PLANNING COMMISSION STAFF REPORT

REPORT DATE: January 12, 2006
AGENDA DATE: January 18, 2006
PROJECT ADDRESS: 606 Calle Granada (MST2006-00430)

TO: Planning Commission
FROM: Planning Division, (805) 564-5470
 Jan Hubbell, AICP, Senior Planner *ms*
 Danny Kato, Zoning & Enforcement Supervisor *DJK*

I. PROJECT DESCRIPTION

On October 11, 2006, the Staff Hearing Officer (SHO) approved a Modification for front setback encroachments for a house, but denied an eight-foot tall wall proposed at the Calle Granada property line. This is an appeal of the SHO's denial of the wall. During the interim period, the wall has been redesigned to be farther from the street. The property's grade is about three feet lower than the street grade; therefore, the wall is five feet tall on the street side. The purpose of the wall is to provide separation from an existing swimming pool, so a five foot tall wall is required by the Building Code.

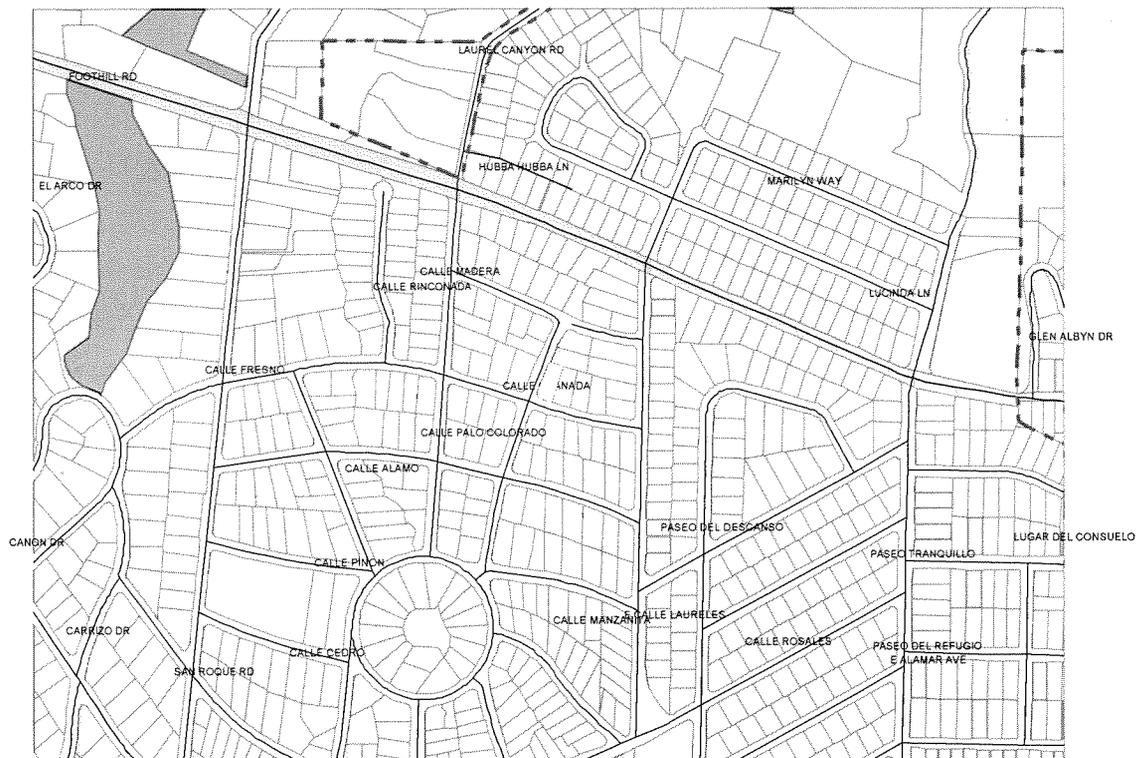

II. REQUIRED APPLICATIONS

The discretionary application required for this project is a Modification to allow a wall greater than 3.5 feet in height within 10 feet of a front lot line. (SBMC §28.87.170.2.)

III. RECOMMENDATION

Staff recommends that the Planning Commission approve the revised project, making the findings outlined in Section VII of this report, and subject to the condition that all vegetation in the public right-of-way be reduced to a maximum of 8", and that all vegetation within 10 feet of the front property line and within 10 of the driveway for a distance of 20 feet from the front lot line be reduced to 3.5 feet in height.

