

Dear Planning Commission,

My husband and I have owned our home which is located across the street from La Cumbre Plaza along Hope St. since 1997. We have loved our home and location for its easy access to shopping, restaurants, theatre, recreation, parks, etc. In the past several years we have seen a significant number of newer construction projects (Gardens on Hope, The Marc, Grace Village, Estancia to name a few) that have added to an already dense area. The ability, or should I say the lack of ability, to travel along Upper State St at times is extremely difficult...saturated with vehicles and so much congestion that it is difficult to even ingress/egress into and out of a parking lot ... cars are jammed between stop lights! The noise element has increased considerably and parking along the neighboring streets have already been impacted by individuals living in their vehicles. This has become a sanitation and safety concern for many of us who are no longer comfortable walking on some of our streets, Hope Avenue as a prime example. During the day, individuals who work in the nearby businesses rely on the street for parking. What happens when you add an additional 600 plus vehicles to an already saturated problem?

I am not opposed to new housing, however, we are extremely concerned and upset about the 642 units proposed at La Cumbre Plaza. This is a massive project and when we think of the number of new tenants per unit and probably additional tenants living together per unit to meet "market rate" rental prices, plus the additional vehicles per unit, this is no longer a project with the community's interests in mind!!! As long time property tax payers we we feel our once peaceful community has been upended and we no longer feel our interests are being heard.

Have there been any studies regarding the impact this massive project will have on the environment, highways, on/off ramps, traffic patterns and just the overall operation and maintenance of the roads and intersections with this tremendous influx of traffic? Is water no longer an issue? What about law enforcement in the area? These are huge concerns!!!

Unfortunately, I feel the City and County missed the boat by not acting several years ago when the State mandated the increase of new housing. Because of the procrastination, dragging feet, etc, height limitations have been disregarded as well as other time sensitive requirements that would have been a part of any new construction in Santa Barbara.

We are asking you to carefully consider the size and scope of this project and the impact it will have on those of us in the immediate area who will bear of the brunt of this massive undertaking!

Thank you for listening and hopefully hearing us,

Tamara & Jim Diamond

RE: Agenda “New Item” No. 1: 3805 State Street (La Cumbre Plaza) Project

Dear Chair Baucke and Honorable Commissioners,

On behalf of the Western States Regional Council of Carpenters (“**Western States Carpenters**” or “**WSRCC**”), our firm is submitting these comments to the City of Santa Barbara (“**City**”) for the April 18, 2024 Planning Commission meeting regarding the pre-application AUD conceptual review of the The Neighborhood at State and Hope/La Cumbre Plaza project, located at 3805 State Street (“**Project**”).

The Project involves demolition of the existing Macy’s building and on-site parking and construction of a 642-unit mixed-use housing project under the City’s Average Unit-Size Density (AUD) Incentive Program, including approximately 27,748 gross square feet of commercial space, 76 studio, 341 one-bedroom, 205 two-bedroom, 20 three-bedroom units, a total of 1,039 parking spaces, 13 loading spaces, 642 bicycle parking spaces, and an open yard design area of approximately 36,727 square feet with common shared amenities. The Project, as contemplated, would consist of six separate buildings at varying heights from one to six stories.

WSRCC is a labor union representing over 90,000 union carpenters in 12 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects. Individual members of WSRCC live, work, and recreate in the City and surrounding communities and would be directly affected by the Project’s environmental impacts.

The Western States Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

The Western States Carpenters incorporates by reference all comments raising issues regarding the environmental review for the Project submitted prior to the approval of the Project. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project’s environmental documentation may assert any issue timely raised by other parties).

Moreover, the Western States Carpenters requests that the City provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (**CEQA**) (Pub. Res. Code, § 21000 *et seq.*), and the California Planning and Zoning Law (“**Planning and Zoning Law**”) (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency’s governing body.

I. THE CITY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY’S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The City should require that the Project be built using local workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a program, or are registered apprentices in such a program.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impacts of the Project. Local hire provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021, SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

[L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.¹

Furthermore, workforce policies have significant environmental benefits given that they improve an area’s jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (“GHG”) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that that the “[u]se of a local state-certified apprenticeship program” can result in air pollutant reductions.²

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced

¹ California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan 2030 at p. ii, *available at* <https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf>.

² South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, *available at* <http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10>.

communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.³

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (“**VMT**”). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.⁴ Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city’s First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about negotiating corporate participation in First Source as a condition of approval for development permits.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 (AB2011). AB2011 amended the Planning and Zoning Law to allow ministerial, by-right approval for projects being built alongside commercial corridors that meet affordability and labor requirements.

³ California Planning Roundtable (2008) Deconstructing Jobs-Housing Balance at p. 6, available at <https://cproundtable.org/static/media/uploads/publications/cpr-jobs-housing.pdf>

⁴ Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? Journal of the American Planning Association 72 (4), 475-490, 482, available at <http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf>.

The City should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate GHG emissions, improve air quality, and reduce transportation impacts.

II. THE CITY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT’S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES

Construction work has been defined as a Lower to High-risk activity for COVID-19 spread by the Occupational Safety and Health Administration. Recently, several construction sites have been identified as sources of community spread of COVID-19.⁵

Western Carpenters recommend that the City adopt additional requirements to mitigate public health risks from various residential, commercial and mixed-use development construction activities. Western Carpenters requests that the City require safe on-site construction work practices as well as training and certification for any construction workers on residential, commercial and mixed-use developments within the City’s General Plan Area.

