DATE: March 18, 2008

TO: Planning Commission

FROM: Jan M. Hubbell, AICP, Senior Planner
Peter Lawson, Associate Planner

SUBJECT: 1298 Coast Village Road

Per the direction of the Planning Commission on March 13, 2008, staff is providing the following response to the Commission's and the public's comments at the hearing:

*Is there an agreement between the City and the County that any new development along Coast Village Road is subject to a vote of the people?*

Based upon staff's review of the Coast Village Road annexation file from 1960, there is no requirement that development on Coast Village Road is subject to vote of the surrounding neighbors and/or requires County approval.

*Is the project within a flood plain?*

The project is not located within a flood plain. According to the most recent FEMA maps, the westernmost border of the flood plain for Montecito Creek is located on the eastern side of Olive Mill Road. Further, the County Flood Control Division completed the Montecito Creek Debris Basin Project about one mile north of the project site that would reduce potential flooding along Olive Mill Road.

*The Architectural Board of Review had concerns about the size, bulk and scale of the project; why was that not reflected in the staff report?*

While the ABR had concerns about the bulk of the project, they did find the overall design acceptable. What was not clear in the minutes was the design presented to the Board on November 14, 2005 included a proposal to place most of the building up to the back of the sidewalk along Coast Village Road and to cantilever a bedroom into the setback along the Olive Mill portion. Additionally, the massing along Coast Village Road was a solid line. The Board had a concern about those and stated that they contributed to the size, bulk and scale. The applicant chose to respond to these comments by revising the project design before submitting the project to the Planning Commission for
review. Thus the design before the Commission demonstrates all of the building along Coast Village Road and Olive Mill Road being pulled back to the setback line, except for the balcony and the stairway, respectively.

Please correct the Conditions of Approval.

A copy of the revised conditions of approval is attached that addresses a few typographical errors, address construction parking prohibition in the nearby residential neighborhoods and public improvements for disabled access across the median on Coast Village Road.

Attachment:

Revised Conditions of Approval
PLANNING COMMISSION CONDITIONS OF APPROVAL

1298 COAST VILLAGE ROAD
MODIFICATIONS, DEVELOPMENT PLAN, COASTAL DEVELOPMENT PERMIT, TSM,
ZONING MAP AMENDMENT & LOCAL COASTAL PROGRAM AMENDMENT
MARCH 13, 2008

In consideration of the project approval granted by the Planning Commission and for the benefit of the owner(s) and occupant(s) of the Real Property, the owners and occupants of adjacent real property and the public generally, the following terms and conditions are imposed on the use, possession, and enjoyment of the Real Property:

A. Approval Contingent Upon Adoption of Zoning Map Amendment. Approval of the subject project is contingent upon adoption of an Ordinance by the City Council approving the Zoning Map Amendment.

B. Recorded Agreement. Prior to the issuance of any Public Works permit or Building permit for the project on the Real Property, the Owner shall execute an "Agreement Relating to Subdivision Map Conditions Imposed on Real Property", which shall be reviewed as to form and content by the City Attorney, Community Development Director and Public Works Director, recorded in the Office of the County Recorder, and shall include the following:

1. **Uninterrupted Water Flow.** The Owner shall provide for the uninterrupted flow of water through the Real Property including, but not limited to, swales, natural watercourses, conduits and any access road, as appropriate.

2. **Recreational Vehicle Storage Prohibition.** No recreational vehicles, boats, or trailers shall be stored on the Real Property.

3. **Landscape Plan Compliance.** The Owner shall comply with the Landscape Plan approved by the Architectural Board of Review (ABR). Such plan shall not be modified unless prior written approval is obtained from the ABR. The landscaping on the Real Property shall be provided and maintained in accordance with said landscape plan. If said landscaping is removed for any reason without approval by the ABR, the owner is responsible for its immediate replacement.

4. **Storm Water Pollution Control and Drainage Systems Maintenance.** Owner shall maintain the drainage system and storm water pollution control devices intended to intercept siltation and other potential pollutants (including, but not limited to, hydrocarbons, fecal bacteria, herbicides, fertilizers, etc.) in a functioning state (and in accordance with the Operations and Maintenance Procedure Plan approved by the Building Official). Should any of the project's surface or subsurface drainage structures or storm water pollution control methods fail to capture, infiltrate, and/or treat, or result in increased erosion, the Owner shall be responsible for any necessary repairs to the system and restoration of the eroded area. Should repairs or restoration become necessary, prior to the commencement of such repair or restoration work, the applicant shall submit a repair and restoration plan to the Community Development Director to determine if an amendment or a new Coastal Development Permit is required to authorize such

EXHIBIT A
work. The Owner is responsible for the adequacy of any project-related drainage facilities and for the continued maintenance thereof in a manner that will preclude any hazard to life, health, or damage to the Real Property or any adjoining property.

5. **Approved Development.** The development of the Real Property approved by the Planning Commission on January 17, 2008 is limited to the following project description:

   The proposed project involves the demolition of an existing gas station with two repair bays and the construction of a new mixed use building. The new 18,196 square foot mixed use building would be comprised of eight residential condominiums and approximately 5,000 square feet of commercial space, located on the ground floor. All of the residential units would be located on the second and third floors. Five residential units would include two bedrooms, two units would include one bedroom each and one unit would include three bedrooms. 38 parking spaces are provided, with nine covered parking spaces located at grade level and 29 parking spaces located below grade. Grading would be approximately 9,500 cubic yards of cut and 1,500 cubic yards of fill. And the improvements shown on the Tentative Subdivision Map signed by the chairman of the Planning Commission on said date and on file at the City of Santa Barbara.

