EROSION CONTROL NOTES:

1. Erosion control measures for wind, water, material stockpiling, and tracking shall be implemented for all projects and include:
   - Protection of all disturbed areas, protection of access, and perimeter containment measures.
   - Permanent erosion control shall be placed and established with 90% coverage on all disturbed surfaces.

2. Project specific erosion control measures/ devices shall be available, installed, and applied between October 15 and April 15, or to another time when the probability exceeds 25%.

3. Wet weather erosion control measures/devices shall be available, installed, and applied when the probability exceeds 25%.

4. Permanent erosion control shall be placed and established with 90% coverage prior to the commencement of grading and site disturbance activities on all projects.

5. The contractor, developer, and engineer of work shall be responsible to review the project site prior to beginning work to identify erosion potential areas.

6. In the event of failure and/or lack of performance by the owner and/or contractor to correct erosion problems, the developer and/or his representative shall be responsible for cleanup and all related costs.

7. In the event of failure, the developer and/or his representative shall be responsible for replacing all disturbed areas.

8. The air pollution control district (APCD) may have additional project specific erosion control requirements.

9. The contractor, developer, and engineer of work shall be responsible for maintaining self-regulation of these requirements.

BMP SELECTION & LEGEND:

BMPs specified on this plan reference the November 2008 edition of the "California Stormwater Handbook." It is the responsibility of the contractor to obtain BMP details available at www.CASQA.org.