In particular, based upon Western Carpenters’ experience with safe construction site work practices, Western Carpenters recommends that the City require that while construction activities are being conducted at the proposed Project (“**Project Site**”):

Construction Site Design:

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.

⁵ Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, *available at* <https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx>.

- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.
- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social distancing position for when you approach the screening area. Please reference the Apex temperature screening site map for additional details.
- There will be clear signage posted at the project site directing you through temperature screening.
- Provide hand washing stations throughout the construction site.

Testing Procedures:

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.
- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.
- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.
- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.
- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be allowed to enter the

Project Site. DHS will also instruct the individual to promptly notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

Planning

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.⁶

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that Carpenter union members and apprentices conduct safe work practices. The City should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

Western Carpenters has also developed a rigorous Infection Control Risk Assessment (“**ICRA**”) training program to ensure it delivers a workforce that understands how to identify and control infection risks by implementing protocols to protect themselves and all others during renovation and construction projects in healthcare environments.⁷

⁶ See also The Center for Construction Research and Training, North America’s Building Trades Unions (April 27 2020) NABTU and CPWR COVID-19 Standards for U.S. Construction Sites, available at https://www.cpwr.com/sites/default/files/NABTU_CPWR_Standards_COVID-19.pdf; Los Angeles County Department of Public Works (2020) Guidelines for Construction Sites During COVID-19 Pandemic, available at https://dpw.lacounty.gov/building-and-safety/docs/pw_guidelines-construction-sites.pdf.

⁷ For details concerning Western Carpenters’ ICRA training program, see <https://icrahealthcare.com/>.

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance and renovation of healthcare facilities. ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

The City should incorporate language in the Development Agreement requiring that the Project be built using a workforce trained in ICRA protocols.

III. THE CITY MUST REQUIRE THE PROJECT TO BE DESIGNED AND CONSTRUCTED IN COMPLIANCE WITH ITS GENERAL PLAN POLICIES AND OBJECTIVES.

Each California city and county must adopt a comprehensive, long-term general plan governing development. *Napa Citizens for Honest Gov. v. Napa County Bd. of Supervisors* (2001) 91 Cal. App.4th 342, 352, citing Gov. Code §§ 65030, 65300. The general plan sits at the top of the land use planning hierarchy (See *DeVita v. County of Napa* (1995) 9 Cal. App. 4th 763, 773), and serves as a “constitution” or “charter” for all future development. *Lesher Communications, Inc. v. City of Walnut Creek* (1990) 52 Cal. App. 3d 531, 540.

General plan consistency is “the linchpin of California’s land use and development laws; it is the principle which infused the concept of planned growth with the force of law.” See *Debottari v. Norco City Council* (1985) 171 Cal. App. 3d 1204, 1213.

State law mandates two levels of consistency. First, a general plan must be internally or “horizontally” consistent: its elements must “comprise an integrated, internally consistent and compatible statement of policies for the adopting agency.” (See Gov. Code § 65300.5; *Sierra Club v. Bd. of Supervisors* (1981) 126 Cal. App. 3d 698, 704.) A general plan amendment thus may not be internally inconsistent, nor may it cause the general plan as a whole to become internally inconsistent. See *DeVita*, 9 Cal. App. 4th at 796 fn. 12.

Second, state law requires “vertical” consistency, meaning that zoning ordinances and other land use decisions also must be consistent with the general plan. (See Gov. Code § 65860(a)(2) [land uses authorized by zoning ordinance must be “compatible with the objectives, policies, general land uses, and programs specified in the [general] plan.”]; see also *Neighborhood Action Group v. County of Calaveras* (1984) 156 Cal. App. 3d 1176, 1184.) A zoning ordinance that conflicts with the general plan or

impedes achievement of its policies is invalid and cannot be given effect. See *Lesher*, 52 Cal. App. 3d at 544.

State law requires that all subordinate land use decisions, including conditional use permits, be consistent with the general plan. See Gov. Code § 65860(a)(2); *Neighborhood Action Group*, 156 Cal. App. 3d at 1184.

A project cannot be found consistent with a general plan if it conflicts with a general plan policy that is “fundamental, mandatory, and clear,” regardless of whether it is consistent with other general plan policies. See *Endangered Habitats League v. County of Orange* (2005) 131 Cal. App. 4th 777, 782-83; *Families Unafraid to Uphold Rural El Dorado County v. Bd. of Supervisors* (1998) 62 Cal. App. 4th 1332, 1341-42 (“FUTURE”).

Moreover, even in the absence of such a direct conflict, an ordinance or development project may not be approved if it interferes with or frustrates the general plan’s policies and objectives. See *Napa Citizens*, 91 Cal. App. 4th at 378-79; see also *Lesher*, 52 Cal. App. 3d at 544 (zoning ordinance restricting development conflicted with growth-oriented policies of general plan).

For the reasons set forth below, WSRCC submits the Project, as currently proposed, conflicts with the City’s General Plan. California law obligates the City to ensure that the Project comply with the policies, objectives, goals, and overall spirit set forth in the City’s current General Plan. While the current General Plan delineates a host of policies applicable to the proposed Project, the Project’s initial conceptual planning and design does not address and incorporate a number of such policies, including a critical aspect of the General Plan’s Land Use Element and a multitude of affiliated policies under the General Plan’s Housing Element and Environmental Resource Element.