6. **Use Limitations.** Due to potential parking impacts, uses other than office and commercial uses, as described under §28.90.100.I Parking Requirements, are not permitted without further environmental and/or Planning Commission review and approval. Prior to initiating a change of use, the Owner shall submit a letter to the Community Development Director detailing the proposal, and the Director shall determine the appropriate review procedure and notify the Applicant.

7. **Required Private Covenants.** The Owners shall record in the official records of Santa Barbara County either private covenants, a reciprocal easement agreement, or a similar agreement which, among other things, shall provide for all of the following:

   a. **Common Area Maintenance.** An express method for the appropriate and regular maintenance of the common areas, common access ways, common utilities and other similar shared or common facilities or improvements of the development, which methodology shall also provide for an appropriate cost-sharing of such regular maintenance among the various owners of the condominium units.

   b. **Garages Available for Parking.** A covenant that includes a requirement that all garages be kept open and available for the parking of vehicles owned by the residents of the property in the manner for which the garages were designed and permitted.

   c. **Assigned Residential Parking.** At least one, but no more than two, parking space(s) shall be assigned to each residential unit.
d. **Unassigned Parking.** All parking spaces other than those designated for residential purposes shall remain unassigned and available to all occupants and visitors to the site.

e. **Landscape Maintenance.** A covenant that provides that the landscaping shown on the approved Landscaping Plan shall be maintained and preserved at all times in accordance with the Plan, including the row of existing Ficus trees along the northern property line.

f. **Trash and Recycling.** Trash holding areas shall include recycling containers with at least equal capacity as the trash containers, and trash/recycling areas shall be easily accessed by the consumer and the trash hauler. Green waste shall either have containers adequate for the landscaping or be hauled off site by the landscaping maintenance company. If no green waste containers are provided for common interest developments, include an item in the CC&Rs stating that the green waste will be hauled off site.

g. **Gates.** Any gates that have the potential to block access to any designated commercial space shall be locked in the open position during business hours.

h. **Covenant Enforcement.** A covenant that permits each owner to contractually enforce the terms of the private covenants, reciprocal easement agreement, or similar agreement required by this condition.

C. **Public Works Submittal Prior to Final Map Approval.** The Owner shall submit the following, or evidence of completion of the following, to the Public Works Department for review and approval, prior to processing the approval of the Final/Parcel Map and prior to the issuance of any permits for the project:

1. **Final Map.** The Owner shall submit to the Public Works Department for approval, a Final Map prepared by a licensed land surveyor or registered Civil Engineer. The Final Map shall conform to the requirements of the City Survey Control Ordinance.

2. **Dedication(s).** Easements as shown on the approved Tentative Subdivision Map and described as follows, subject to approval of the easement scope and location by the Public Works Department and/or the Building and Safety Division:

   a. All street purposes along Coast Village Road and Olive Mill Road in order to establish a variable width wide public right-of-way for sidewalk purposes.

3. **Can and Will Serve Letters.** Obtain a "can and will serve" letter from Montecito Water District.

4. **Water Rights Assignment Agreement.** The Owner shall assign to the City of Santa Barbara the exclusive right to extract ground water from under the Real
Property in an Agreement Assigning Water Extraction Rights. Engineering Division Staff will prepare said agreement for the Owner’s signature.

5. **Required Private Covenants.** The Owner shall submit a copy of the recorded private covenants, reciprocal easement agreement, or similar private agreements required for the project. If the private covenants required pursuant to Section A.2.7 above have not yet been approved by the Department of Real Estate, a draft of such covenants shall be submitted.

6. **Drainage Calculations.** The Owner shall submit drainage calculations prepared by a registered civil engineer or licensed architect demonstrating that the new development will not increase runoff amounts above existing conditions for a 25-year storm event. Any increase in runoff shall be retained on-site.

7. **Drainage and Water Quality.** Project drainage shall be designed, installed, and maintained such that stormwater runoff from the first inch of rain from any storm event shall be retained and treated onsite in accordance with the City’s NPDES Storm Water Management Permit. Runoff should be directed into a passive water treatment method such as a bioswale, landscape feature (planter beds and/or lawns), infiltration trench, etc. Project plans for grading, drainage, stormwater treatment methods, and project development, shall be subject to review and approval by City Building Division and Public Works Department. Sufficient engineered design and adequate measures shall be employed to ensure that no significant construction-related or long-term effects from increased runoff, erosion and sedimentation, urban water pollutants (such as automobile oil, grease and metals), or groundwater pollutants would result from the project. The Owner shall maintain the drainage system and storm water pollution control methods in a functioning state. (W-2)

