

**April 2007**

*Date:* 3/20/07

*Requested by:* Ruth Shobe

*Address:* 938 W. Mission St.

*Location of Tree:* 938 W. Mission St.

**Tree Species:** *Brachychiton acerifolius*      **Common Name:** AUSTRALIAN FLAME TREE

*Requested Reason for Removal:* It's starting to interfere with a Live Oak tree growing near by. The Oak has a significantly larger canopy. Also the Flame tree is not part of a series. There are two on my corner, mine and one that has been damaged by car wrecks.

*Species recommended by the Approved Plan:*

*Advisory Committee Recommendation:*      *Approve Removal:*       *Deny Removal:*

*Staff Recommendation:*      *Approve Removal:*       *Deny Removal:*

*Date Posted:* 4/17/07

*Comments:* The Committee and staff determined that there is no justification for removing the City tree at this location and that the Oak tree on private property could be pruned in such a way that canopy conflicts could be avoided. The Committee recommended that the applicant prune the Oak tree so that it has a more vertical orientation which will enable both trees to happily co-exist.