A. The Proposed Project Does Not Demonstrate Consistency with the General Plan’s Policies re: Land Use Element

LG15, and its subset implementation action LG15.2, within the Land Use Element of the General Plan provides as follows:

LG15. Sustainable Neighborhood Planning. Neighborhoods shall be encouraged to preserve and enhance the sense of place, provide opportunities for healthy living and accessibility, *while reducing the community’s carbon footprint.*

Possible Implementation Actions to be Considered

LG15.2 La Cumbre Plaza Specific Plan. Prepare an initial framework for a future ***La Cumbre Plaza Specific Plan for the eventual redevelopment of the site based on the analysis in the Upper State Street Study***, including identification of applicable parcels, and issues to be addressed in the future Specific Plan. Include consideration of a mixed commercial and residential village approach and possible public improvements such as a transit center, open space/public park, pedestrian connections, east/west vehicle circulation connections, and parking structures.⁸

(***bold italics*** added for emphasis.) In the first instance, the General Plan specifies “reducing the community’s carbon footprint” as an important land use goal. In contrast, and as discussed in greater detail below in connection with other General Plan elements, the proposed Project in its “APPLICANT LETTER and PROJECT DESCRIPTION” (the “**Project Description**”) makes no provision whatsoever as to if, and how, it intends to reduce the community’s carbon footprint. Indeed, no reference whatsoever is made to any emissions reduction and/or energy efficiency strategies to be deployed as part of the proposed development. Per the General Plan’s mandate, the City must ensure that such measures are established, required, and incorporated for the proposed Project.

Secondly, under LG15.2 the General Plan expressly contemplates a Specific Plan for the redevelopment of La Cumbre Plaza. However, as presented in the Project Description, the proposed Project does not include any proposal of a Specific Plan associated with the Project site and its neighboring parcels. WSRCC submits that, in order to proceed in alignment with the General Plan regarding the proposed Project, the City must follow its own guidance in mandating that the proposed Project also develop and submit for approval a Specific Plan for the redevelopment of La Cumbre Plaza.

⁸ City of Santa Barbara General Plan Elements & Appendices *available at* <https://santabarbaraca.gov/government/priorities-policies/general-plan/general-plan-elements-appendices>

B. The Proposed Project Does Not Demonstrate Consistency with the General Plan’s Policies re: Housing and Environmental Resources Elements

H1.1 of the Housing Element under the General Plan, pertaining to “Sustainable and Livable Neighborhoods,” provides as follows:

H1.1. Sustainable and Livable Neighborhoods. Ensure that new housing programs, housing developments, and related infrastructure improvements include community-led strategies that encourage community revitalization in areas of lower opportunity to meet the needs of lower-income residents and ***are consistent with the City’s sustainability initiatives for energy efficiency and active transportation goals.***

(***bold italics*** added for emphasis.) With regard to the City’s sustainability initiatives, particularly with regard to energy efficiency, the City is in the process of finalizing and adopting its Climate Action Plan (“**CAP**”) entitled “Together to Zero.” Under the CAP’s proposed framework, the City has set the goal of achieving carbon neutrality by 2035. The CAP aims to achieve this goal via a variety of measures, including but not limited to the following, which would be applicable to the proposed Project:

- BE-4: Expand existing natural gas prohibition ordinance for new construction;
- BE-7: Increase the impact of Santa Barbara Clean Energy (SBCE);
- T-6: Increase Zero-Emission Passenger Vehicle Use and Adoption to 30% by 2030 and 55% by 2035;
- W-3: Reduce Per Capita Potable Water Consumption 1.05% by 2030 and 1.58% by 2035;
- W-4: Reduce Organic Waste 80% below 2014 levels by 2030 and 85% by 2035;
- CS-1: Increase carbon sequestration ... by planting 4,500 new trees throughout the community by 2030; and
- CS-5: Reduce GHG emissions of residential and commercial building materials 20% by 2030 and a 40% by 2035 in line with AB 2446.

(See Appendix A to City of Santa Barbara Draft Climate Action Plan, Section 3, Measures.⁹) Meanwhile, the Project Description makes no reference whatsoever to energy saving measures or GHG emission reduction strategies to be implemented as part of the design and construction of the proposed development. The measures delineated in the City’s CAP, most particularly including (1) prohibition of natural gas in new construction, (2) encouragement of zero-emission vehicle adoption, (3) reduction of water consumption, (4) reduction of organic waste, (5) increasing carbon sequestration, and (6) reduction of GHG emissions of building materials, should be incorporated into the fiber of the proposed Project if the City is to successfully uphold the neighborhood sustainability mandates set forth in its Housing Element.¹⁰

Additionally, the Environmental Resource Element of the City’s General Plan provides as follows, in relevant part:

ER1. Climate Change. As applicable, private development and public facilities and services may be required to *incorporate measures to minimize contributions to climate change and to adapt to climate changes anticipated to occur within the life of each project.*

Possible Implementation Actions to be Considered

ER1.2 Greenhouse Gas Emission (GHG). Require new development, redevelopment and substantial remodels to *demonstrate how the project will support the City in attaining regional GHG vehicular emissions reduction targets. The Santa Barbara region has targets of zero net increase (from 2005 levels) in per capita GHG vehicular emissions in 2020 and 2035.* These regional targets were adopted in 2010 by the Santa Barbara County Association of Governments (SBCAG) and the California Air Resources Board (CARB) pursuant to SB 375.