APPLICATION DEEMED COMPLETE: December 26, 2006
DATE ACTION REQUIRED: June 26, 2007

IV. SITE INFORMATION AND PROJECT STATISTICS

A. SITE INFORMATION

Applicant:	Wayne LaBrie	Property Owner:	Matt and Wendy LaBrie
Parcel Number:	053-083-012	Lot Area:	8,691 s.f.
General Plan:	3 Units per Acre	Zoning:	E-3/SD-2
Existing Use:	Residential	Topography:	7.5%
Adjacent Land Uses:			
North - Residential		East - Residential	
South - Residential		West - Residential	

B. PROJECT STATISTICS

	Existing	Proposed
Living Area	1,659 s.f.	3,313 s.f.
Garage	370 s.f.	515 s.f.
Accessory Space	0 s.f.	0 s.f.

V. ZONING ORDINANCE CONSISTENCY

Standard	Requirement/ Allowance	Existing	Proposed
Setbacks			
-Front	20 feet	14-17 feet	14-17 feet
-Interior	6 feet	6 feet	6 feet
-Rear	6 feet	6 feet	6 feet
Building Height	30 feet	~15 feet	28'2"
Parking	2 covered	2 covered	2 covered
Lot Area Required for Each Unit (Variable Density)	N/A	N/A	N/A
Open Yard	1,250 s.f.	1,250 s.f.	1,250 s.f.
10% Open Space	N/A	N/A	N/A
Private Outdoor Living Space	N/A	N/A	N/A

The project already received Modification approval of front setback encroachments from the Staff Hearing Officer; therefore, the project meets the requirements of the E-3/SD-3 Zone, with the exception of the proposed wall heights within 10 feet of the front lot line

VI. ISSUES

A. DESIGN REVIEW

This project was reviewed by the Architectural Board of Review (ABR) on August 21, 2006 (meeting minutes are attached as Exhibit C of the SHO Staff Report). The ABR continued the project to the Staff Hearing Officer with no comments as this proposal consists of a reinstatement of an approved project from 2001 that subsequently expired. The previous comments from the ABR in 2001 (also included in Exhibit C of the SHO Staff Report) show that the ABR was in support of the porch and fence modifications. The ABR supported the fence modification due to the location of existing vegetation in the City right-of-way that would screen the fence, and requested that any damaged juniper plants were to be replaced with mature landscaping immediately.

Because the junipers are in the public right-of-way, they must be eliminated, as the Santa Barbara Municipal Code prohibits obstructions more than eight inches high in the right-of-way.

B. MODIFICATION

The proposal heard by the SHO was previously approved by the Planning Division in November 2001 (see Exhibit D of the SHO Staff Report) and the building permit subsequently expired. The proposal that was heard by the SHO in October 2006 was identical to the previous approved project with the exception of an additional request to increase the roof pitch of the existing non-conforming portion of the residence located in the setback. The project site is constrained by two front yards and an existing building that encroaches approximately three

to six feet into the 20 foot required front yard setback along Calle Granada. The modifications for the new porch and increased roof pitch in the front yard setback were approved by the SHO on October 11, 2006

The SHO did not re-approve a proposed eight foot tall wall within one foot of the front lot line (0" at its closest point, and 1'0" at it's farthest point) for two main reasons: 1) it seemed too close to the property line, in light of the fact that this portion of Calle Granada is on the Public Works Department's Sidewalk Infill Program. Although no sidewalk currently exists, there is 12 feet of right-of-way between the curb face and the property line, and sidewalks will be built there at some point in the future; 2) the ABR's support of the wall seemed to be largely based on the assumption that the existing junipers would remain. Since the junipers must be removed, they would not screen the new wall, and as proposed, there wasn't enough room to plant screening vegetation on the applicant's property. The SHO approved a Modification to allow the wall to be built five feet from the property line. The approval of a five foot encroachment did not meet the requirements of the applicant, who appealed the decision, and redesigned the wall to be farther from the property line (about 8" at its closest point, and 1'4" at its farthest point).

The property is on a corner, so there is no private back yard. In situations such as these, the City has approved walls taller than 3.5 feet at the property line, in order to give the property a private open yard area. The redesigned wall leaves enough room for plantings that would screen the wall. Planning and Transportation Staff reviewed the redesigned wall, and support the Modification.

VII. FINDINGS

The Planning Commission finds that the Modification is necessary to secure an appropriate improvement, in that it provides a private recreational area for the parcel, and provides the required fence height around the swimming pool, and that it is consistent with the purpose and intent of the Zoning Ordinance, in that the wall is set back far enough to allow plantings that would screen the wall from the street.

RE: MST 2006-00430, 606 Calle Granada, APN: 053-083-012, Zoning: E3/SD2

Members of the Commission,

At a meeting on October 11, 2006, the Staff Hearing Officer denied our request for a modification to build a 5-foot pool safety fence on top of a 3-foot retaining wall on one of the front property lines at the above referenced property. We are appealing that decision. In addition, after consultation with planning and transportation staff, we are requesting approval of an alternate design that addresses staff's concerns.

