**APPLICATION OF SETH SHANK, SANTA BARBARA COUNTY FLOOD CONTROL DISTRICT,

SLOUGH RESERVE, AND COASTAL OVERLAY ZONES, GENERAL PLAN DESIGNATION:
MAJOR PUBLIC AND INSTITUTION AND RECREATIONAL OPEN SPACE (MST 2010-000379,
CDP2010-00008)**

The Goleta Slough Sediment Basin Dredging Project consists of the continued maintenance of two sediment basins in the Goleta Slough immediately south of Hollister Avenue on Santa Barbara Airport property. Specifically the project would involve dragline desilting of approximately 21,300 cubic yards of sediment from a crane staged on the adjacent access road, stockpiling sediment, hauling sediment off-site. Generally dredging at each site would occur once every 2 years. One site would be dredged at a time. However emergency dredging would occur as needed.

This project is part of a larger Flood Control effort that dredges five sediment basins (three in County jurisdiction and two in the City of Santa Barbara), as well as two sediment disposal sites in unincorporated Santa Barbara County. The Tecolotito Creek and Carneros Creek sediment basins are the only portion of this effort in City of Santa Barbara jurisdiction. The purpose of this effort is to prevent the loss of life and property that could occur during peak storm flooding and to prevent the gradual sedimentation of the Goleta Slough.

The discretionary applications required for this project are a Coastal Development Permit and a Goleta Slough Coastal Development Permit (CDP2010-00008) to allow the continued routine dredging of the Tecolotito Creek and Carneros Creek Sediment Basins in the Appealable Jurisdiction of the City's Coastal Zone (SBMC §28.45.009 and §29.25.030).

The Planning Commission will review a Final Subsequent Environmental Impact Report as a responsible agency with permit authority for the portion of the project in City of Santa Barbara jurisdiction pursuant to the California Environmental Quality Act Guidelines §15096.
