An opposition letter from Paula Westbury was acknowledged.

Public comment closed at 4:16 p.m.

Mr. Limón clarified that the Board cannot require a project element, such as a turnout, that is not being proposed or the Board must present strong reasons why the element *must* be included in the project.

Straw vote: How many of the Board like to see a plan for parking pullout researched to be proposed for Site#2 of the project? 5/3 (Blakely, Gross, and Zink opposed).

Motion: Continued indefinitely to Full Board with the following comments:

ARCHITECTURE:

- 1) Restudy with turnout at Site #2 due to concerns for:
 - a) the historical existing condition;
 - b) safe turnout for parallel vehicular parking on the two lane road;
 - c) prohibited sidewalk parking; and
 - d) efforts to enhance the pedestrian experience for convenient safe public viewing.
- 2) The solution to the lighting fixture is deemed appropriate; however the lighting location has not been finalized.

LANDSCAPING:

- 1) Restudy the concrete turnout and appropriate planting types (typology).
- 2) Group plants to provide defensible space to prevent hidden or illegal activities.
- 3) Observe existing plants in area and try to utilize common (drought tolerant) plants in new landscape plan.
- 4) Choose plants that would not grow too tall to block public views.
- 5) Consider use of natural flat boulders/rocks as optional seating on Site #2.
- 6) Board understands that proposal has no retention (wall) at Site #2.

Action: Sherry/Gross, 8/0/0. Motion carried.

Refinement of the parking structure and front entry, which is too tight to the sidewalk, is requested.

Public comment closed at 7:44 p.m.

Motion: Continued indefinitely to return to Full Board with the following comments:

ARCHITECTURE:

- 1) The Board finds a desire to have a more compatible development with the neighborhood. Some Board members find that the actual style of the building and roof would be more appropriate. Applicant to restudy the size, bulk, scale and materiality.
- 2) Applicant to study size, bulk, and scale of the rear portion of the project. The Board feels that the walls on the property line are not helping in this relationship, in that in a transitional neighborhood, the walls make it look too large; whereas a lot of the neighborhood has setbacks on the property line allowing for landscaping, fencing, trees, etc. Applicant to have more of the structure relocated off the property line by at least 3 feet.
- 3) Board looks for continual design elements to break up the boxiness in the rear area like some of the elements used in the front portion of the building such as columns, corbels, beams that help break down the scale and have relationship to the neighborhood porches.

- 4) Direction is better, and finds the two story mass in the front and the setback on either side to the neighborhood for landscaping as acceptable.
- 5) Show how fireplace chimney works with the building.
- 6) The Board finds that Items #2 and #3 of the Compatibility Guidelines are still lacking.
- 7) Some Board members find that Items #4 of the Compatibility Guidelines is still lacking neighborhood compatibility.

LANDSCAPING:

- 1) Roof planters and secondary roof forms are a concern, not only on how they will be used but how they will be maintained. Applicant to find solutions.
- 2) Provide adjacent and back building scaled elevations
- 3) Arborist to revise the report to reflect the life span of the variety of trees; specifically the palm tree.

Action: Mosel/Blakely, 6/0/0. Motion carried. (Gross absent, Aurell stepped down).

Present: Jeanette Candau, Applicant/Redevelopment Specialist.

Motion: Continued two weeks to Full Board with the comments:

- 1) Study alignment of sidewalk at Castillo Street, and add more evergreen shrubs at the transformer for additional screening.
- 2) Study adding canopy trees at the new picnic area.
- 3) Concrete pedestrian pathway design should be studied.
- 4) Show grades to the slope conditions and traffic patterns to verify safe routes.
- 5) Study integration of the new flag poles in relation to the palm trees along Cabrillo Boulevard as the flags poles appear inappropriate for the proposed location.
- 6) Flag poles may be inappropriate as there is no real connection to the harbor, but if pedestrian direction is the purpose of utilizing the flags, applicant is to present an alternative solution to the use of the flags.
