## MTD Report to Santa Barbara on City-Assisted Services May 2009 Monthly Report

The City of Santa Barbara provides funding to the Santa Barbara Metropolitan Transit District (MTD) to assist in supporting several MTD bus routes. This report, prepared pursuant to Agreements No. 22,278 and No. 22,829, provides the City with data regarding MTD shuttle services in Santa Barbara, MTD South Coast Transit Priorities routes supported by the City, and core MTD routes assisted by the City through the Enhanced Transit Program.

### MTD RIDERSHIP & REVENUE HOURS

Table 1 presents the ridership of each City-assisted MTD route for May 2009 and for fiscal year (FY) 2009 to date. (The MTD fiscal year runs from July 1 through June 30.) The table also presents ridership for the corresponding periods of the previous fiscal year, as well as the percent change in ridership over the previous year. May 2009 had 20 weekdays and 11 weekend days, while May 2008 had 21 weekdays and 10 weekend days. **The Jesusita fire depressed ridership substantially; system ridership from May 8 to May 10 combined was down by 26 percent.**

**TABLE 1  
MTD Routes Assisted by Santa Barbara - Ridership**

Line	Current Month		Fiscal Year to Date		Percent Change	
	FY 2009 May 2009	FY 2008 May 2008	FY 2009 Jul-May	FY 2008 Jul-May	Current Month	FY To Date
<b>Shuttle Services</b>

Table 2 shows the number of revenue hours that MTD operated on each City-assisted route in May 2009 and for fiscal year 2009 to date, along with corresponding data from the previous fiscal year for comparison. The table also presents ridership per revenue hour for each route for the current month and the corresponding month of the previous fiscal year.

### Shuttle Services

The City provides a fare-buydown subsidy to MTD for clean and quiet 22-ft. electric shuttle services to meet downtown Santa Barbara traffic-reduction goals:

- *Downtown-Waterfront Shuttle.* The Downtown service operates along State Street from Sola Street to Cabrillo Boulevard, and the Waterfront service operates along Cabrillo Boulevard from the harbor to the zoo. The one-way fare is \$0.25. Transfers between State Street and the Waterfront are free.
- *Carrillo Lot Shuttle.* Weekday peak-period service subsidized by the City as an incentive to attract downtown employees to park in the commuter lot. The service is free for commuter lot parkers, and \$0.25 for other riders.

### Downtown-Waterfront Shuttle

As shown in Table 1, total ridership on the Downtown-Waterfront Shuttle increased from 43,347 passengers in May 2008 to 44,631 in May 2009, representing a 3.0 percent increase. Ridership increased on both State Street

and the Waterfront. Unlike most public transit services, ridership on the Downtown-Waterfront Shuttle tends to be greater on weekends than on weekdays. Much of the increase likely results from an additional weekend day in May 2009.

Table 2 shows that total revenue hours operated on the Downtown-Waterfront Shuttle also increased, from 1,297 in May 2008 to 1,342 in May 2009. This is a reflection of one additional weekend day. Riders per hour decreased slightly, from 33.4 in May 2008 to 33.3 in May 2009. The service generated \$9,559.25 in fare revenue in May 2008, increasing to \$9,775.75 in May 2009.

### *Downtown-Waterfront Shuttle Ten-Year Trend*

Tables 3A, 3B, and 3C present ten-year combined Downtown-Waterfront Shuttle trends in ridership, revenue hours, and passengers per revenue hour, respectively. (Through October 2008, the data also include the discontinued Wharf Woody.) The tables show that, over the entire ten-year period, annual ridership has decreased while annual revenue hours have remained relatively constant. However, the most recent few years have shown less variation in ridership.

The primary market for the Downtown-Waterfront Shuttle differs from that for a typical public transportation service. In general terms, the primary market for this shuttle service is tourists and local residents who are shopping, dining, sightseeing, or enjoying other recreational activities downtown and on the waterfront. Thus, shuttle ridership is heavily dependent on the convenience of the service and on the number of persons spending leisure time in these areas. Some factors affecting ridership on the service are discussed below.

### *Traffic Congestion*

The time required to complete a trip on the Downtown-Waterfront Shuttle has increased over time as traffic congestion has worsened. A round trip on the State Street portion of the service (i.e., from the Dolphin Fountain to Sola Street and back to the Dolphin Fountain), for example, formerly required from 30 to 35 minutes, depending on the season and the time of day. Now, a round trip requires up to 45 minutes at peak times.

Because MTD operates the same number of vehicles and approximately the same number of revenue hours annually, the number of trips provided during a typical day has decreased due to the increase in congestion and in the time required for each trip. Thus, over the ten-year period, the travel time has increased and the frequency of service has decreased. These factors make the service less appealing, and undoubtedly account for some of the decrease in riders over time.