8. **Coast Village Road Public Improvement Plans.** The Owner shall submit C-1 public improvement or building plans for construction of improvements along the property frontage on Coast Village Road. The C-1 plans shall be submitted separately from plans submitted for a Building Permit and shall be reviewed and signed by the City Engineer. As determined by the Public Works Department, the improvements shall include: State Street style decorative brick sidewalk, curbs, gutters, ADA accessibility guideline improvements through the median, crack seal to the centerline of the street along entire subject property frontage and slurry seal a minimum of 20 feet beyond the limit of all trenching, underground service utilities (SBMC§22.38.125 and §27.08.025), connection to Montecito Water District water main and City sewer main, public drainage improvements with supporting drainage calculations for installation of drainage improvements, supply and install one Coast Village Road style street light, preserve and/or reset survey monuments and contractor stamps, supply, replace the wooden Coast Village Road sign located in the center median and install directional/regulatory traffic control signs as determined by the Transportation Operations Manager, provide storm drain stenciling at existing drop inlet, supply and install new designated street trees and tree grates as determined by the City Arborist, and provide adequate positive
9. **Olive Mill Road Public Improvement Plans.** The Owner shall submit C-1 public improvement or building plans for construction of improvements along the property frontage on Olive Mill Road. The C-1 plans shall be submitted separately from plans submitted for a Building Permit and shall be reviewed and signed by the City Engineer. As determined by the Public Works Department, the improvements shall include the following: State Street style decorative sidewalk, driveway apron modified to meet Title 24 requirements, curbs, gutters, access ramp(s), crack seal to the centerline of the street along entire subject property frontage and slurry seal a minimum of 20 feet beyond the limit of all trenching, underground service utilities (SBMC§22.38.125 and §27.08.025), connection to Montecito Water District water main and City sewer main, public drainage improvements with supporting drainage calculations for installation of drainage improvements, supply and install one Coast Village Street light (if not located on Coast Village Road), preserve and/or reset survey monuments and contractor stamps, supply and install directional/regulatory traffic control signs as determined by the Transportation Operations Manager, storm drain stenciling at drop inlets (if any), supply and install new designated street trees and tree grates as determined by the City Arborist, and provide adequate positive drainage from site. Any work in the public right-of-way requires a Public Works Permit. (W-3)

10. **Land Development Agreement.** The Owner shall submit an executed Agreement for Land Development Improvements, prepared by the Engineering Division, an Engineer’s Estimate, signed, and stamped by a registered civil engineer, and securities for construction of improvements prior to execution of the agreement.

11. **Encroachment Permits.** Any encroachment or other permits from the City or other jurisdictions (State, Flood Control, County, etc.) for the construction of improvements (including any required appurtenances) within their rights of way (easement) and specifically for private fountain on Coast Village Road in the public right-of-way.

12. **Removal or Relocation of Public Facilities.** Removal or relocation of any public utilities or structures, including the Montecito Water District water main located on Olive Mill Road, must be performed by the Owner or by the person or persons having ownership or control thereof at the developers' expense.

13. **Relocation of MTD Fixtures.** Relocation of the MTD bus stop, red curb, bench pole and sign on Olive Mill Road, as applicable and as determined by the Public Works Director and MTD.

C. **Design Review.** The following items are subject to the review and approval of the Architectural Board of Review (ABR). ABR shall not grant preliminary approval of the project until the following conditions have been satisfied.
1. **Tree Protection Measures.** The landscape plan and grading plan shall include the following tree protection measures:

   a. **Landscaping & Development Adjacent to Trees.** Landscaping & development of the driveway adjacent to the Ficus tree(s) shall be compatible with the preservation of the tree(s).

   b. **Arborist’s Report.** Include a note on the plans that recommendations/conditions contained in the arborist’s report prepared by Bill Spiewak, dated June 1, 2006, shall be implemented. (BIO-1)

2. **Landscape Screening.** The existing Ficus trees along the northern property line shall continue to be maintained to buffer the parking area and site development from the adjacent residential zoned lot.

3. **Useable Common Open Space.** Adequate usable common open space shall be provided in a location accessible by all units within the development.

4. **Minimize Visual Effect of Paving.** Where feasible and consistent with Fire Department regulations, textured or colored pavement shall be used in paved areas of the project to minimize the visual effect of the expanse of paving, create a pedestrian environment, and provide access for all users.

5. **Screened Check Valve/Backflow.** The check valve or anti-backflow devices for fire sprinkler and/or irrigation systems shall be provided in a location screened from public view or included in the exterior wall of the building.

**D. Public Works Requirements Prior to Building Permit Issuance.** The Owner shall submit the following, or evidence of completion of the following to the Public Works Department for review and approval, prior to the issuance of a Building Permit for the project:

1. **Recordation of Agreements.** After City Council approval, the Owner shall provide evidence of recordation to the Public Works Department.

2. **Approved Public Improvement Plans and Concurrent Issuance of Public Works Permit.** Upon acceptance of the approved public improvement plans, a Public Works permit shall be issued concurrently with a Building permit.

**E. Community Development Requirements Prior to Building or Public Works Permit Application/Issuance.** The following shall be finalized prior to, and/or submitted with, the application for any Building or Public Works permit:

1. **Project Environmental Coordinator Required.** Submit to the Planning Division a contract with a qualified representative for the Owner, subject to approval of the contract and the representative by the Planning Division, to act as the Project Environmental Coordinator (PEC). The PEC shall be responsible for assuring full compliance with the provisions of the Mitigation Monitoring and Reporting Program (MMRP) and Conditions of Approval to the City. The contract shall include the following, at a minimum:
a. The frequency and/or schedule of the monitoring of the mitigation measures.

b. A method for monitoring the mitigation measures.

c. A list of reporting procedures, including the responsible party, and frequency.

d. A list of other monitors to be hired, if applicable, and their qualifications.

e. Submittal of biweekly reports during demolition, excavation, grading and footing installation and biweekly reports on all other construction activity regarding MMRP and condition compliance by the PEC to the Community Development Department.