The request heard on October 11 was to renew the modifications that were granted for this same project on November 29, 2001. Due to delays encountered after construction was started, the building permit covering this work lapsed. The requested modifications were identical to those previously approved to accommodate an 8 foot fence on the front property line consisting of a 5-foot pool safety fence facing the street (Calle Granada) and a 3 foot retaining wall below the fence facing inward toward the property and existing swimming pool.

This appeal is requested due to:

1. severe site constraints on the useable yard area
2. the need for adequate supervision area adjacent to the pool for safety
3. the need for privacy into the "back" yard area
4. the minimal impact of the modification on the neighborhood
5. the maintenance of sufficient space for future sidewalk development and landscaping.

The subject property is 8419 sq.ft. ranging in depth from 55-62 feet. The property slopes approximately 7 ft from north to south and approximately 6 ft. from east to west. Currently there is an existing 1260 sq.ft. house, a 622 sq.ft. detached garage, and 550 sq.ft. pool on the property. The lot is a corner lot with double front yard set backs into which the existing house encroaches on the westerly side 3 to 6 ft. with the existing entry porch extending another 3 ft. into the front yard. The existing swimming pool encroaches into the required front yard 3 to 4 feet, and the

EXHIBIT B

existing pool fence and low retaining wall were located in the front yard a distance of 8.5 to 9.5 feet from the front property line. All the improvements had building permits according to the Building Department files including the pool and fence. This proposal is to reposition and replace the existing fence with a new 5-ft. pool enclosure fence atop a new retaining wall. This is part of an overall project which includes removal of the detached garage; remodel of the existing residence including replacing the existing entry porch; a 1386 sq.ft. addition to the residence; a new 515 sq. ft. attached garage; a 486 sq. ft. basement; restructuring the roof and re-roofing the existing residence; and landscaping and pool area improvements. As indicated above, modifications were previously approved and building permits covering this work were issued. Construction was started and the existing pool fence was removed. A new fence was constructed on the northerly property line and a temporary fence constructed on the west side to maintain privacy and pool safety and to provide working room for construction of the new fence and retaining wall. The temporary portion will be removed upon completion of the permanent fence.

Basic design decisions related to outdoor areas and the major remodel/additions to the residence were made and a substantial amount of construction work was completed based upon the previous approved modifications. While the amount of completed work directly associated with this modification is significant to us; the work to date on the residence has advanced to the point where any redesign and reconstruction will be a severe financial hardship. The proposed alternate design for the fence will require some rework of footing excavations and some loss of useable yard area but provides increased landscape screening area and a stepped layout to enhance the pedestrian experience should sidewalks ever be constructed.

The double front yard set backs, the 5-ft. easement on the north, and a recent lot line adjustment to the east to accommodate the encroachment of the adjacent residence, all work to severely limit the useable yard and buildable area. Approximately 54% of the property is consumed by required yards leaving a buildable area averaging 34 feet wide by 117 feet long with the long dimension parallel to Calle Granada. By contrast, the adjacent 9500 sq. ft. property only loses 34% to required yards. The existing 32-foot long swimming pool is located across the narrowest end of the property, only 8 feet from the east property line and only 6-feet from the utility easement on the north.

The existing 6 1/2 ft. fence/retaining wall, which was located in the front yard, 8 1/2 to 9 1/2 ft. from the property line. This severely limited the space adjacent to the west end of the swimming pool. This 6 1/2 ft. strip was inadequate room for patio furniture and seating space for supervising adults. This is very important since this area is adjacent to the shallow end of the pool and most heavily used by small children and their parents. The requested modification would allow us a relatively small 14 1/2 ft. wide, 256 sq. ft. area adjacent to the pool. The Staff Hearing Officer decision only allows us a 193 sq. ft. area. This 10-foot wide area does not provide sufficient space to safely place patio furniture and maintain adequate circulation area next to the pool. This is the only place where space is available for lounging and supervision of the pool. Due to the natural topography, the area adjacent to the pool on the south side is 18 inches

below the pool deck level and would not afford the unobstructed view of the pool necessary for supervision.

Privacy is also an issue. The street level ranges from 3 to 4 feet above the pool deck level and a conforming fence will not provide privacy from the street for the pool and sun bathing area. In addition, the residences across the street to the west are substantially elevated above the street, which further exacerbates the privacy problem and at the same time serves to mitigate the increased fence height from the neighbor's perspective. This is the only "back" yard area on the property, and privacy is essential around the pool and sunbathing area.