### *Service Disruptions due to State Street Pedestrian Improvements*

Between 1999 and 2007, the City Redevelopment Agency installed new brick sidewalks, updated street furniture, and enhanced landscaping on State Street between Gutierrez and Victoria Streets. These improvements, which were constructed in four phases, improved pedestrian amenities and helped to revitalize the State Street corridor. However, closures of portions of State Street during construction of the improvements required the Downtown-Waterfront Shuttle to detour to Chapala and Anacapa Streets. The State Street service was much less convenient during these detours, which likely contributed to the general decrease in ridership during the 10-year period.

### *Tourism*

The Downtown-Waterfront Shuttle (DWE) is quite popular with tourists, and a change in the number of visitors to Santa Barbara's downtown and waterfront areas has a major impact on ridership. Annual lodging occupancy rates, shown in Figure 1, are a good indicator of annual changes in the number of tourists visiting the area.

**FIGURE 1**  
**Calendar Years 1999 Through 2008**  
**Shuttle Ridership & Hotel / Motel Occupancy**

Source: Santa Barbara Metropolitan Transit District.

The figure presents average annual South Coast hotel / motel occupancy rates for the period from 1999 to 2008 from the *Santa Barbara County Economic Outlook 2007* (Table 20, p. 186), and average annual Downtown-Waterfront Shuttle ridership per revenue hour for the same period. (In order to match the occupancy data, shuttle ridership and revenue hour data used to calculate ridership per hour for this discussion are for calendar years rather than fiscal years. The data also include the discontinued Wharf Woody service.)

As the figure shows, the two measures have similar trend lines. By far the greatest decrease in both ridership and hotel / motel occupancy occurred between 2000 and 2002, following the terrorist attacks of September 11, 2001. A comparison of month-by-month ridership (Table 3A) reveals that for 12 of the 13 months beginning September 2001, ridership significantly decreased compared to the same month of the previous year. Neither the lodging occupancy rate nor shuttle ridership has returned to pre-9/11 levels.

The factors discussed above (increased traffic congestion, service disruptions, and decreased tourism) have undoubtedly contributed to the general decrease in ridership on the Downtown-Waterfront Shuttle over the ten-year period. MTD staff will continue marketing efforts to increase ridership.

#### *Downtown-Waterfront Shuttle Marketing & Public Information*

- Passenger information cards with detachable perforated pocket-sized schedules are distributed at 36 locations along the route, including lodging establishments and the Visitors' Center.
- MTD staff attends Cabrillo Boulevard and State Street hotel staff meetings to conduct individualized marketing regarding the Downtown-Waterfront Shuttle.
- Food & Home Magazine features the shuttle in their regular article, "A Perfect Day in Downtown Santa Barbara."
- The shuttle route is featured in all "Santa Barbara Car Free" collateral. Flyers are available on all Amtrak Surfliner trains.
- The "Santa Barbara Car Free" brochure for the MTD's Line 22 service to "Santa Barbara's Highlights" features the Downtown-Waterfront Shuttle as a connection from the beach to Line 22.
- The Downtown-Waterfront Shuttle route is featured on the map in the explore section of Santa Barbara Seasons magazine.
- Partnership website links are provided by "Santa Barbara Car Free," Amtrak, the Santa Barbara Conference & Visitors Bureau and Film Commission, and the Downtown Organization.
- The Downtown-Waterfront Shuttle route is featured in the "Cultural Arts" brochure produced by the Downtown Organization.
- MTD is an active member of the Santa Barbara Conference & Visitors Bureau and Film Commission, and works with the Bureau to publicize the shuttle.

- All Downtown-Waterfront Shuttle vehicles display City of Santa Barbara seals.
- Amtrak passengers can request two free MTD transfers from the conductor.

### Carrillo Commuter Lot Shuttle

As shown in Table 1, Carrillo Lot Shuttle ridership decreased from 2,079 passengers in May 2008 to 1,542 in May 2009. The service operates on weekday service days only, and operated on 20 weekdays in May 2009 and 21 in May 2008. Thus, a portion of the decrease is due to one fewer day of operation in May 2009. The service transported an average of 20.2 passengers per revenue hour in May 2008 and decreased to 15.4 in May 2009.

The Carrillo commuter parking lot is generally not filled to capacity and often has as many as 20 to 30 spaces free. MTD staff will continue to monitor the performance of the service and will continue discussions with City Parking staff regarding the monthly variability in ridership.