ER3. Decrease City’s Global Footprint. In addition to promoting reduced unit size, building footprints and GHG emissions, and energy conservation,

⁹ City of Santa Barbara Draft Climate Action Plan (Together to Zero) and Appendices, available at <https://sustainability.santabarbaraca.gov/programs/climate-action-plan>

¹⁰ WSRCC notes that the CAP has been released in draft form and currently remains available for public comment. To the extent that the measures in the final CAP vary from those set forth herein, WSRCC reserves its right to revise its comments on these issues to correspond with the final CAP measures.

promote the use of more sustainable building and landscaping materials and methods.

ER4. Incorporation of Adaptation in Development. New public and private development or substantial redevelopment or reuse ***projects shall estimate the useful life of proposed structures, and, in conjunction with available information about established hazard potential attributable to climate change, incorporate adaptation measures in the design, siting and location of the structures.***

ER5. Energy Efficiency and Conservation. As part of the City’s strategy for addressing climate change, minimizing pollution of air and water, depleting nonrenewable resources and insulating from volatility of fossil fuel prices, ***dependence on energy derived from fossil fuels shall be reduced through increased efficiency, conservation, and conversion to renewable energy sources when practicable and financially warranted.***

Possible Implementation Actions to be Considered

ER5.1 Energy Efficient Buildings. ***Encourage all new construction to be designed and built consistent with City green programs, the California Green Building Code, policies, and the goal of achieving “carbon neutrality” by 2030 in all buildings.***

Further reduce energy consumption over time to “carbon neutrality” by 2030 in new building and through suggested retrofits. Establish a voluntary program and time line for increasing the energy efficiency and carbon neutrality of new buildings or additions, and of existing building stock. Provide:

...

ER8. Low-Emission Vehicles and Equipment. ***Expand infrastructure and establish incentives for use of lower emission vehicles and equipment (e.g., parking priority, electric vehicle plug-ins).*** Support the amendment of speed limit restrictions to permit the wider use of electric vehicles.

Possible Implementation Actions to be Considered

ER8.1 Electric Vehicles. Monitor electric car development, including the projected availability of new vehicles and the types of charging stations

that will serve those vehicles. ***Require the installation of the most commonly used types of electric charging stations in all major new non-residential development*** and remodels as appropriate, based on increases in the electric vehicle fleet and the availability of suitable charging technology. ***Provide expedited permitting for installation of electric vehicle charging infrastructure in residential, commercial, and industrial development. Consider changing the Building Code to require pre-wiring for electric vehicle charging infrastructure in new and substantial remodels of residential units.***¹¹

(***bold italics*** added for emphasis.) Again, the Project Description provides no detail regarding measures to be implemented at the Project with the aim of improving energy efficiency and reducing carbon footprint consistent with the tenets of the Environmental Resources Element of the City’s General Plan. Indeed, the Project Description contains no discussion regarding the inclusion and incorporation of EV charging capabilities, nor regarding the use of green building materials, conservation measures, or renewable energy sources, nor regarding the aspects of the Project that will contribute to the General Plan’s goal minimizing contributions to climate change and reducing GHG emissions. Further, the Project Description does not include an estimate of the useful life of the development’s proposed structure, nor does it indicate any adaptations to be incorporated into the structures that would enhance the Project’s climate resiliency.

All of the above objectives are expressly set forth in the General Plan, and the City must therefore ensure that the proposed Project considers and addresses each of these objectives as a part of its design.

C. The Proposed Project Does Not Comply with the General Plan’s Housing Element

As contemplated in the Project Description, the proposed Project would construct 642 dwelling units. However, the City’s Housing Element requires that the Project Site provide at minimum 685 dwelling units. (See City of Santa Barbara Final Adopted Housing Element 2023-2031, Appendix G – Suitable Sites Inventory, p. 448.) The Housing Element is a legally binding component of the City’s General Plan, and any

¹¹ See City of Santa Barbara General Plan Elements & Appendices, *supra*.

deviation from the site capacities set forth therein would require a separate amendment and approval process.

The reduction in the number of units conflicts directly with the State’s “No Net Loss” requirement. In particular, Cal. Government Code section 65863(b)(2) requires that:

[i]f a city, county, or city and county, by administrative, quasi-judicial, legislative, or other action, allows development of any parcel with fewer units by income category than identified in the jurisdiction's housing element for that parcel, the city, county, or city and county shall make a written finding supported by substantial evidence as to whether or not remaining sites identified in the housing element are adequate to meet the requirements of Section 65583.2 and to accommodate the jurisdiction's share of the regional housing need pursuant to Section 65584. The finding shall include a quantification of the remaining unmet need for the jurisdiction's share of the regional housing need at each income level and the remaining capacity of sites identified in the housing element to accommodate that need by income level.:

The City, if it permits this development as currently proposed, will need to demonstrate that the City still has adequate sites able to meet the State’s regional housing goals. Accordingly, as it currently stands, WSRCC submits that the proposed Project does not comply with the City’s Housing Element, and by extension, the General Plan, such that the Project must either be revised to provide the required number of dwelling units (685) under the Housing Element, or the Applicant must first pursue amendment to the City’s Housing Element in connection with its pursuit of an application for development of the Project.

IV. THE CITY SHOULD DETERMINE THAT AN ENVIRONMENTAL IMPACT REPORT FOR THE PROJECT IS REQUIRED UNDER CEQA.

CEQA is a California statute designed to inform decision makers and the public about the potential, significant environmental effects of a project. 14 California Code of Regulations (“**CEQA Guidelines**”) § 15002(a)(1).¹² At its core, “[i]ts purpose is to

¹² The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 *et seq.*, are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. (Cal. Pub. Res. Code § 21083.) The CEQA Guidelines are given “great weight in interpreting CEQA except when . . . clearly unauthorized or

inform the public and its responsible officials of the environmental consequences of their decisions *before* they are made.” *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal. 3d 553, 564.

