Date: June 21, 2018

To: All Department Members

Subject: Elevator Rescue  
Response Change

---

Effective immediately, the Combined Communications Center will be dispatching only one engine and Truck 1 to all Elevator Rescues. The response change has already been made in CAD. If there is any need for more resources, the first on-scene unit will amend the response. The BC may respond in some circumstances to coordinate the rescue, however, will only monitor the call until requested. If there is a confirmed medical emergency through dispatch, AMR should also be dispatched.

SOP E-X-8 has been updated to reflect the change.

Thank you,

Lee Waldron, Acting Fire Chief

By

Tony Pighetti, Acting Administrative Battalion Chief