### **South Coast Transit Priorities**

MTD implemented two new routes within the City of Santa Barbara as part of the South Coast Transit Priorities (SCTP) project:

- *Crosstown Shuttle*. Utilizes clean and quiet 22-ft. electric shuttles to connect the Eastside via Cota Street and the Westside via Micheltorena Street with downtown Santa Barbara. Also serves the Cota Commuter Lot.
- *Line 4 – Mesa/SBCC (formerly called Mesa Loop)*. Utilizes biodiesel in clean-burning 29-ft. buses to connect downtown Santa Barbara and the Mesa via Carrillo Street and Cliff Drive. Also serves Santa Barbara City College.

The SCTP project was initially funded with a federal Congestion Mitigation and Air Quality Improvement (CMAQ) grant awarded to MTD. The City is currently subsidizing the operation of the Crosstown Shuttle, and has agreed to subsidize operation of Line 4 when the CMAQ funds run out. The City has also provided MTD with capital assistance for new buses for Line 4, and has agreed to provide capital assistance for the Crosstown Shuttle.

Beginning in May 2007, MTD uses a biodiesel blend in all diesel-powered buses. Biodiesel is a renewable fuel manufactured from vegetable oils, animal fats, or recycled cooking oils. There are a number of benefits from the use of biodiesel, including reduced dependence on imported oil, improved engine lubricity, and reductions in particulate matter, hydrocarbon, carbon monoxide, and greenhouse gas emissions. As of November 2007, MTD uses B20 fuel, a blend of 20 percent biodiesel and 80 percent petrodiesel.

The variability in the cost of fuel has a major impact on MTD. The average cost to MTD for a gallon of fuel was substantially less in May 2009 than in May 2008.

## Crosstown Shuttle

Following implementation of the Enhanced Transit Program in March 2007 (described below), Crosstown Shuttle ridership decreased compared to the previous year. This was to be expected, as the Crosstown Shuttle is a complementary service to Lines 1 & 2 and the enhanced peak-period service on those lines attracted some riders that previously rode the Crosstown Shuttle. In recent months, Crosstown Shuttle ridership has generally begun to increase.

Table 1 shows that ridership on the Crosstown Shuttle decreased from 13,212 riders in May 2008 to 12,956 riders in May 2009. The Crosstown Shuttle operates on weekday service days only, and operated on 20 weekdays in May 2009 and 21 weekdays in May 2008. The small decrease in ridership is likely the result of one fewer day of operation in May 2009.

In recent years, MTD increased the number of revenue hours operated on the Crosstown Shuttle to compensate for the additional time needed to complete a trip due to increased traffic congestion. Although the additional revenue hours increased the cost to MTD, MTD does not bill the City for the additional hours.

As is shown in Table 2, Crosstown Shuttle revenue hours decreased from 620 in May 2008 to 584 in May 2009, reflecting one fewer day of operation. The average number of passengers per hour increased from 21.3 in May 2008 to 22.2 in May 2009.

Tables 4A, 4B, and 4C present monthly ridership, revenue hours, and passengers per hour for the Crosstown Shuttle since the implementation of the service in late July 2001.

## Line 4 - Mesa/SBCC

This route was called the Mesa Loop until a reconfiguration and name change in August 2008. MTD implemented Line 4 as a stand-alone route in March 2007. (MTD implemented a small-scale version of the service in September 2003, incorporated into Line 5, which provided a limited number of short "express" Line 5 weekday peak period trips between downtown and the Mesa.)

Line 4 also operates on weekday service days only, and operated on 20 weekdays in May 2009 and 21 weekdays in May 2008. Line 4 carried 10,035 passengers in May 2008 and increased slightly to 10,410 passengers in May 2009, for a 3.7 percent increase.

The number of revenue hours increased from 308 in May 2008 to 335 in May 2009, reflecting the reconfiguration of the route. The route carried an average of 31.1 riders per revenue hour in May 2009, a decrease from the 32.6 passengers per hour carried in May 2008.

## Enhanced Transit Program

During ongoing service evaluations, MTD staff identified various routes with a number of trips that were carrying excessive passenger loads. Bus drivers were often forced to leave passengers at bus stops because the bus was too full to safely board additional passengers. Beginning in March 2007, the City assisted MTD with funding to enhance service on several core MTD routes to alleviate these overloads:

