(The proposal is a redesign of a project previously approved by the Planning Commission. The proposed project consists of 48 residential condominium units in four, two- and three-story buildings, on a 1.8-acre vacant lot. The size of the residential units would vary, ranging between 1,100 and 1,700 square feet. Each of the four buildings would contain twelve residential units and would have individual courtyards. All units would have a two-car garage, with 50% in a side by side configuration and 50% in a tandem configuration. Six guest parking spaces would be provided, resulting in a total of 102 on-site parking spaces. Vehicle access would be provided from East Montecito Street, with emergency access only from Calle Cesar Chavez. Forty of the 48 units would be sold as below-market rate units. A 14-foot wide shared access easement is provided along the western perimeter of the project site. The prior approvals consisted of a Tentative Subdivision Map, a Modification to provide less than the required amount of guest parking and City Council approval of a Specific Plan (SP-10). The redesigned project requires a Substantial Conformance Determination at the Planning Commission.)