The PEC shall have authority over all other monitors/specialists, the contractor, and all construction personnel for those actions that relate to the items listed in the MMRP and conditions of approval, including the authority to stop work, if necessary, to achieve compliance with mitigation measures.

2. **Neighborhood Notification Prior to Construction.** At least thirty (30) days prior to commencement of construction, the contractor shall provide written notice to all property owners, businesses, and residents within 300 feet of the project area. The notice shall contain a description of the project, the construction schedule, including days and hours of construction, the name and phone number of the Project Environmental Coordinator (PEC) and Contractor(s), site rules and Conditions of Approval pertaining to construction activities and any additional information that will assist the Building Inspectors, Police Officers and the public in addressing problems that may arise during construction. The language of the notice and the mailing list shall be reviewed and approved by the Planning Division prior to being distributed. An affidavit signed by the person(s) who compiled the mailing list shall be submitted to the Planning Division. (N-6)

3. **Contractor and Subcontractor Notification.** The Owner shall notify in writing all contractors and subcontractors of the site rules, restrictions, and Conditions of Approval. Submit a copy of the notice to the Planning Division.

4. **Traffic Control Plan.** A traffic control plan shall be submitted, as specified in the City of Santa Barbara Traffic Control Guidelines. Traffic Control Plans are subject to approval by the Transportation Manager.

5. **Arborist’s Monitoring.** Submit to the Planning Division an executed contract with a qualified arborist for monitoring of all work within the dripline of all trees during construction. The contract shall include a schedule for the arborist’s presence during grading and construction activities, and is subject to the review and approval of the Planning Division. (BIO-1)

6. **Prepare a Structural Crack Survey and Video Reconnaissance.** At least twenty (20) days prior to the issuance of a demolition permit, Owner shall notify owners
and occupants of structures within 100 feet of the project site property lines of the opportunity to participate in a structural crack survey and video reconnaissance of their property. Prior to the issuance of a demolition permit, Owner shall prepare a structural crack survey and video reconnaissance of the property of those owners or occupants who express a desire to participate in the survey. The purpose of the survey shall be to document the existing condition of neighboring structures within 100 feet of the project site property line and more than 30 years old. After each major phase of project development (demolition, grading, and construction), a follow-up structural crack survey and video reconnaissance of the property of those owners and occupants who have elected to participate in the survey. Prior to issuance of a certificate of occupancy, Owner shall meet with the owners and occupants who have elected to participate in the survey to determine whether any structural damage has occurred due to demolition, grading or construction at the project site. Owner shall be responsible for the cost of repairing any structural damage caused by project demolition, grading, or construction on properties that have elected to participate in the survey.

7. **Corrective Action Plan** - Written evidence of completion of a Corrective Action Plan approved by the California Regional Water Quality Control Board and the Santa Barbara County Fire Department shall be provided prior to issuance of any building permits other than those permits necessary to complete the Corrective Action Plan. (H-1)

8. **Green Building Techniques Required.** Owner shall design the project to meet Santa Barbara Built Green Two-Star Standards and strive to meet the Three-Star Standards.

9. **Letter of Commitment for Pre-Construction Conference.** The Owner shall submit to the Planning Division a letter of commitment that states that, prior to disturbing any part of the project site for any reason and after the Building permit has been issued, the General Contractor shall schedule a conference to review site conditions, construction schedule, construction conditions, and environmental monitoring requirements. The conference shall include representatives from the Public Works Department Engineering and Transportation Divisions, the assigned Building Inspector, the Planning Division, the Property Owner, the Arborist, the Project Engineer, the Project Environmental Coordinator, the Contractor and each subcontractor.

F. **Building Permit Plan Requirements.** The following requirements/notes shall be incorporated into the construction plans submitted to the Building and Safety Division for Building permits.

1. **Design Review Requirements.** Plans shall show all design, landscape and tree protection elements, as approved by the Architectural Board of Review, outlined in Section C above.
2. **Pre-Construction Conference.** Not less than 10 days or more than 20 days prior to commencement of construction, a conference to review site conditions, construction schedule, construction conditions, and environmental monitoring requirements, shall be held by the General Contractor. The conference shall include representatives from the Public Works Department Engineering and Transportation Divisions, Building Division, Planning Division, the Property Owner Arborist, Project Environmental Coordinator, Contractor and each Subcontractor.

3. **Mitigation Monitoring and Reporting Requirement.** Note on the plans that the Owner shall implement the Mitigation Monitoring and Reporting Program (MMRP) for the project's mitigation measures, as stated in the Mitigated Negative Declaration for the project.

4. **Grading Plan Requirement for Archaeological Resources.** The following information shall be printed on the grading plans:

   If archaeological resources are encountered or suspected, work shall be halted or redirected immediately and the Planning Division shall be notified. The archaeologist shall assess the nature, extent, and significance of any discoveries and develop appropriate management recommendations for archaeological resource treatment, which may include, but are not limited to, redirection of grading and/or excavation activities, consultation and/or monitoring with a Barbareño Chumash representative from the most current City Qualified Barbareño Chumash Site Monitors List, etc.

   If the discovery consists of possible human remains, the Santa Barbara County Coroner shall be contacted immediately. If the Coroner determines that the remains are Native American, the Coroner shall contact the California Native American Heritage Commission. A Barbareño Chumash representative from the most current City Qualified Barbareño Chumash Site Monitors List shall be retained to monitor all further subsurface disturbance in the area of the find. Work in the area may only proceed after the Planning Division grants authorization.

