(Proposal to construct a three story mixed use building consisting of six residential units totaling 8,588 square feet and six new commercial spaces totaling 4,615 square feet. The proposal includes demolition of the existing 7,343 square foot warehouse/office on the 11,880 square foot parcel, located in the Coastal Zone. Modifications would be required to provide fewer than the required number of parking spaces and less than the required open yard area.)

**(This item was continued from August 14, 2006.)**

**(COMMENTS ONLY; PROJECT REQUIRES ENVIRONMENTAL ASSESSMENT AND PLANNING COMMISSION APPROVAL FOR A COASTAL DEVELOPMENT PERMIT, DEVELOPMENT PLAN APPROVAL FINDINGS AND MODIFICATIONS.)**

(3:16)

Present: Steve Yates, CEO, Conceptual Motion; Gerlurd Meyer, Architect, Conceptual Motion; Steve Gelson, DBN Yanonali, LLC, Owner. Peter Lawson, Case Planner, City of Santa Barbara.

Public comment opened at 3:41 p.m.

Nils Hammerbeck, in favor.

A letter from Joseph Garred expressing traffic concerns was read into the record.

A letter from Mark Kirkhart, stating parking, outdoor space, and privacy concerns was read into the record.

Public comment closed at 3:48 p.m.

**Summary**

Motion: Continued indefinitely to the Full Board with the following comments:

1) The Board finds the site planning approach of keeping the building mass along the Yanonali frontage to be consistent with previous building patterns of large industrial type structures on that street. 2) The applicant is to prepare a 3-dimensional massing study, nestling the proposal into the existing neighborhood context. 4) The Board would like the architecture to be more industrial in nature and less of an architectural statement, allowing flexibility for the occupants to add their own style. 5) Most of the Board supports the 90 degree parking on Gray Avenue, with the following changes: a. the applicant is to study ways to continue the aesthetic feel of the pedestrian paseo at the corner along the entire length of Gray Avenue; b. incorporate landscaping such that the 90° parking at the front is not precluded. 6) Although the open space can not be fully met at the ground level, there are sufficient private outdoor use areas throughout the project, such as the atrium and upper level decks. 7) Some Board members are

concerned about the lack of apparent grounding of the upper level concrete portion of the building, therefore: a. study ways to ground the structure at certain areas, and b. restudy the human aspect of the proposed entry gate of the central atrium. 8) Provide more human scale, especially at street level. The proposed 22 feet floor-to-floor height appears tall, and needs further articulation to have less retail appearance. 9) The applicant shall seek opportunities at street frontages to include landscaping outside the central of atrium. 10) The Board prefers the site plan diagram as presented, as opposed to the option containing parallel parking. 11) The Board is concerned with the human scale of many elements. Restudy the ground plane façade, and some of the larger upper level windows, especially on the north elevation.

Action: LeCron/Sherry, 6/0/0. Manson-Hing and Wienke absent.

**(COMMENTS ONLY; PROJECT REQUIRES ENVIRONMENTAL ASSESSMENT AND NEIGHBORHOOD PRESERVATION ORDINANCE FINDINGS AND A PLANNING COMMISSION SUBSTANTIAL CONFORMANCE DETERMINATION.)**

(4:41)

Present: James Zimmerman, Architect; Albert Fink, Owner; Mark Shulback, Contractor;

Public comment opened at 4:55 p.m.,

Bruce Bartlett, neighbor, concerned that although the project has improved some improvements are still needed relating to retaining wall heights, grading and landscape plan integration, and the second story deck.

Chris Morgan, opposed, expressed concern with hillside instability.

Jill Shalhoob, opposed, expressed concern with grading, and length of the proposed structure.

Public comment closed at 5:07 p.m.

Motion: Continued indefinitely to the Full Board with the following comments:

1) The Board appreciates the reduction of the overall mass and design to present a smaller project. 2) The Board appreciates the traditional Spanish architecture. 3) The applicant shall provide a landscape plan. The Board appreciates the joint design effort with neighbors to incorporate screening landscaping. 4) Conceal the pool equipment, preferably in the basement area. 5) Provide a Certified Arborist report for the existing Oak tree. 6) The Board would like the garage and accessory structure further reduced to a one story element, or simply reduced in size and pushed further back into the building envelope. 7) Study the open rail of the second floor to possibly be more traditional with Spanish architecture, such as an arched colonnade with a more solid railing. 8) Push back the second floor trellis, and eliminate as much as possible. 9) Relocate the outdoor living area further back on the hill and incorporate into the jacuzzi/pool area. 10) Provide site sections showing accurate depiction of the grading, and four site sections through the adjacent properties, and an outline profile of the downhill residences.
