

Santa Barbara City Fire Department

Bulletin No. 17-08

Date: March 1, 2017

To: All Department Members

Subject: Station 5 Fuel Log

This bulletin is to inform personnel getting diesel fuel at Station 5 to log the amount of fuel pumped onto the fuel log on the clipboard next to the pump. It is important to keep accurate records of fuel use and this should be an easier and more accurate way for engineers and other drivers to log the fuel use. Drivers no longer need to enter fuel use electronically (it just wasn't working). Please enter all your fuel use manually onto the paper fuel log on the clipboard. The clipboard can be found in the metal box on the yellow post next to the fuel pump. Thanks.

Patrick J. McElroy, Fire Chief
