### **DISCUSSION ITEM/TRAINING:**

#### **1. AVERAGE UNIT-SIZE DENSITY INCENTIVE PROGRAM**

(1:45) Presenter: Bettie Weiss, City Planner; and Jaime Limón, Design Review Supervisor (Second of a two-part training on the relationship between Design Review and the Average Unit-Size Density Incentive program. This training will focus on the various new development standards of the AUD program and potential changes to refer some AUD projects to the Planning Commission for review and comments.)

Actual time: 1:40 p.m.

Present: Bettie Weiss, City Planner  
Jaime Limón, Design Review Supervisor

Staff comments: Mr. Limón and Ms. Weiss gave a Staff PowerPoint presentation. Ms. Weiss explained a new review process for projects over 45 feet in height and the types of average unit density (AUD) projects that will be reviewed solely by the HLC and those that will be reviewed in conjunction with the Planning Commission. The proposed review process changes were discussed.

There will be an AUD discussion item at the Planning Commission on December 12, 2013, where they will be asked to make a recommendation to City Council.

Public comment opened at 2:14 p.m.

Kellam de Forest, local resident, expressed concern on building heights and asked if an HLC decision on an AUD project's height is appealable to the Planning Commission. He also asked if there is currently a height limit in El Pueblo Viejo Landmark District (EPV).

Public comment closed at 2:16 p.m.

Ms. Weiss responded to public comment by saying that a 60-foot height limit is still allowed in commercial zones, even within the EPV. The appeal process has not changed: HLC and Planning Commission decisions are appealed to the City Council.

Ms. Weiss responded to Commission questions. Under the Adaptive Management Program, the effectiveness of the AUD Program will be reported on annually during the Joint City Council/Planning Commission meeting.

**The Commission made the following comments:**

1. The proposed design review changes for AUD Program projects are sensible provided there is adequate staff assistance. It seems staff's involvement will increase.
2. It will be even more critical for the HLC to make clear and concise comments to provide guidance to the applicant as to whether a comment is a suggestion or a requirement.
3. The HLC's comments shall reflect in which specific way the project meets the compatibility analysis criteria.
4. The Commission agrees with the recommended design review process changes as outlined in the Staff presentation.

Application Number: MST2013-00425  
Owner: Edward Yates  
Architect: Jonathan Villegas

(Proposal for alterations to a one-story five-unit apartment complex. The proposal would relocate an existing front site retaining wall to the front property line, re-grade the driveway entries, replace a wood deck and stairs at the rear of the existing single-family residential unit, replace an existing two-car carport with a two-car garage, and replace an existing three-car carport with a new three-car garage. The existing carports and proposed garages are non-conforming to the interior and rear setbacks. This project will address the violations identified in enforcement case ENF2013-00676 including the as-built installation of vinyl windows. Staff Hearing Officer review is requested for zoning modifications.)

**(Review of Phase I Archaeological Resources Report prepared by Conejo Archaeological Consultants.)**

Actual time: 2:36 p.m.

Present: Dan Lindsay, Owner Representative  
Jonathan Villegas, Architect

Staff comment: Susan Gantz, Planning Technician, state that Dr. Glassow reviewed the report and concluded that the archaeological investigation supports the report's conclusions and recommendations that it is estimated that the potential for impacts to prehistoric or historic cultural resources is low; therefore no further archaeological investigation is warranted. However, the standard condition regarding the discovery of unanticipated archaeological resources applies to the project and shall be reproduced on the plans prior to issuance of building permit.

**Motion:** To accept the report as presented.

Action: Orías/Drury, 6/0/0. (Boucher/Shallanberger/Suding absent.) Motion carried.

Public comment opened at 3:19 p.m.

Kellam de Forest, local resident, commended the applicant for the rehabilitation of the historic structure. He questioned whether the entire structure qualifies for Structure of Merit status instead of only the front façade. He also asked when the addition was constructed and whether the applicant is proposing to use a portion of it.

Public comment closed at 3:21 p.m.

- Motion:**        **Continued indefinitely to the Planning Commission with positive comments:**
1. The applicant was commended for continuing the life of the building.
  2. The project is consistent with the original design esthetic and with the Secretary of the Interior's Standards for Reconstruction of Historic Properties.
  3. Capture the historic detailing of the column capitals to avoid a contemporary look. It is one of Edwards and Plunkett's signature designs.
  4. **The Commission has reviewed the proposed project and Compatibility Analysis Criteria have been generally met for this project (per SBMC 22.22.145.B. and 22.68.045.B.) as follows:**
    - a) **Compliance with City Charter and Municipal Code; General Consistency with Design Guidelines:** The proposed development project's design complies with all City Regulations and is consistent with El Pueblo Viejo Landmark District Guidelines.
    - b) **Compatible with Architectural Character of City and Neighborhood.** The proposed design of the proposed development is compatible with the distinctive architectural character of Santa Barbara and of the particular Neighborhood surrounding the project.
    - c) **Appropriate size, mass, bulk, height, and scale.** The size, mass, bulk, height, and scale of the proposed development are appropriate for its neighborhood and consistent with the historic appearance of the house.
    - d) **Sensitive to Adjacent Landmarks and Historic Resources.** The design of the proposed development is appropriately sensitive to adjacent City Landmark/designated historic resources, historic sites or natural features and mitigation measures are adequate to reduce adverse impacts. The design considers the Landmark Oak trees that are a character-defining feature and should be preserved.
    - e) **Public views of the Ocean and Mountains.** The design of the proposed project responds appropriately to established private views. There are no ocean views, and the design does not impede mountain views.
    - f) **Appropriate Amount of Open Space and Landscaping.** The design of the proposed development includes an appropriate amount of project open space and landscaping.
    - g) Carry forward the HLC comments to the Planning Commission with the recommendation that the project be accepted as submitted, including the proposed setback, as it is not greater than the existing footprint, and the solar access relief, in that it is already located in a shady neighborhood.
