Facility needs for safety, general aviation, and vehicle and aircraft parking are primary considerations for the Airport Master Plan Concept.

The proposed ordinance would prohibit stores selling food and pharmacies from providing plastic carryout bags, and would assess a 10-cent charge on recyclable paper bags provided by the stores at the point of sale, with the intent of reducing existing environmental impacts from plastic bag use. The Environmental Impact Report analyzed effects associated with air quality, biological resources, greenhouse gas emissions, hydrology and water quality, water, wastewater, solid waste, and storm water systems, and concluded that no significant environmental effects would result, and no measures to reduce impacts are required.

The Planning Commission will receive a staff presentation, conduct a public hearing, and consider certification of the Final Environmental Impact Report for the proposed Single-Use Carryout Bag Ordinance.
