Project Description: This structure is on the City's List of Potential Historic Resources and is eligible for City Landmark status: "St. Anthony's Seminary." The original seismic and safety upgrade project approved under application MST2005-00241 has been revised to include the following changes: Proposal for the demolition of 1,803 s.f. of floor area and stair at the south elevation (courtyard side) of the Infirmary Wing to create an accessible outdoor classroom with tiered seating and to extend the existing arcade roofline to cover an accessible path. The project will also include new accessible restrooms on the lower level, a technical mezzanine on the upper level, and the integration of handicapped access at the main level. Adjustments will be made at grade to the adjoining courtyard and walkways to meet accessibility, utility and life safety standards. Portions of the roof above the south courtyard facade of the Infirmary Wing will be removed with the remaining to be upgraded to meet structural and seismic requirements, with the overall roof height to be lowered by 4.5 feet. An existing brick chimney and roof penetrations are also proposed to be removed. A partial demolition of the south-facing courtyard will allow the restoration of five original windows on the Main Building. An existing opening between the Main Wing and Infirmary Wing will be infilled with a new window to match the existing on this 12.3 acre parcel.

Public comments will be allowed during review of the project by the HLC.