   If the discovery consists of possible prehistoric or Native American artifacts or materials, a Barbareño Chumash representative from the most current City Qualified Barbareño Chumash Site Monitors List shall be retained to monitor all further subsurface disturbance in the area of the find. Work in the area may only proceed after the Planning Division grants authorization.

5. **Post-Construction Erosion Control and Water Quality Plan.** Provide an engineered drainage plan that addresses the existing drainage patterns and leads towards improvement of the quality and rate of water run-off conditions from the site by capturing, infiltrating, and/or treating drainage and preventing erosion. The Owner shall passive water quality methods, such as bioswales, catch basins, or storm drain on the Real Property, or other measures specified in the Erosion Control Plan, to intercept all sediment and other potential pollutants (including, but
not limited to, hydrocarbons, fecal bacteria, herbicides, fertilizers, etc.) from the parking lot areas and other improved, hard-surfaced areas prior to discharge into the public storm drain system, including any creeks. All proposed methods shall be reviewed and approved by the Public Works Department and the Building and Safety Division. Maintenance of these facilities shall be provided by the Owner, as outlined in Condition A-4, above, which shall include the regular sweeping and/or vacuuming of parking areas and drainage and storm water methods maintenance program.

6. **Emergency Evacuation Plan.** Provide an emergency evacuation plan subject to approval by the Fire Department.

7. **Trash Enclosure Provision.** A trash enclosure with adequate area for recycling containers (an area that allows for a minimum of 50 percent of the total capacity for recycling containers) shall be provided on the Real Property and screened from view from surrounding properties and the street. Dumpsterers and containers with a capacity of 1.5 cubic yards or more shall not be placed within five (5) feet of combustible walls, openings, or roofs, unless protected with fire sprinklers. (PS-1)

8. **Commercial Dumpsterers.** Commercial dumpsters shall be provided, including, at a minimum, an equal area for recycling containers. Dumpsterers shall not be placed within five feet (5') of combustible walls, openings, or combustible roof eaves lines unless sprinkler coverage is provided. (PS-1)

9. **Trash Storage Area Design.** Project trash container areas shall incorporate approved long-term structural storm water best management practices (BMPs) to protect water quality. The applicant shall submit project plans to the satisfaction of Public Works Engineering and Solid Waste that incorporate long-term structural best management practices for trash storage areas to protect storm water quality. The owners shall maintain these structural storm water quality protections in working order for the life of the project. (W-4)

10. **Project Directory.** A project directory, (including map and parking directional signs) listing all units on-site shall be indicated on the project plans. This directory shall be lit sufficiently for readability for site visitors and placed in a location or locations acceptable to the Fire Department, shall meet current accessibility requirements, and is subject to Sign Committee Approval.

11. **Interior Noise Reduction:** As identified in the Preliminary Acoustical Study, certain residential units (Units 3, 4, and 5) shall require a "windows closed" condition in order to meet the maximum interior 45 dBA Ldn noise level standard. As recommended in the Study, these units shall provide the following:

"The mechanical ventilation and cooling system shall supply a minimum of two air changes per hour to each habitable room, including 20% fresh make-up air obtained directly from the outdoors. The fresh air inlet duct shall be of sound attenuating construction and shall consist of a minimum of ten feet of straight or curved duct or six feet plus one sharp bend."

Updated on
Note that this mitigation could be removed if a detailed acoustical analysis determines that there is an alternative means for achieving the required interior noise level. (N-2)

12. **Utilities.** Provide individual water, electricity, and gas meters, and sewer lateral for each residential unit. Service lines for each unit shall be separate until a point five feet (5') outside the building.

13. **Conditions on Plans/Signatures.** The final Planning Commission Resolution shall be provided on a full size drawing sheet as part of the drawing sets. Each condition shall have a sheet and/or note reference to verify condition compliance. If the condition relates to a document submittal, indicate the status of the submittal (e.g., Final Map submitted to Public Works Department for review). A statement shall also be placed on the above sheet as follows: The undersigned have read and understand the above conditions, and agree to abide by any and all conditions which is their usual and customary responsibility to perform, and which are within their authority to perform.

G. **Construction Implementation Requirements.** All of these construction requirements shall be carried out in the field by the Owner and/or Contractor for the duration of the project construction. (Community Development Department staff shall review the plans and specifications to assure that they are incorporated into the bid documents, such that potential contractors will be aware of the following requirements prior to submitting a bid for the contract.)

1. **Demolition/Construction Materials Recycling.** Recycling and/or reuse of demolition/construction materials shall be carried out to the extent feasible, and containers shall be provided on site for that purpose, in order to minimize construction-generated waste conveyed to the landfill. Indicate on the plans the location of a container of sufficient size to handle the materials, subject to review and approval by the City Solid Waste Specialist, for collection of demolition/construction materials. A minimum of 90% of demolition and construction materials shall be recycled or reused. Evidence shall be submitted at each inspection to show that recycling and/or reuse goals are being met. (PS-3)
2. **Construction-Related Truck Trips.** Construction-related truck trips shall not be scheduled during peak hours (7:00 a.m. to 9:00 a.m. and 4:00 p.m. to 6:00 p.m.). The purpose of this condition is to help reduce truck traffic on adjacent streets and roadways. (T-1)

3. **Construction Related Traffic Routes.** The route of construction-related traffic shall be established to minimize trips through surrounding residential neighborhoods, subject to approval by the Public Works Director.