To achieve this purpose, CEQA mandates preparation of an Environmental Impact Report (“**EIR**”) for projects so that the foreseeable impacts of pursuing the project can be understood and weighed. *Communities for a Better Environment v. Richmond* (2010) 184 Cal. App. 4th 70, 80. The EIR requirement “is the heart of CEQA.” CEQA Guidelines, § 15003(a).

A strong presumption in favor of requiring preparation of an EIR is built into CEQA. This presumption is reflected in what is known as the “fair argument” standard, under which an agency must prepare an EIR whenever substantial evidence in the record supports a fair argument that a project may have a significant effect on the environment. *Quail Botanical Gardens Found., Inc. v. City of Encinitas* (1994) 29 Cal. App. 4th 1597, 1602; *Friends of “B” St. v. City of Hayward* (1980) 106 Cal. 3d 988, 1002.

The fair argument test stems from the statutory mandate that an EIR be prepared for any project that “may have a significant effect on the environment.” PRC § 21151; *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal. App. 3d 68, 75; *Jensen v. City of Santa Rosa* (2018) 23 Cal. App. 5th 877, 884. Under this test, if a proposed project is not exempt and may cause a significant effect on the environment, the lead agency must prepare an EIR. PRC §§ 21100(a), 21151; CEQA Guidelines § 15064(a)(1), (f)(1). An EIR may be dispensed with only if the lead agency finds no substantial evidence in the initial study or elsewhere in the record that the project may have a significant effect on the environment. *Parker Shattuck Neighbors v. Berkeley City Council* (2013) 222 Cal. App. 4th 768, 785. In such a situation, the agency must adopt a negative declaration. PRC § 21080(c)(1); CEQA Guidelines §§ 15063(b)(2), 15064(f)(3).

“Significant effect upon the environment” is defined as “a substantial or potentially substantial adverse change in the environment.” PRC § 21068; CEQA Guidelines § 15382. A project “may” have a significant effect on the environment if there is a “reasonable probability” that it will result in a significant impact. *No Oil, Inc. v. City of Los Angeles*, 13 Cal. 3d at 83 fn. 16; *Sundstrom v. County of Mendocino* (1988) 202 Cal. App. 3d 296, 309. If any aspect of the project may result in a significant impact on the

erroneous.” *Center for Biological Diversity v. Department of Fish & Wildlife* (2015) 62 Cal. 4th 204, 217.

environment, an EIR must be prepared even if the overall effect of the project is beneficial. CEQA Guidelines § 15063(b)(1). See *County Sanitation Dist. No. 2 v. County of Kern* (2005) 127 Cal. App. 4th 1544, 1580.

This standard sets a "low threshold" for preparation of an EIR. *Consolidated Irrig. Dist. v. City of Selma* (2012) 204 Cal. App. 4th 187, 207; *Nelson v. County of Kern* (2010) 190 Cal. App. 4th 252; *Pocket Protectors v. City of Sacramento* (2004) 124 Cal. App. 4th 903, 928; *Bowman v. City of Berkeley* (2004) 122 Cal. App. 4th 572, 580; *Citizen Action to Serve All Students v. Thornley* (1990) 222 Cal. App. 3d 748, 754; *Sundstrom v. County of Mendocino* (1988) 202 Cal. App. 3d 296, 310. If substantial evidence in the record supports a fair argument that the project may have a significant environmental effect, the lead agency must prepare an EIR even if other substantial evidence before it indicates the project will have no significant effect. See *Jensen v. City of Santa Rosa* (2018) 23 Cal. App. 5th 877, 886; *Clews Land & Livestock v. City of San Diego* (2017) 19 Cal. App. 5th 161, 183; *Stanislaus Audubon Soc'y, Inc. v. County of Stanislaus* (1995) 33 Cal. App. 4th 144, 150; *Brentwood Ass'n for No Drilling, Inc. v. City of Los Angeles* (1982) 134 Cal. App. 3d 491; *Friends of "B" St. v. City of Hayward* (1980) 106 Cal. App. 3d 988; CEQA Guidelines § 15064(f)(1).

Given the nature and scope of the proposed Project, WSRCC echoes the sentiments set forth in the Staff Report that the Project will not be exempt from CEQA. Further, WSRCC submits that it is reasonable to anticipate that there will be a fair argument that the Project will have a significant effect on the environment, triggering the "low threshold" standard for preparation of an EIR. As such, WSRCC anticipates that the City will likely be required to develop and circulate an Environmental Impact Report ("EIR") for the Project once an Initial Study can be conducted.

V. CONCLUSION

In sum, WSRCC requests that the City require a local workforce, that the City impose training requirements for the Project's construction activities to prevent community spread of COVID-19 and other infectious diseases, that the City ensure the Project's consistency with the General Plan and Housing Element, and that the City determine that an EIR must be prepared for the Project. Should the City have any questions regarding this correspondence, please do not hesitate to contact this Office.

Sincerely,

Jeremy Herwitt

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise (“SWAPE”) is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas (“GHG”) emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model (“CalEEMod”) is a “statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects.”¹ CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.²

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.³

¹ “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

² “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

³ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.⁴

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$$

Where:

n = Number of land uses being modeled.”⁵

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$ = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$ = emission factor for running emissions.”⁶

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.⁷ In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.⁸ The default number of construction-related worker trips is calculated by multiplying the

⁵ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 23.