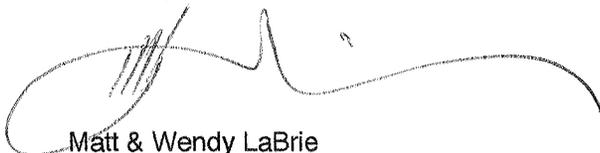

The location of the fence relative to the intersection of Calle Fresno and Calle Granada is approximately 100 feet and should have no effect on vehicular or pedestrian visibility. To the north, the driveway at 612 Calle Granada is 47 feet north of the fence corner, posing no visibility issues for vehicles entering or exiting this adjacent residence. The distance from the fence to the driveway entrance for the subject property will also be in conformity with ordinance requirements. The new five-foot enclosure will be in conformity with current safety standards. The increase in useable yard area adjacent to the West End of the pool will greatly improve the usability and safety of the pool. Considering the impact on the neighborhood and what is seen from the street, the approval of this modification would allow a fence that is only 18 inches higher than what the majority of Santa Barbara homeowner's enjoy in their front yard. Most "back" yard areas have fences substantially taller which provide privacy.

We recognize that the City may wish to install sidewalks in the area at some point in the future even though the natural topography to the north and west makes this extremely difficult and Calle Granada is not a major through street. The proposed fence will be approximately 13 feet from the face of curb at the street. Generally the City is requiring a curb, parkway, and sidewalk that are placed within the first 10 feet from the face of the curb. This would still leave over 2 feet in front of the fence for landscape screening. A portion of this landscape area is outside the street right-of-way and is sufficient to provide planting for vines to screen the fence in the event sidewalks are ever constructed. The closest sidewalks to our neighborhood are on Calle Laureles where they abut the curb and there is no intervening parkway.

Our project enjoys strong neighborhood support. A petition signed by 9 of our immediate neighbors was presented at the modification hearing and many of them offered to appear on our behalf if that were necessary.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Matt & Wendy LaBrie". The signature is fluid and cursive, with a large loop at the beginning and a long, sweeping tail.

I. PROJECT DESCRIPTION

The 8,700 square foot project site is located on the corner of Calle Granada and Calle Fresno. Current development on site consists of a 1,260 square foot single family residence, a detached two-car garage, and swimming pool. The property is currently undergoing a major construction/remodel which involves a new second story, front porch, and privacy fence. The discretionary application required for the project is a Modification to permit a new pool enclosure fence to exceed three and one-half feet (3 ½') in height when located within ten feet of a front lot line and within ten feet of a driveway for twenty feet back (SBMC §28.87.170); and for an increase in roof pitch and a new front porch to be located within the required 20 foot front yard setback facing Calle Granada (SBMC §28.15.060).

Date Application Accepted: August 29, 2006 Date Action Required: November 29, 2006

Total Lot Area	8,419 s.f.	100%

III. DISCUSSION

- This project was reviewed by the Architectural Board of Review (ABR) on August 21, 2006 (meeting minutes are attached as Exhibit C). The ABR continued the project to the Staff Hearing Officer with no comments as this proposal consists of a reinstatement of an approved project from 2001 that subsequently expired. The previous comments from the ABR in 2001 (also included in Exhibit C) show that the ABR was in support of the porch and fence modifications. The ABR approved of the fence modification due to the location of existing vegetation in the City right-of-way that would screen the fence, and requested that any damaged juniper plants were to be replaced with mature landscaping immediately.
- This proposal was previously approved by the Planning Division in November 2001 (see Exhibit D) and the building permit subsequently expired. This proposal is identical to the previous approved project with the exception of an additional request to increase the roof pitch of the existing non-conforming portion of the residence located in the setback. The project site is constrained by two front yards and an existing building that encroaches approximately three to six feet into the 20 foot required front yard setback along Calle Granada. The modifications for the new porch and roof pitch increase in the front yard setback can be supported by Staff as the ABR found them to be an aesthetic improvement.
- Staff does not support the modification for the new eight foot high wall and fence to be located along the front property line. The combined height of the five foot fence and three foot retaining wall is eight feet, although due to the topography of the site it will only appear to be five feet from the street. A five foot high fence can be constructed ten feet back from the front property line and still meet the provisions of the Zoning

Ordinance as well as provide adequate security for the existing pool. The project site has over the required 1,250 square feet of open yard area already provided on site, and to increase their open yard by using that portion of the front yard eliminates that space for the enhancement of the neighborhood.