4. **Haul Routes.** The haul route(s) for all construction-related trucks, three tons or more, entering or exiting the site, shall be approved by the Public Works Director.

5. **Traffic Control Plan.** All elements of the approved Traffic Control Plan shall be carried out by the Contractor.

6. **Construction Hours.** Construction (including preparation for construction work) is prohibited Monday through Friday before 7:00 a.m. and after 5:00 p.m., and all day on Saturdays, Sundays and holidays observed by the City of Santa Barbara, as shown below:

   - New Year’s Day
   - Martin Luther King’s Birthday
   - Presidents’ Day
   - Memorial Day
   - Independence Day
   - Labor Day
   - Thanksgiving Day
   - Following Thanksgiving Day
   - Christmas Day
   - January 1st*
   - 3rd Monday in January
   - 3rd Monday in February
   - Last Monday in May
   - July 4th*
   - 1st Monday in September
   - 4th Thursday in November
   - Friday following Thanksgiving Day
   - December 25th*

   *When a holiday falls on a Saturday or Sunday, the preceding Friday or following Monday, respectively, shall be observed as a legal holiday.

   When, based on required construction type or other appropriate reasons, it is necessary to do work outside the allowed construction hours, contractor shall contact the Chief of Building and Safety to request a waiver from the above construction hours, using the procedure outlined in Santa Barbara Municipal Code §9.16.015 Construction Work at Night. Contractor shall notify all residents within 300 feet of the parcel of intent to carry out night construction a minimum of 48 hours prior to said construction. Said notification shall include what the work includes, the reason for the work, the duration of the proposed work and a contact number. (N-7)

7. **Construction Parking/Storage/Staging.** Construction parking and storage shall be provided as follows:

   a. During construction, free parking spaces for construction workers and construction shall be provided on-site or off-site in a location subject to the approval of the Public Works Director. Construction workers are prohibited
from parking within the public right-of-way (including surrounding residential neighborhoods within the County), except as outlined in subparagraph b. below.

b. Parking in the public right of way is permitted as posted by Municipal Code, as reasonably allowed for in the 2006 Greenbook (or latest reference), and with a Public Works permit in restricted parking zones. No more than three (3) individual parking permits without extensions may be issued for the life of the project.

c. Storage or staging of construction materials and equipment within the public right-of-way shall not be permitted, unless approved by the Transportation Manager. (T-2)

8. **Construction Dust Control – Minimize Disturbed Area/Speed.** Minimize amount of disturbed area and reduce on site vehicle speeds to 15 miles per hour or less. (AQ-1)

9. **Water Sprinkling During Grading.** During site grading and transportation of fill materials, regular water sprinkling shall occur on-site, using reclaimed water whenever the Public Works Director determines that it is reasonably available. During clearing, grading, earth moving or excavation, sufficient quantities of water, through use of either water trucks or sprinkler systems, shall be applied on-site to prevent dust from leaving the site. Each day, after construction activities cease, the entire area of disturbed soil shall be sufficiently moistened to create a crust.

Throughout construction, water trucks or sprinkler systems shall also be used to keep all areas of vehicle movement on-site damp enough to prevent dust raised from leaving the site. At a minimum, this will include wetting down such areas in the late morning and after work is completed for the day. Increased watering frequency will be required whenever the wind speed exceeds 15 mph. (AQ-2)

10. **Construction Dust Control – Tarping.** Trucks transporting fill material to and from the site shall be covered from the point of origin. (AQ-3)

11. **Gravel Pads.** Gravel pads shall be installed at all access points to the project site to prevent tracking of mud on to public roads. (AQ-4)

12. **Construction Dust Control – Stockpiling.** If importation, exportation and stockpiling of fill material are involved, soil stockpiled for more than two days shall be covered, kept moist, or treated with soil binders to prevent dust generation. (AQ-5)

13. **Construction Dust Control – Disturbed Area Treatment.** After clearing, grading, earth moving or excavation is completed, the entire area of disturbed soil shall be treated to prevent wind pickup of soil. This may be accomplished by:

   a. Seeding and watering until grass cover is grown;

   b. Spreading soil binders;
c. Sufficiently wetting the area down to form a crust on the surface with repeated soakings as necessary to maintain the crust and prevent dust pickup by the wind;

d. Other methods approved in advance by the Air Pollution Control District. (AQ-6)

14. **Expeditious Paving.** All roadways, driveways, sidewalks, etc., shall be paved as soon as possible. Additionally, building pads shall be laid as soon as possible after grading unless seeding or soil binders are used, as directed by the Building Inspector. (AQ-7)

15. **Street Sweeping.** The property frontage and adjacent property frontages, and parking and staging areas at the construction site shall be swept daily to decrease sediment transport to the public storm drain system and dust.

16. **Construction Best Management Practices (BMPs).** Construction activities shall address water quality through the use of BMPs, as approved by the Building and Safety Division.