⁶ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

⁷ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

⁸ CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.⁹ Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”¹⁰ Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.¹¹ The operational home-to-work vehicle trip lengths are:

“[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).¹²

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).¹³

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	16.47	11.17
Minimum	10.80	10.80
Maximum	19.80	14.70
Range	9.00	3.90

⁹ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

¹⁰ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

¹¹ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14.

¹² “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.

¹³ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8- miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7- miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.¹⁴ In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized Construction GHG Emissions (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized Construction GHG Emissions (MT CO ₂ e/year)	100.80
% Decrease in Construction-related GHG Emissions	17%

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

¹⁴ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-85.

Village South Specific Plan (Proposed)
Los Angeles-South Coast County, Annual

1.0 Project Characteristics**1.1 Land Usage**

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Village South Specific Plan (Proposed)
Los Angeles-South Coast County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized (MT CO ₂ e/year)	100.80
<i>% Decrease in Construction-related GHG Emissions</i>	17%

EXHIBIT B

Paul Rosenfeld, Ph.D.

Principal Environmental Chemist

Chemical Fate and Transport & Air Dispersion Modeling

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H₂O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Rosenfeld, P. E. (1994). Potential Utilization of Small Diameter Trees on Sierra County Public Land. Masters thesis reprinted by the Sierra County Economic Council. Sierra County, California.

Rosenfeld, P. E. (1991). How to Build a Small Rural Anaerobic Digester & Uses Of Biogas In The First And Third World. Bachelors Thesis. University of California.

Presentations:

Rosenfeld, P.E., Sutherland, A; Hesse, R.; Zapata, A. (October 3-6, 2013). Air dispersion modeling of volatile organic emissions from multiple natural gas wells in Decatur, TX. *44th Western Regional Meeting, American Chemical Society*. Lecture conducted from Santa Clara, CA.

Sok, H.L.; Waller, C.C.; Feng, L.; Gonzalez, J.; Sutherland, A.J.; Wisdom-Stack, T.; Sahai, R.K.; Hesse, R.C.; **Rosenfeld, P.E.** (June 20-23, 2010). Atrazine: A Persistent Pesticide in Urban Drinking Water. *Urban Environmental Pollution*. Lecture conducted from Boston, MA.

Feng, L.; Gonzalez, J.; Sok, H.L.; Sutherland, A.J.; Waller, C.C.; Wisdom-Stack, T.; Sahai, R.K.; La, M.; Hesse, R.C.; **Rosenfeld, P.E.** (June 20-23, 2010). Bringing Environmental Justice to East St. Louis, Illinois. *Urban Environmental Pollution*. Lecture conducted from Boston, MA.

Rosenfeld, P.E. (April 19-23, 2009). Perfluorooctanoic Acid (PFOA) and Perfluorooctane Sulfonate (PFOS) Contamination in Drinking Water From the Use of Aqueous Film Forming Foams (AFFF) at Airports in the United States. *2009 Ground Water Summit and 2009 Ground Water Protection Council Spring Meeting*, Lecture conducted from Tuscon, AZ.

Rosenfeld, P.E. (April 19-23, 2009). Cost to Filter Atrazine Contamination from Drinking Water in the United States” Contamination in Drinking Water From the Use of Aqueous Film Forming Foams (AFFF) at Airports in the United States. *2009 Ground Water Summit and 2009 Ground Water Protection Council Spring Meeting*. Lecture conducted from Tuscon, AZ.

Wu, C., Tam, L., Clark, J., **Rosenfeld, P.** (20-22 July, 2009). Dioxin and furan blood lipid concentrations in populations living near four wood treatment facilities in the United States. Brebbia, C.A. and Popov, V., eds., *Air Pollution XVII: Proceedings of the Seventeenth International Conference on Modeling, Monitoring and Management of Air Pollution*. Lecture conducted from Tallinn, Estonia.

Rosenfeld, P. E. (October 15-18, 2007). Moss Point Community Exposure To Contaminants From A Releasing Facility. *The 23rd Annual International Conferences on Soils Sediment and Water*. Platform lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld, P. E. (October 15-18, 2007). The Repeated Trespass of Tritium-Contaminated Water Into A Surrounding Community Form Repeated Waste Spills From A Nuclear Power Plant. *The 23rd Annual International Conferences on Soils Sediment and Water*. Platform lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld, P. E. (October 15-18, 2007). Somerville Community Exposure To Contaminants From Wood Treatment Facility Emissions. The *23rd Annual International Conferences on Soils Sediment and Water*. Lecture conducted from University of Massachusetts, Amherst MA.

Rosenfeld P. E. (March 2007). Production, Chemical Properties, Toxicology, & Treatment Case Studies of 1,2,3-Trichloropropane (TCP). *The Association for Environmental Health and Sciences (AEHS) Annual Meeting*. Lecture conducted from San Diego, CA.

Rosenfeld P. E. (March 2007). Blood and Attic Sampling for Dioxin/Furan, PAH, and Metal Exposure in Florida, Alabama. *The AEHS Annual Meeting*. Lecture conducted from San Diego, CA.

Hensley A.R., Scott, A., **Rosenfeld P.E.**, Clark, J.J.J. (August 21 – 25, 2006). Dioxin Containing Attic Dust And Human Blood Samples Collected Near A Former Wood Treatment Facility. *The 26th International Symposium on Halogenated Persistent Organic Pollutants – DIOXIN2006*. Lecture conducted from Radisson SAS Scandinavia Hotel in Oslo Norway.