In addition, this property is currently not developed with a sidewalk; however the adjacent property at 612 Calle Granada does have a sidewalk. This neighborhood is identified as a "missing link" in the City's Sidewalk Infill Program and we can expect that sidewalk will be installed at this property in the future. This will result in the elimination of the existing juniper shrubs located in the City right-of-way that currently screen the fence. The existing juniper shrubs were required to be maintained in the City right-of-way by the ABR in order to screen the fence from view, however, in consultation with City Transportation Planning Staff, we have determined that the shrubs present a visibility concern for vehicles when backing out of the driveway. Transportation Planning Staff requires that all vegetation in the City right-of-way be maintained at no higher than three and one-half feet for safety purposes.

It is Staff's position that a modification could be supported that would allow a five foot high fence to be located five feet back from the front property line, and this area can be landscaped with approval of the ABR on the owner's private property and not to rely on the vegetation in the City right-of-way which is a temporary feature of this site. Staff can also support the five foot fence to be located within ten feet of the driveway as the curve of the driveway will allow for adequate visibility once the vegetation is removed.

IV. RECOMMENDATION/FINDING

- Since the site is constrained with two front yards, and the new porch and increase in roof pitch are a visual improvement to an existing non-conforming structure, Staff recommends that the Staff Hearing Officer approve the modifications for the porch and the increase in roof pitch located in the front yard setback, making the findings that the Modification is consistent with the purposes and intent of the Zoning Ordinance; and the Modification is necessary to secure an appropriate improvement on the lot.
- Staff recommends that the Staff Hearing Officer deny the modification for the eight foot high wall and fence along the front property line along Calle Granada because a conforming improvement is possible at the site, it is not necessary to secure an appropriate improvement, and it does not meet the purpose and intent of the ordinance. Alternately, Staff can recommend approval of the fence height modification, if the proposed fence was set back five feet from the front property line, due to the site constraints outlined above, making the findings that the Modification is consistent with the purpose and intent of the ordinance and the modification is necessary to secure an appropriate improvement on the lot.
- Said action is subject to the condition that all vegetation be reduced to three and one half feet in height in the City right-of-way, within ten feet of the front property line and

within ten feet of the driveway for twenty feet back; and that the applicant return to the ABR for approval of the new fence location without the juniper screen.

RE: 606 Calle Granada APN: 053-083-12 Zoning: E3/SD2

Dear Modification Hearing Officer,

Thank you for considering our request to renew the modifications that were granted for this same project on November 29, 2001. Due to delays encountered after construction was started, the building permit covering this work lapsed. The requested modifications are identical to those previously approved to accommodate a five foot pool fence on the front property line, and replacement and enhancement of the existing front door entry porch, which encroaches into the front yard set back.

A substantial amount of construction work has been completed. Currently the basement excavation with reinforcing steel in place and the pool fence/retaining wall excavation are exposed and we are concerned that we may again experience wet weather which delayed us previously. We were not advised that the building permit had lapsed until requesting a recent Building Department inspection of this work in preparation for placing concrete. The project enjoys strong neighborhood support and was recently granted preliminary approval by the ABR and referred to the consent agenda for final approval. The permit drawings have been updated to reflect changes in energy and structural requirements and are ready for submission pending renewal of the modifications.

EXISTING CONDITIONS: The subject lot is 9180 sq.ft. ranging in depth from 55-62 feet. The property slopes approximately 7 ft from north to south and approximately 6 ft. from east to west. Currently there is an existing 1260 sq.ft. house and 550 sq.ft. pool on the property. The 622 sq.ft. detached garage was removed under a previous permit and approved modification. The lot is a corner lot with double front yard set backs into which the house encroaches on the westerly side 3 to 6 ft. with the existing entry porch extending another 3 ft. into the front yard. The existing swimming pool encroaches into the required front yard 3 to 4 feet, and the pool fence and low retaining wall were located in the front yard a distance of 8.5 to 9.5 feet from the front property line. All the improvements had building permits according to the Building Department files including the pool and fence. This proposal is to reposition and replace the existing fence

EXHIBIT B OF SJO STAFF RPT

with a new 5 ft. pool enclosure fence atop a new retaining wall and to replace the existing entry porch. This is part of an overall project which included removal of the detached garage; remodel of the existing residence; a 1386 sq.ft. addition to the residence; a new 515 sq. ft. attached garage; a 486 sq. ft. basement; restructuring the roof and re-roofing the existing residence; and landscaping and pool area improvements. As indicated above, modifications were previously approved and building permits covering this work were issued. Construction was started and the existing garage and pool fence was removed. A new fence was constructed on the northerly property line and a temporary fence constructed on the west side to maintain privacy and pool safety and to provide working room for construction of the new fence and retaining wall. The temporary portion will be removed upon completion of the permanent fence.