17. **Groundwater/ Dewatering.** Water, when encountered in the excavation, shall be removed using a suitable dewatering system. A stockpile of 3- to 6-inch gabion rock material (approximately 10 to 20 cubic yards) shall be available when excavating near the property line in case a caving side wall or a boiling subgrade condition develops. In such a case, the rock must be placed on the caving excavation or the boiling subgrade until stabilization results. (W-5)

18. **Construction Equipment Maintenance.** All construction equipment, including trucks, shall be professionally maintained and fitted with standard manufacturers’ muffler and silencing devices:

   a. Heavy-duty diesel-powered construction equipment manufactured after 1996 (with federally mandated "clean" diesel engines) shall be utilized wherever feasible. (AQ-9)

   b. The engine size of construction equipment shall be the minimum practical size. (AQ-10)

   c. The number of construction equipment operating simultaneously shall be minimized through efficient management practices to ensure that the smallest practical number is operating at any one time. (AQ-11)

   d. Construction equipment shall be maintained in tune per the manufacturer’s specifications. (AQ-12)

   e. Construction equipment operating onsite shall be equipped with two to four degree engine timing retard or pre-combustion chamber engines. (AQ-13)

   f. Catalytic converters shall be installed on gasoline-powered equipment, if feasible. (AQ-14)
g. Diesel catalytic converters, diesel oxidation catalysts and diesel particulate filters as certified and/or verified by EPA or California shall be installed, if available. (AQ-15)

h. Diesel powered equipment shall be replaced by electric equipment whenever feasible. (AQ-16)

i. To the maximum extent feasible, biodiesel shall be used for all construction equipment. (AQ-17)

j. Idling of heavy-duty diesel trucks during loading and unloading shall be limited to five minutes; auxiliary power units shall be used whenever possible. (AQ-18)

k. **Construction Equipment Sound Barrier.** Stationary construction equipment that generates noise that exceeds 50 dBA at the property boundaries shall be shielded with a barrier that meets a sound transmission class (STC) rating of 25. (N-8)

l. **Construction Equipment Sound Control.** All construction equipment powered by internal combustion engines shall be properly muffled and maintained. No internal combustion engine shall be operated on the site without said muffler. All diesel equipment shall be operated with closed engine doors and shall be equipped with factory-recommended mufflers. Unnecessary idling of internal combustion engines shall be prohibited. (N-9)

m. **Construction Noise Barrier.** Air compressors and generators used for construction shall be surrounded by temporary acoustical shelters. Whenever feasible, electrical power shall be used to run air compressors and similar power tools. (N-10)

19. **Mitigation Monitoring Compliance Reports.** The PEC shall submit biweekly reports during demolition, excavation, grading and footing installation and biweekly reports on all other construction activity regarding MMRP compliance to the Community Development Department.

20. **Construction Contact Sign.** Immediately after Building permit issuance, signage shall be posted at the points of entry to the site that list the contractors and Project Environmental Coordinator's (PEC) name, contractor's and PEC's telephone number(s), work hours, site rules, and construction-related conditions, to assist Building Inspectors and Police Officers in the enforcement of the conditions of approval. The font size shall be a minimum of 0.5 inches in height.

21. **Tree Protection.** All trees not indicated for removal on the site plan shall be preserved, protected, and maintained, in accordance with the Tree Protection Plan, if required, and any related Conditions of Approval.

22. **Tree Protection.** Notes on the grading plan that specify the following:
a. No grading shall occur within three feet of the driplines of the existing tree(s).

b. A qualified Arborist shall be present during any excavation adjacent to or beneath the dripline of the tree(s) which (is) are required to be protected.

c. All excavation within the dripline of the tree(s) shall be done with hand tools.

d. Any roots encountered shall be cleanly cut and sealed with a tree-seal compound.

e. No heavy equipment, storage of materials or parking shall take place under the dripline of the tree(s).

f. Any root pruning and trimming shall be done under the direction of a qualified Arborist.

g. All trees within 25 feet of proposed construction activity shall be fenced three feet outside the dripline for protection.

23. **Existing Tree Preservation.** The existing tree(s) shown on the approved Tentative Subdivision Map to be saved shall be preserved and protected and fenced three feet outside the dripline during construction.

24. **Bird Nesting Protection.** Proposed project activities including tree and vegetation removal shall occur outside the breeding bird season (February 1 – August 15). If project activities cannot be feasibly avoided during the bird nesting season the project proponent shall conduct a survey prior to construction, using a qualified biologist, approved by the City Environmental Analyst, to detect protected nesting native birds in the vegetation and trees being trimmed and within 300 feet of the construction work area. The survey shall be conducted no more than three days before construction is initiated. If an active nest is located, construction within 500 feet of a raptor nest and 300 feet of any other nesting bird, vegetation trimming shall be postponed until the nest is vacated and juveniles have fledged and this has been confirmed by the qualified biologist. (BIO – 2)

25. **Graffiti Abatement Required.** Owner and Contractor shall be responsible for removal of all graffiti as quickly as possible. Graffiti not removed within 24 hours of notice by the Building and Safety Division may result in a Stop Work order being issued, or may be removed by the City, at the Owner's expense, as provided in SBMC Chapter 9.66.

26. **Unanticipated Archaeological Resources Contractor Notification.** Prior to the start of any vegetation or paving removal, demolition, trenching or grading, contractors and construction personnel shall be alerted to the possibility of uncovering unanticipated subsurface archaeological features or artifacts associated with past human occupation of the parcel. If such archaeological resources are encountered or suspected, work shall be halted immediately, the City
Environmental Analyst shall be notified and the applicant shall retain an archaeologist from the most current City Qualified Archaeologists List. The latter shall be employed to assess the nature, extent and significance of any discoveries and to develop appropriate management recommendations for archaeological resource treatment, which may include, but are not limited to, redirection of grading and/or excavation activities, consultation and/or monitoring with a Barbareño Chumash representative from the most current City qualified Barbareño Chumash Site Monitors List, etc.