Hensley A.R., Scott, A., **Rosenfeld P.E.**, Clark, J.J.J. (November 4-8, 2006). Dioxin Containing Attic Dust And Human Blood Samples Collected Near A Former Wood Treatment Facility. *APHA 134 Annual Meeting & Exposition*. Lecture conducted from Boston Massachusetts.

Paul Rosenfeld Ph.D. (October 24-25, 2005). Fate, Transport and Persistence of PFOA and Related Chemicals. Mealey's C8/PFOA. *Science, Risk & Litigation Conference*. Lecture conducted from The Rittenhouse Hotel, Philadelphia, PA.

Paul Rosenfeld Ph.D. (September 19, 2005). Brominated Flame Retardants in Groundwater: Pathways to Human Ingestion, *Toxicology and Remediation PEMA Emerging Contaminant Conference*. Lecture conducted from Hilton Hotel, Irvine California.

Paul Rosenfeld Ph.D. (September 19, 2005). Fate, Transport, Toxicity, And Persistence of 1,2,3-TCP. *PEMA Emerging Contaminant Conference*. Lecture conducted from Hilton Hotel in Irvine, California.

Paul Rosenfeld Ph.D. (September 26-27, 2005). Fate, Transport and Persistence of PDBEs. *Mealey's Groundwater Conference*. Lecture conducted from Ritz Carlton Hotel, Marina Del Ray, California.

Paul Rosenfeld Ph.D. (June 7-8, 2005). Fate, Transport and Persistence of PFOA and Related Chemicals. *International Society of Environmental Forensics: Focus On Emerging Contaminants*. Lecture conducted from Sheraton Oceanfront Hotel, Virginia Beach, Virginia.

Paul Rosenfeld Ph.D. (July 21-22, 2005). Fate Transport, Persistence and Toxicology of PFOA and Related Perfluorochemicals. *2005 National Groundwater Association Ground Water And Environmental Law Conference*. Lecture conducted from Wyndham Baltimore Inner Harbor, Baltimore Maryland.

Paul Rosenfeld Ph.D. (July 21-22, 2005). Brominated Flame Retardants in Groundwater: Pathways to Human Ingestion, Toxicology and Remediation. *2005 National Groundwater Association Ground Water and Environmental Law Conference*. Lecture conducted from Wyndham Baltimore Inner Harbor, Baltimore Maryland.

Paul Rosenfeld, Ph.D. and James Clark Ph.D. and Rob Hesse R.G. (May 5-6, 2004). Tert-butyl Alcohol Liability and Toxicology, A National Problem and Unquantified Liability. *National Groundwater Association. Environmental Law Conference*. Lecture conducted from Congress Plaza Hotel, Chicago Illinois.

Paul Rosenfeld, Ph.D. (March 2004). Perchlorate Toxicology. *Meeting of the American Groundwater Trust*. Lecture conducted from Phoenix Arizona.

Hagemann, M.F., **Paul Rosenfeld, Ph.D.** and Rob Hesse (2004). Perchlorate Contamination of the Colorado River. *Meeting of tribal representatives*. Lecture conducted from Parker, AZ.

Paul Rosenfeld, Ph.D. (April 7, 2004). A National Damage Assessment Model For PCE and Dry Cleaners. *Drycleaner Symposium. California Ground Water Association*. Lecture conducted from Radison Hotel, Sacramento, California.

Rosenfeld, P. E., Grey, M., (June 2003) Two stage biofilter for biosolids composting odor control. *Seventh International In Situ And On Site Bioremediation Symposium Battelle Conference* Orlando, FL.

Paul Rosenfeld, Ph.D. and James Clark Ph.D. (February 20-21, 2003) Understanding Historical Use, Chemical Properties, Toxicity and Regulatory Guidance of 1,4 Dioxane. *National Groundwater Association. Southwest Focus Conference. Water Supply and Emerging Contaminants..* Lecture conducted from Hyatt Regency Phoenix Arizona.

Paul Rosenfeld, Ph.D. (February 6-7, 2003). Underground Storage Tank Litigation and Remediation. *California CUPA Forum*. Lecture conducted from Marriott Hotel, Anaheim California.

Paul Rosenfeld, Ph.D. (October 23, 2002) Underground Storage Tank Litigation and Remediation. *EPA Underground Storage Tank Roundtable*. Lecture conducted from Sacramento California.

Rosenfeld, P.E. and Suffet, M. (October 7- 10, 2002). Understanding Odor from Compost, *Wastewater and Industrial Processes. Sixth Annual Symposium On Off Flavors in the Aquatic Environment. International Water Association*. Lecture conducted from Barcelona Spain.

Rosenfeld, P.E. and Suffet, M. (October 7- 10, 2002). Using High Carbon Wood Ash to Control Compost Odor. *Sixth Annual Symposium On Off Flavors in the Aquatic Environment. International Water Association*. Lecture conducted from Barcelona Spain.

Rosenfeld, P.E. and Grey, M. A. (September 22-24, 2002). Biocycle Composting For Coastal Sage Restoration. *Northwest Biosolids Management Association*. Lecture conducted from Vancouver Washington..

Rosenfeld, P.E. and Grey, M. A. (November 11-14, 2002). Using High-Carbon Wood Ash to Control Odor at a Green Materials Composting Facility. *Soil Science Society Annual Conference*. Lecture conducted from Indianapolis, Maryland.

Rosenfeld, P.E. (September 16, 2000). Two stage biofilter for biosolids composting odor control. *Water Environment Federation*. Lecture conducted from Anaheim California.