MODIFICATION TO ALLOW 5 FOOT FENCE IN FRONT YARD SET BACK: The modification requested is to allow a 5 foot pool enclosure fence on top of a 3 foot retaining wall to be moved approximately 8 feet west to the front property line. This will place the fence and retaining wall 12 feet back from the face of the curb on Calle Granada. The modification would allow us to bring the pool enclosure into line with current safety requirements while greatly enhancing the usability of the area.

The double front yard set backs, the 5 ft. easement to the north, and a recent lot line adjustment to the east to accommodate the encroachment of the adjacent residence, all work to severely limit the useable yard area. The existing 5 ft. wooden fence, which is located in the front yard, 8 1/2 to 9 1/2 ft. from the property line is in serious disrepair and limits the yard space adjacent to the swimming pool. Currently there is inadequate room for patio furniture and seating space for supervising adults.

Privacy is also an issue. The street level ranges from 3 to 4 feet above the pool deck level and a conforming fence will not provide privacy from the street for the pool and sun bathing area. In addition, the residences across the street to the west are substantially elevated above the street, which further exacerbates the privacy problem and at the same time serves to mitigate the increased 18 inches of fence height from the neighbor's perspective.

BENEFITS: The location of the fence relative to the intersection of Calle Fresno and Calle Granada is approximately 100 feet and should have no effect on vehicular or pedestrian visibility. To the north, the driveway at 612 Calle Granada is 47 feet north of the fence corner, posing no visibility issues for vehicles entering or exiting this adjacent residence. The distance from the fence to the driveway for the subject property will also be in conformity with ordinance requirements. The new five foot enclosure will be in conformity with current safety standards. The increase in useable yard area adjacent to the West End of the pool will greatly improve the usability and safety of the pool. The proposed fence will be approximately 12 feet from the face of curb at the street. This will provide ample area for landscaping in front of the fence.

To further consolidate the useable yard area we are proposing to replace the existing detached garage with a new structure attached to the dwelling and reduce the area required to maneuver automobiles. This will allow better supervision of the swimming pool area. and provide a much

needed play area for our young growing family. By increasing and consolidating our useable yard area in this way, we can maintain landscaping and gardening in our two front yards adjacent to the residence.

MODIFICATION TO ALLOW THE REPLACEMENT OF FRONT ENTRY PORCH: The modification requested is to allow construction of a new 4 ft. x 8 ft. partially enclosed, covered entry porch in the required front yard setback to replace the existing porch. Currently the front of the existing house extends into the required front yard from 3 to 6 ft. with the entry porch extending another 3 feet. The current covered porch looks like an after thought and provides very little protection from the weather and virtually no privacy. It is a very weak design element and totally out of context with the direction we want to take the house. Due to the slope of the property it is not possible to relocate the entry porch outside the front yard without further reducing the useable yard area.

BENEFITS: A functional covered entry is essential. This proposed entry will provide privacy and weather protection; will help shield neighboring properties from entrance lighting; and would improve the first impressions and experience of entering the house. As you will note on the proposed house remodel plans, the proposed entry is harmonious with and integrated into the design of the house. This will add to the value of the residence and help to maintain the character and quality of our neighborhood.

MODIFICATION TO ALLOW RESTRUCTURING THE RESIDENCE ROOF IN THE FRONT YARD SETBACK: The modification requested is to allow reconstruction of that portion of the residence roof located in the front yard setback. The existing roof is at a 6 in 12 pitch. The proposed restructured roof is at a 8 in 12 pitch. This will result in a roof that is approximately 12 inches higher than the existing roof at a point 20 feet from the westerly property line.

BENEFITS: Restructuring the roof at the steeper roof pitch will allow the first and second story roof planes to continue uninterrupted over the main living space and will present a more cohesive design. This is essential to the success of the design and has received positive comments from the Architectural Board of review.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'Wayne Labrie', written in a cursive style.

Wayne Labrie Architect, agent for Matt & Wendy LaBrie

ABR meeting 8/21/06

(COMMENTS ONLY; PROJECT REQUIRES ENVIRONMENTAL ASSESSMENT, NEIGHBORHOOD PRESERVATION ORDINANCE FINDINGS AND STAFF HEARING OFFICER APPROVAL FOR MODIFICATIONS.)

(7:46)

Present: Wayne Labrie, Architect.

Motion: Preliminary approval, and continued indefinitely to the Consent Calendar, with the applicant to provide a color board.

Action: LeCron/Manson-Hing 7/0/0. Mudge abstained.

Motion: To rescind the previous motion.

Action: LeCron/Wienke 7/0/0. Mudge abstained.

