Application Number: MST2004-00546  
Architect: Gil Garcia  
Owner: San Pascual Cottages, LLC

(Proposal to construct a seven unit condominium complex on a 15,341 square foot lot. Two existing single-family residences, a detached garage and shed currently located on site would be demolished.)

**(PROJECT REQUIRES COMPLIANCE WITH PLANNING COMMISSION RESOLUTION NO. 072-05.)**

(3:28)

Present: Peter Hunt, Architect; John Blankenship, Owner; Cheryl Jensen, Landscape Architect.

Public comment opened at 3:49 p.m.

Carolyn Rice, neighbor, opposed, expressed concern over changes to heights and roof type.

Rod Edwards, neighbor, opposed, expressed concern over changes in the new plans.

Public comment closed at 3:53 p.m.

Motion: Continued indefinitely to the Full Board with the following comments:  
1) The applicant and staff are to provide the record documents that were reviewed by the Planning Commission and City Council. 2) Study ways to lower the rear portion of the site to blend with the natural grade, as previously requested. There is concern that providing a 2% slope to the street has resulted in a 4.5 to 5 feet raised grade elevation at rear. 3) The Board looks for continued variety of detailing between the buildings as presented in the prior scheme, including: a) original chevron details on the parapet walls. b) similar chevron details on garage doors. c) continue the previous material palette. d) previous color variety. 4) Restudy or eliminate the "L" shaped parapet walls near the upper level recesses. Some Board members are concerned with the recessed areas within the buildings and would like the design to replicate the previous submittal. 5) Look for aesthetically pleasing solutions to camouflage the exposed utilities. 6) Provide consistency in architectural, civil, and landscaped plans, particularly with respect to layout and drainage functions. 7) Increase the number of canopy trees to match the previous submittal.

Action: Manson-Hing/LeCron, 7/0/0. Blakeley absent.

Motion: Continued indefinitely to the Full Board with the following comments:  
1) The applicant shall return with Alternative #2. The applicant has the option to:  
a) Embellish the original design to include upgrading the existing house to provide a better street presence and include a replacement Oak tree of the size described in the current presentation and include a Elm street tree; or, b) Provide an option that saves the existing Oak tree and relocates the two garage, preferably between the original unit and the rear building, which in the original design was in conflict with the tree. 2) The Board reserves judgment until the applicant returns with either or both options. Presently the Board cannot support either the original proposal or Alternative #1.

Public comment opened at 6:41 p.m., and as no one wished to speak, public comment closed at 6:41 p.m.

Motion: Continued indefinitely to the Staff Hearing Officer, and return to Full Board with the following comments: 1) The design is handsome and keeping with the Neighborhood and Hillside Design Guidelines. 2) The Board likes the breakup of the building components. 3) Provide more detailed drawings that include a roof plan and exterior elevations indicating rooflines beyond. 4) Study and refine the flat roof elements and cornice details to be cohesive with the overall design. 5) The floor plans and exterior elevations are to match, i.e. cantilevers, window locations. 6) There is concern with the proposed second floor deck above the laundry room. a) The deck is to be pulled in from the east elevation enough to allow for a valid looking tile roof. b) Provide photo documentation from the proposed deck elevation to address possible privacy concerns for the adjacent neighbor. 7) The Board understands the new walls in the front yard set back will be stone clad. 8) Provide resolution of the curved entry deck and the curved stairway intersection. 9) Staff and the Staff Hearing Officer shall determine whether modifications are required for the entry and elevated decks which both appear to be located in the interior yard set back. 10) Some Board members feel that further study is required for the east elevation chimney, either ground the mass or relocate the window. 11) The Board finds the requested modification for the open parking is a visual enhancement, as the parking will be masked by the existing stone wall.

(Proposal for a two-story addition and remodeling for an existing one-story single-family residence located in the Mission Area Special Design District. The proposal includes an 825 square foot first- and second-story addition, a second-story deck, interior and exterior remodeling, and a roof-mounted solar array. The project would result in a 3,156 square foot two-story dwelling with the existing detached garage, greenhouse, and accessory building to remain on the 15,947 square foot lot. Modifications are requested for exterior remodeling in the setbacks.)

**(COMMENTS ONLY; PROJECT REQUIRES ENVIRONMENTAL ASSESSMENT, NEIGHBORHOOD PRESERVATION ORDINANCE FINDINGS AND STAFF HEARING OFFICER APPROVAL FOR MODIFICATIONS.)**

(7:07)

Present: Steve Morando, Designer.

Motion: Continued indefinitely to the Full Board with the following comments: 1) The Board finds the proposed addition and new second floor area to be appropriate to the scale of the original house and lot size. 2) Provide integration of second story mass to nestle into the roof forms of the original structure, as depicted in previous conceptual sketches. 3) Provide simplification of the following architectural treatments to be more compatible with original style: a. Restudy the street presence of the second story balcony; b. Restudy the deck cantilever on the north elevation; c) Reconsider a simpler bay window that integrates into the second story roof, at the west elevation; d) Restudy the new entry to have a street presence and be more neighborhood friendly. The current proposal is understated and not in keeping with the original design of the structure. 4) There is concern with the shape and detailing of the proposed windows. a. Provide traditional window detailing. b. Mullions shall match the original style of the house. c. Provide traditional proportions, which would not include the shallow arch as presented on the west elevation or the narrow transom on the north elevation. 5) The Board likes the existing living room windows facing west on Pueblo Street. Consider keeping or replacing in kind. 6) The Board is supportive of lengthening the site wall, and development of the new entry because of opportunity for added privacy. 7) The Board understands that there will be additional work to the garage including: a. a trellis eyebrow above the garage doors; b. replacement of the existing garage doors with carriage style doors. 8) Study other roof locations for integration of the solar applications to: a. function better; b. be less visible from the street.
