   Applicant:  Tom Smith Architect  

   (Proposal for alterations to an existing low-income multifamily housing development on a 56,000 square foot parcel. The proposal includes permitting an as-built trash enclosure and slightly enlarging it, adding 476 linear feet of new 7’-0” tall black vinyl chain link fence at the north and east property lines, and 494 linear feet of new wood fence at the interior of the site. Landscaping improvements will include the removal of eight existing trees ranging in height from 50 feet to 70 feet. A total of 44 parking spaces are required, with 55 proposed. This project addresses violations identified in enforcement case ENF2014-00633 and requires Staff Hearing Officer approval for encroaching into the required rear setback. An Administrative Fence Height Exception is required for an over-height fence.)

   (Comments only; requires Environmental Assessment, Staff Hearing Officer approval, and a Fence Height Exception.)

   Present:  Tom Smith, Architect, Erin Carroll, Landscape Architect, and Dennis Marable, Representative of the Turner Foundation.
Indefinite continuance to the Staff Hearing Officer with the following comments:
1. A maximum of three pine trees may be removed. Thin remaining trees to allow more light into the courtyard.
2. Revise parking lot to include finger planters in compliance with parking lot design standards, and to maximize landscaping in the parking lot to the extent possible.
3. A fence height Exception finding was made that the rear fence height is compatible with adjacent parcels.
4. The zoning modification for the trash enclosure to encroach into the rear yard setback is supportable because there is no other location on the parcel for the trash enclosure to be located.
5. There shall be three vine pockets added along the eastern property line fence and vines shall be planted along the north and west property line fences.