Amended

Motion: Continued indefinitely to the Staff Hearing Officer, and return to Consent for Preliminary Approval with the following comments: 1) NPO findings can be made at Consent. 2) Applicant shall provide a color and material board when the project returns.

Action: LeCron/Manson-Hing, 7/0/0. Mudge abstained.

ABR meeting 11/12/01

(COMMENTS ONLY PROJECT REQUIRES ENVIRONMENTAL ASSESSMENT, NEIGHBORHOOD PRESERVATION ORDINANCE COMPLIANCE, AND A MODIFICATION.)

(6:19)

Present: Wayne Labrie, Architect, and Matthew Labrie, owner, present.

Staff Comments: Susan McLaughlin, Planning Technician I, stated that a three and a half foot fence would not require a permit. A five foot fence on the property line or within ten feet of the lot line requires a modification.

Motion: Indefinite continuance to the Modification Hearing Officer with the following comments: 1) The Board understands the applicant's approach of creating a private yard on the corner lot and finds the front yard setback acceptable. 2) Further the front yard setback has no adverse visual impacts because of the existing vegetation. 3) The encroachment of the front porch into the setback is visually acceptable being an aesthetic improvement. 4) Study a more sophisticated design for the main entry or consider the use of sandstone. 5) The applicant has to return to the ABR prior to the Modification Hearing, if he expands the porch more than 18 inches. 6) Specify the walkway from the sidewalk to the front porch on the plans. 7) Enhance the deck railing by providing some openings in the solid wall. 8) Restudy the chimney to be more special in its design and enhance the chimney cap. 9) Indicate the accurate locations of the existing junipers and the footprints of neighboring residence to the east on the plans. 10) Damaged Junipers are to be replaced with mature landscaping immediately.

Action: Gradin/Eichelberger, 8/0/0.

Mr. and Mrs. Matthew Labrie
606 Calle Granada
Santa Barbara, CA 93105

SUBJECT: 606 Calle Granada; APN 053-083-012; E-3 One Zone

Dear Mr. and Mrs. Labrie:

At a public hearing held on November 28, 2001, the Modification Hearing Officer approved your request for a modification to permit a new pool enclosure fence to exceed three and one-half feet (3 1/2') in height when located within ten feet of a front lot line and for a new entry porch to be located within the required twenty-foot (20') front yard setback facing Calle Granada.

This action is subject to the condition that all plans submitted for building permits in conjunction with the approval of this modification shall show:

1. The eave on the entry porch observing a minimum nine-feet (9') front yard setback;
2. The retaining wall/fence not exceeding a combined height of eight-feet (8') at any point;
3. A complete floor plan of the basement storage area; and,
4. Removal of the "office" term from the floor plans.

In taking this action, the Hearing Officer made the findings required by Municipal Code Section 28.92.026, that is, that the modification is necessary to secure an appropriate improvement on the property and is consistent with the intent and purpose of the Zoning Ordinance.

This decision may be appealed to the Planning Commission by filing an appeal with the Planning Division at 630 Garden Street no later than 4:30 p.m. on December 10, 2001. If not appealed within that time, the action is final.

Subsequent to the outcome of any appeal action your next administrative step should be to apply for Architectural Board of Review (ABR) approval and then a building permit. **PLEASE**

NOTE: A copy of this modification letter shall be reproduced on the first sheet of the drawings submitted with the application for a building permit. The location, size and design of the construction proposed in the application for the building permit shall not deviate from the location, size and design of construction approved in this modification.

RE: 606 Calle Granada APN: 053-083-12

Dear Sir or Madam:

I write in support of the application for buildings permits on file for the above-referenced property owned by our neighbors Matt and Wendy LaBrie. Our home is immediately next door to the LaBrie's on Calle Fresno. We are very familiar with their plans, including the fact that the front porch and pool fence features require modifications.

Shelley and I are very much in favor of the proposed remodeling of the LaBrie's home and the porch and fence aspects. Their remodel will substantially increase property values in the neighborhood and will be completely consistent with existing homes in the area. We urge you to approve the modifications so that the LaBrie's can complete their project as soon as possible.

Please feel free to contact me if you have any questions.

Thank you.

Very Truly Yours,

Rick Fogg

CITY OF SANTA BARBARA
PLANNING DIVISION

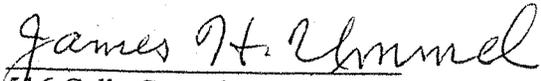

Dear Sir,

With reference to your recent notice regarding Matt and Wendy LaBrie's proposed project at 606 Calle Granada, I have reviewed the plans and discussed the project with Matt and Wendy, our neighbors. I understand this project to be the same as the one that was previously approved, permitted, and on which construction was started. I understand that the 8' wall referred to in the notice is really a 5' wooden pool safety fence on top of a 3' retaining wall below street level. I understand that the new front entry porch will replace the existing porch and is only minimally larger than the existing. I have no objections to the requested modifications or the scope of their project. I support their project completely and appreciate the improvement to our neighborhood.