Rosenfeld, P.E. (October 16, 2000). Wood ash and biofilter control of compost odor. *Biofest*. Lecture conducted from Ocean Shores, California.

Rosenfeld, P.E. (2000). Bioremediation Using Organic Soil Amendments. *California Resource Recovery Association*. Lecture conducted from Sacramento California.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. *Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings*. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., and C.L. Henry. (1999). An evaluation of ash incorporation with biosolids for odor reduction. *Soil Science Society of America*. Lecture conducted from Salt Lake City Utah.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Comparison of Microbial Activity and Odor Emissions from Three Different Biosolids Applied to Forest Soil. *Brown and Caldwell*. Lecture conducted from Seattle Washington.

Rosenfeld, P.E., C.L. Henry. (1998). Characterization, Quantification, and Control of Odor Emissions from Biosolids Application To Forest Soil. *Biofest*. Lecture conducted from Lake Chelan, Washington.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 20010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

- In the United States District Court For The District of New Jersey
Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.
Case No.: 2:17-cv-01624-ES-SCM
Rosenfeld Deposition. 6-7-2019
- In the United States District Court of Southern District of Texas Galveston Division
M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS “Conti Perdido”
Defendant.
Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237
Rosenfeld Deposition. 5-9-2019
- In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants
Case No.: No. BC615636
Rosenfeld Deposition, 1-26-2019
- In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica
The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants
Case No.: No. BC646857
Rosenfeld Deposition, 10-6-2018; Trial 3-7-19
- In United States District Court For The District of Colorado
Bells et al. Plaintiff vs. The 3M Company et al., Defendants
Case: No 1:16-cv-02531-RBJ
Rosenfeld Deposition, 3-15-2018 and 4-3-2018
- In The District Court Of Regan County, Texas, 112th Judicial District
Phillip Bales et al., Plaintiff vs. Dow Agrosiences, LLC, et al., Defendants
Cause No 1923
Rosenfeld Deposition, 11-17-2017
- In The Superior Court of the State of California In And For The County Of Contra Costa
Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants
Cause No C12-01481
Rosenfeld Deposition, 11-20-2017
- In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois
Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants
Case No.: No. 0i9-L-2295
Rosenfeld Deposition, 8-23-2017
- In The Superior Court of the State of California, For The County of Los Angeles
Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC
Case No.: LC102019 (c/w BC582154)
Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018
- In the Northern District Court of Mississippi, Greenville Division
Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*
Case Number: 4:16-cv-52-DMB-JVM
Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action NO. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward
DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City
Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas
Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.
Case Number cc-11-01650-E
Rosenfeld Deposition: March and September 2013
Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio
John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*
Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)
Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division
Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.
Case 3:10-cv-00622
Rosenfeld Deposition: February 2012
Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland
Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants
Case Number: 03-C-12-012487 OT
Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

**Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review**

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.

B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist

California Certified Hydrogeologist

Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt’s responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt’s duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, *Oxygenates in Water: Critical Information and Research Needs*.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Colorado.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

You don't often get email from kchaw13@yahoo.com. [Learn why this is important](#)

City of Santa Barbara
Community Development Department

To Whom it May Concern:

I am writing to express my concern regarding the high density housing project application for 3805 State Street in an already congested neighborhood. The rapid increase in construction of new housing in the area has started to have negative effects on our community, and I believe it is important to address these issues prior to the approval of the project before they escalate further.

The influx of new residents from high density housing developments in this area have already led to overcrowding in our neighborhood. The streets are already congested, parking is becoming scarce, and the overall quality of the neighborhood is starting to decline. Additionally, the increased demand for services and resources is putting a strain in our local infrastructure and amenities. As the number of housing developments continue to increase rapidly, I am concerned how our current infrastructure will meet the demands in this area. The increase of population will have a significant burden on our water, electricity, sewage systems that may lead to disruptions and shortages. This not only effects residents but also poses a risk to public health and safety. The surge in high density housing will also affect our emergency services. The higher population will result in an increase in emergency calls, will put a strain on fire, police and medical services. Due to the shortage of these services already, response times may be lengthened, and the ability of our emergency services to effectively address crises will be compromised.

Moreover, it is disheartening to see that developers seem to prioritize high-density housing developments solely for profit, without considering the long-term impact to our neighborhood. The relentless pursuit of maximizing profits at the expense of the community well-being is unacceptable. It is evident that developers and city are more focused on making as much money as they can, disregarding the negative consequences of these high-density developments. Do we really need to build 642 units on this small piece of land?

Furthermore, this high density housing development will also impact the character and charm of our neighborhood. The unique architecture in Santa Barbara that once defined our community may now be overshadowed by this large building that lacks character and aesthetic appeal. This rapid development will erode the sense of community and identity that Santa Barbara has worked hard to cultivate over the years.

I urge you to consider the long-term consequences of this development in our neighborhood and take steps to mitigate its negative effects that it will have. It is important to prioritize the well-being and livability of the neighborhoods and businesses surrounding this project. I believe that a balance between development and preservation is crucial to maintaining the vibrancy and sustainability in our neighborhood. Hopefully, there will be alternative solutions that will be beneficial.

I understand the need for more housing is a pressing issue, especially in California and more specifically in Santa Barbara where housing shortages are a significant concern. State mandates for increased in housing developments are meant to address this issue, but it is important that we do so in a thoughtful and sustainable manner that considers the well-being of community.

Thank you for taking the time to consider my concerns. Please keep me on the "interested party" list for further updates.
