

April 2007

Date: 3/20/07

Requested by: Lyda Clough

Address: 1741 Prospect Ave.

Location of Tree: 330 E. Figueroa St.

Tree Species: *Ficus microcarpa 'Nitida'* **Common Name:** INDIAN LAUREL FIG

Requested Reason for Removal: Roots in sewer line, continual dropping berries on street and stairway, patio causing hazardous conditions for our property as well as all pedestrians - it is a busy passage way for pedestrians and public access.

Species recommended by the Approved Plan:

Advisory Committee Recommendation: *Approve Removal:* *Deny Removal:*

Staff Recommendation: *Approve Removal:* *Deny Removal:*

Date Posted: 4/17/07

Comments: The Committee and staff recognized this tree as an exceptionally good example of *Ficus microcarpa* growing in a parkway strip. Principles of good urban forest management dictate that this tree should be pruned by the City of Santa Barbara to reduce its canopy coverage over the home and therefore reduce the volume of litter that the tree currently produces.