CITY OF SANTA BARBARA STAFF HEARING OFFICER

RESOLUTION NO. 063-06

606 CALLE GRANDE

MODIFICATION

OCTOBER 11, 2006

APPLICATION OF WAYNE E. LABRIE FOR MATT & WENDY LABRIE, 606 CALLE GRANADA APN 053-083-012, E-3 ONE-FAMILY RESIDENCE/SD-2 SPECIAL DISTRICT OVERLAY ZONES, GENERAL PLAN DESIGNATION: RESIDENTIAL 3 UNITS PER ACRE (MST2006-00430)

The 8,700 square foot project site is located on the corner of Calle Granada and Calle Fresno. Current development on site consists of a 1,260 square foot single family residence, a detached two-car garage, and swimming pool. The property is currently undergoing a major construction/remodel which involves a new second story, front porch, and privacy fence. The discretionary application required for the project is a Modification to permit a new pool enclosure fence to exceed three and one-half feet (3 ½') in height when located within ten feet of a front lot line (SBMC §28.87.170); and, for an increase in roof pitch and a new front porch to be located within the required 20 foot front yard setback facing Calle Granada (SBMC §28.15.060).

The Environmental Analyst has determined that the project is exempt from further environmental review pursuant to the California Environmental Quality Guidelines Section 15305.

WHEREAS, the Staff Hearing Officer has held the required public hearing on the above application, and the Applicant was present.

WHEREAS, no one appeared to speak in favor of the application, and one person appeared to speak in opposition thereto, and the following exhibits were presented for the record:

1. Staff Report with Attachments, October 11, 2006.
2. Site Plans
3. Correspondence received in support of the project:
A petition was received with nine signatures from neighbors in support of the project.
4. Correspondence received in opposition to the project:
Kathiann Brown, 145 Vista De La Cumbre, Santa Barbara, CA 93105

NOW, THEREFORE BE IT RESOLVED that the City Staff Hearing Officer:

Approved the modifications for the porch and the increase in roof pitch located in the front yard setback, making the findings that the Modification is consistent with the purposes and intent of the Zoning Ordinance; and the Modification is necessary to secure an appropriate improvement on the lot.

Approved the modification for the pool enclosure fence and wall set back five feet from the property line, making the findings that the Modification is consistent with the purpose and intent of the Zoning Ordinance and the modification is necessary to secure an appropriate improvement on the lot, with the conditions outlined in the Staff Report that all vegetation along the frontage be reduced to three and one half feet in height in the City right-of-way, and that the applicant return to the ABR for approval of the new fence location.

This motion was passed and adopted on the 11th day of October, 2006 by the Staff Hearing Officer of the City of Santa Barbara.

I hereby certify that this Resolution correctly reflects the action taken by the City of Santa Barbara Staff Hearing Officer at its meeting of the above date.

Kathleen Goo, Staff Hearing Officer Secretary

10/13/06

Date

PLEASE BE ADVISED:

1. This action of the Staff Hearing Officer can be appealed to the Planning Commission or the City Council within ten (10) days after the date the action was taken by the Staff Hearing Officer.
2. If you have any existing zoning violations on the property, other than those included in the conditions above, they must be corrected within thirty (30) days of this action.
3. Subsequent to the outcome of any appeal action you next administrative step should be to apply for Architectural Board of Review (ABR) approval and then a building permit.
4. **PLEASE NOTE: A copy of this resolution shall be reproduced on the first sheet of the drawings submitted with the application for a building permit.** The location, size and design of the construction proposed in the application for the building permit shall not deviate from the location, size and design of construction approved in this modification.
5. **NOTICE OF APPROVAL TIME LIMITS:** The Staff Hearing Officer's action approving the Performance Standard Permit or Modifications shall expire two (2) years from the date of the approval, per SBMC §28.87.360, unless:
 - a. A building permit for the construction authorized by the approval is issued within twenty four months of the approval. (An extension may be granted by the Staff Hearing Officer if the construction authorized by the permit is being diligently pursued to completion.) or;

- b. The approved use has not been discontinued, abandoned or unused for a period of six months following the earlier of:
 - i. an Issuance of a Certificate of Occupancy for the use, or;
 - ii. one (1) year from granting the approval.