- *Line 1 - Westside & Line 2 - Eastside.* Utilizes B20 biodiesel in clean-burning 40-ft. hybrid diesel-electric buses for enhanced peak-period service to downtown Santa Barbara. Line 1 connects the upper Westside to the San Andres corridor, west Carrillo Street, and downtown. Line 2 connects the lower Eastside to the Milpas Street corridor, east Anapamu Street, and downtown.
- *Line 6 - State/Hollister/Goleta & Line 11 - State/Hollister/UCSB.* Utilizes B20 biodiesel in clean-burning 40-ft. buses for enhanced peak-period service from downtown Santa Barbara to Upper State Street, the Eastern Goleta Valley, the City of Goleta, and the University of California at Santa Barbara (UCSB). Both routes follow State Street from downtown Santa Barbara to Hollister Avenue at Fairview. Line 6 continues along Hollister Avenue to Camino Real Marketplace, while Line 11 turns south on Fairview Avenue and travels to the airport and UCSB. (Santa Barbara County, Goleta, and UCSB also provide financial assistance to MTD for the Lines 6 & 11 enhancement.)
- *Line 3 - Oak Park.* Utilizes B20 biodiesel in clean-burning 29-ft. buses for enhanced weekday service connecting downtown Santa Barbara to Santa Barbara Cottage Hospital, upper State Street, and La Cumbre Plaza, via Bath and Castillo Streets, the Samarkand area, and Las Positas Road.

### Line 1 - Westside & Line 2 - Eastside

In addition to utilizing a B20 biodiesel blend (as discussed under South Coast Transit Priorities above), most of the buses operated on Lines 1 & 2 are hybrid diesel-electric vehicles. These buses are quieter, use less fuel, and produce fewer pollutants than straight diesel buses.

Lines 1 & 2 were enhanced to provide service every 10 minutes during weekday morning and afternoon peak periods (compared to the previous schedule of every 15 minutes). As shown in Table 1, total combined ridership on Lines 1 & 2 decreased from 118,914 passengers in May 2008 to 101,405 in May 2009, for a 14.7 percent decrease.

A portion of the decrease is due to one fewer weekday in May 2009, as well as to the Jesusita fire (as discussed at the beginning of this report). Ridership on Lines 1 & 2 continues to reflect an increase in average daily riders compared to ridership before implementation of the enhancement. Average weekday peak-period ridership in May 2009 totaled 1,956 riders, compared to 1,793 daily peak-period riders in the May before implementation. This represents a 9.1 percent increase in peak-period riders.

Table 2 shows that combined Lines 1 & 2 revenue hours decreased from 2,209 in May 2008 to 2,167 in May 2009, reflecting one fewer weekday. The average number of riders per revenue hour decreased from 53.8 in May 2008 to 46.8 in May 2009.

#### Line 6 - State/Hollister/Goleta & Line 11 - State/Hollister/UCSB

Lines 6 & 11 were enhanced to provide alternating service every 10 minutes during weekday morning and afternoon peak periods, from downtown Santa Barbara to Hollister at Fairview (compared to the previous schedule of every 15 minutes). Line 6 continuing to Camino Real Marketplace and Line 11 continuing to the airport and UCSB now run every 20 minutes during weekday peak periods (compared to the previous schedule of every 30 minutes).

Table 1 shows that total combined ridership on Lines 6 & 11 decreased from 168,143 riders in May 2008 to 155,338 in May 2009, for a 7.6 percent decrease. As presented in Table 2, combined Lines 6 & 11 revenue hours decreased slightly, from 3,589 in May 2008 to 3,549 in May 2009. The average number of riders per revenue hour decreased from 46.8 in May 2008 to 43.8 in May 2009.

As with Lines 1 & 2, a portion of the Lines 6 & 11 ridership decrease is due to one fewer weekday in May 2009, as well as to the Jesusita fire. Ridership on Lines 6 & 11 continues to reflect an increase in average daily riders over the ridership before implementation of the enhancement. Average weekday peak-period ridership in May 2009 totaled 2,427 riders, compared to 2,193 daily peak-period riders in the May before implementation. This represents a 10.7 percent increase in peak-period riders.

#### Line 3 - Oak Park

Line 3 was enhanced to run every 20 minutes all day long on weekdays (compared to the previous schedule of every 30 minutes). As shown in Table 1, ridership on Line 3 decreased from 30,888 passengers in May 2008 to 28,642 in May 2009. Again, the Jesusita fire and one fewer weekday in May 2009 account for a portion of the decrease.

Line 3 revenue hours decreased from 960 hours in May 2008 to 938 hours in May 2009, reflecting one fewer weekday. The average number of riders per revenue hour decreased from 32.2 in May 2008 to 30.6 in May 2009.

Again, Line 3 ridership continues to reflect an increase in average daily riders over the ridership before implementation of the enhancement. Average weekday ridership in May 2009 totaled 1,265 riders, compared to 994 daily riders in the May before implementation. This represents a 27.3 percent increase in total daily ridership.
