Project Description: Proposal for the construction of a new two-story Airline Terminal facility measuring approximately 66,045 square feet. The new facility would be located south of the existing 20,000 square foot main Terminal building, which would remain in operation during construction. The original 5,000 SF 1942 Terminal building would be rehabilitated, with additions constructed in 1967 and 1976 to be removed. The 1942 building would be relocated and incorporated as part of the new facility. The existing rental car/security operations building, airline trailers and baggage claim pavilions, which are currently part of the existing Terminal complex, would also be removed and the uses would be incorporated into the new terminal. The existing short-term parking lot would be reconfigured and the loop road would be revised to incorporate an alternative transportation lane for buses, taxis, and shuttles. The project received Planning Commission approval on September 20, 2007 (Resolution No. 037-07). The project received Final Approval from the ABR on May 19, 2008.

(Second review of a Review After Final of the following changes to the approved plans to relocate and rehabilitate the original 1942 terminal building: replace all exterior stucco, replace the decorative stair riser tile, omit installation of one new window on the east elevation, and install frosted glazing in the Ladies Restroom windows. This was last reviewed on April 11, 2012.)
