PLEASE BE ADVISED

The following advisories are generally also contained in the City's Historic Landmarks Commission General Design Guidelines and Meeting Procedures ([HLC Guidelines](#)). The specific HLC Guideline number is listed after each advisory. Applicants are encouraged to review the full version of the HLC Guidelines.

- The approximate time the project will be reviewed is listed to the left of each item. It is suggested that applicants arrive 15 minutes early. The agenda schedule is subject to change as cancellations occur. Staff will notify applicants of time changes. (3.2.2)
- The applicant's presence is required. If an applicant is not present, the item will be postponed indefinitely. If an applicant cancels or postpones an item without providing advance notice, the item will be postponed indefinitely and will not be placed on the following HLC agenda. (3.2.4)
- Substitution of plans is not allowed. If plans differing from the submittal sets are brought to the meeting, motions for Project Design Approval or Final Approval will be contingent upon staff review for code compliance. (3.2.4)
- Concept review comments are generally valid for one year. Per SMBC 22.22.180, a Project Design Approval is valid for three years from the date of the approval unless a time extension has been granted or a building permit has been issued. Projects with a valid land use approval will also automatically extend the Project Design Approval expiration date. (3.2.9) An HLC approval does not constitute a Zoning clearance or a Building and Safety Permit.
- CEQA Guidelines §15183 Exemptions (Projects Consistent with General Plan). Under this California Environmental Quality Act (CEQA) Guidelines section, projects with new development (new nonresidential square footage or new residential units) qualify for an exemption from further environmental review documents if (1) they are consistent with the General Plan development density evaluated in the 2011 General Plan Program Environmental Impact Report, and (2) any potentially significant project-specific impacts are addressed through existing development standards. Section 15183 exemptions are determined by staff based on a preliminary environmental review process. A decision-maker CEQA finding is required for a Section 15183 exemption. City Council General Plan environmental findings remain applicable for the project.

(This is a revised project description. Proposal for a new two and three-story residential condominium project comprised of seven units, with private roof decks for four units. The site is currently developed with a three-story 13,183 square foot commercial building and 40 parking spaces. The project includes a 3-stack puzzle lift containing 17 spaces to serve the existing commercial building, another puzzle lift system containing 11 spaces, and seven surface parking spaces. Planning Commission review is required for a Tentative Subdivision Map.)

(A. Review of a Phase I Historic Context Study and Phase 1 Historic Structures/Sites Report, prepared by Post/Hazeltine Associates. The report identified several significant historic themes for the neighborhood and project property, including the history of the Presidio during the Spanish and Mexican eras. The themes most closely associated with the project parcel are the Presidio period (1782 to 1848) and the history and occupancy of Pueblo Viejo by the Hispanic community between the 1840s and early 1960s. The fragment of sandstone retaining wall at 222 East Canon Perdido does not retain enough integrity to be considered a potentially significant historic resource at the local, state, or national levels. Although, a substantially intact streetscape is not present on the 200 block of East Canon Perdido due to extensive re-development in the post-World War II period, the report recommends a Phase II Historic Structures/Sites Report given the proximity to the Presidio and other listed and designated historic resources.)

(B. Concept Review. This is a revised project. No final appealable decision will be made at this hearing. Project requires Planning Commission Review for a Tentative Subdivision Map. Project was last reviewed on October 31, 2018.)

(Proposal for the replacement of the De La Vina Bridge Street Bridge over Mission Creek. (Review of a Historical Resources Evaluation Report, prepared by Annie McCausland and M. Colleen Hamilton, Applied Earthworks, Inc. The report concluded that none of the properties within the project's Area of Potential Effects (APE) were found eligible for inclusion in the National Register of Historic Places (NRHP). One property at 2720 De La Vina Street appears eligible for listing on a local register and, therefore, is considered a historical resource for the purposes of the California Environmental Quality Act (CEQA). None of the other properties are considered historical resources for the purposes of CEQA. The project will have a Less Than Significant (Class III) impact on the Structure of Merit.)