If the discovery consists of possible human remains, the Santa Barbara County Coroner shall be contacted immediately. If the Coroner determines that the remains are Native American, the Coroner shall contact the California Native American Heritage Commission. A Barbareño Chumash representative from the most current City Qualified Barbareño Chumash Site Monitors List shall be retained to monitor all further subsurface disturbance in the area of the find. Work in the area may only proceed after the Environmental Analyst grants authorization.

If the discovery consists of possible prehistoric or Native American artifacts or materials, a Barbareño Chumash representative from the most current City Qualified Barbareño Chumash Site Monitors List shall be retained to monitor all further subsurface disturbance in the area of the find. Work in the area may only proceed after the Environmental Analyst grants authorization. (CR-1)

H. Prior to Certificate of Occupancy. Prior to issuance of the Certificate of Occupancy, the Owner of the Real Property shall complete the following:

1. Repair Damaged Public Improvements. Repair any damaged public improvements (curbs, gutters, sidewalks, roadways, etc.) subject to the review and approval of the Public Works Department per SBMC §22.60.090. Where tree roots are the cause of the damage, the roots shall be pruned under the direction of a qualified arborist.

2. Complete Public Improvements. Public improvements, as shown in the improvement/building plans, including utility service undergrounding and installation of street trees.

3. Record Drawings. Submit Record Drawings identifying “asbuilt” conditions of public improvements to the Public Works Inspector for verification and approval.

4. Fire Hydrant Replacement. Replace existing nonconforming type fire hydrants with commercial-type hydrants described in Standard Detail 6-003.1 Paragraph 2 of the Public Works Department Standard Details.

5. Manholes. Raise all sewer and water manholes on easement to final finished grade.

6. Noise Measurements. Submit a final report from a licensed acoustical engineer, verifying that interior and exterior living area noise levels are within acceptable levels as specified in the Noise Element. In the event the noise is not mitigated to
acceptable levels, additional mitigation measures shall be recommended by the noise specialist and implemented subject to the review and approval of the Building and Safety Division and the Architectural Board of Review (ABR).

7. **Existing Street Trees.** Submit a letter from a qualified arborist, verifying that the existing street trees have been properly pruned and trimmed.

9. **Evidence of Private CC&Rs Recordation.** Evidence shall be provided that the private CC&Rs required in Section A have been recorded.

K. **Litigation Indemnification Agreement.** In the event the Planning Commission approval of the Project is appealed to the City Council, Applicant/Owner hereby agrees to defend the City, its officers, employees, agents, consultants and independent contractors ("City's Agents") from any third party legal challenge to the City Council's denial of the appeal and approval of the Project, including, but not limited to, challenges filed pursuant to the California Environmental Quality Act (collectively "Claims"). Applicant/Owner further agrees to indemnify and hold harmless the City and the City's Agents from any award of attorney fees or court costs made in connection with any Claim.

Applicant/Owner shall execute a written agreement, in a form approved by the City Attorney, evidencing the foregoing commitments of defense and indemnification within thirty (30) days of the City Council denial of the appeal and approval of the Project. These commitments of defense and indemnification are material conditions of the approval of the Project. If Applicant/Owner fails to execute the required defense and indemnification agreement within the time allotted, the Project approval shall become null and void absent subsequent acceptance of the agreement by the City, which acceptance shall be within the City's sole and absolute discretion. Nothing contained in this condition shall prevent the City or the City's Agents from independently defending any Claim. If the City or the City's Agents decide to independently defend a Claim, the City and the City's Agents shall bear their own attorney fees, expenses, and costs of that independent defense.

**NOTICE OF COASTAL DEVELOPMENT PERMIT TIME LIMITS:**

[Note: Because other approvals are subordinate to the Coastal Development Permit (CDP), the CDP time limits apply to all approvals.]

The Planning Commission's action approving the Coastal Development Permit shall expire two (2) years from the date of approval, per Santa Barbara Municipal Code §28.45.009.q, unless:

1. Otherwise explicitly modified by conditions of approval of the development permit, or unless construction or use of the development has commenced.

2. A Building permit for the work authorized by the coastal development permit is issued prior to the expiration date of the approval.
3. A one (1) year time extension may be granted by the Planning Commission if the construction authorized by the permit is being diligently pursued to completion and issuance of a Certificate of Occupancy. Not more than three (3) extensions may be granted.

NOTICE OF DEVELOPMENT PLAN TIME LIMITS:
The development plan approved, per Santa Barbara Municipal Code §28.87.350, shall expire four (4) years from the date of approval unless:

1. A building or grading permit for the work authorized by the development plan is issued prior to the expiration date of the approval.

2. A time extension is granted by the Planning Commission for one (1) year prior to the expiration date of the approval, only if it is found that there is due diligence to implement and complete the proposed project. No more than one (1) time extension may be granted.

NOTICE OF TENTATIVE SUBDIVISION MAP (INCLUDING NEW CONDOMINIUMS AND CONDOMINIUM CONVERSIONS) TIME LIMITS:
The Planning Commission's action approving the Tentative Map shall expire two (2) years from the date of approval. The subdivider may request an extension of this time period in accordance with Santa Barbara Municipal Code §27.07.110.
