

# City of Santa Barbara Fire Prevention Bureau High Fire Hazard Area Desirable Plant List

Desirable Qualities for Landscape Plants within the City's High Fire Hazard Areas:

- Ability to store water in leaves or stems
- Produces limited dead and fine material
- Extensive root systems for controlling erosion
- High levels of salt or other compounds within its tissues that can contribute to fire resistance
- Ability to withstand drought
- Prostrate or prone in form
- Ability to withstand severe pruning
- Low levels of volatile oils or resins
- Ability to resprout after a fire

## PLANT LIST LEGEND

### Water Needs

H-High  
M-Moderate  
L-Low  
VL-Very Low

### Evergreen/Deciduous

E-Evergreen  
D-Deciduous  
E/D-Partially or Summer  
Deciduous

## COMMENT CODE

- |    |   |    |  |
|----|---|----|--|
| 1  | Not for use in coastal areas                                    | 13 | Tends to be short lived  |
| 2  | Should not be used on steep slopes                              | 14 | High fire resistance   |
| 3  | May be damaged by frost   | 15 | Tolerant of heavy pruning  |
| 4  | Should be thinned bi-annually to remove dead or unwanted growth | 16 | Dead fronds or leaves need to be removed to maintain fire safety |
| 5  | Good for erosion control  | 17 | Must be cut back after flowering                                 |
| 6  | Grows best in well drained soils                                | 18 | May require partial shade in desert or valley areas              |
| 7  | Produces habitat or food for wildlife                           | 19 | Perennial  |
| 8  | Adaptability can vary   | 20 | Tolerates saline soils   |
| 9  | Can be used as a lawn substitute                                | 21 | Grows naturally in riparian areas                                |
| 10 | Showy flowers   | 22 | Good tree for lawns  |
| 11 | Produces edible fruit   | 23 | Produces flowers or fruit that attracts birds and or butterflies |
| 12 | Native or native cultivar                                       |    |  |

The following plant list is provided as a **SUGGESTED GUIDELINE** (not exclusive) for landscaping within the High Fire Hazard area. Use this guide as a **REFERENCE** in landscape planning. Other plants may be used such as grasses, annuals etc., but should follow the landscape zone recommendations for arrangement of plantings. Check spacing requirements and setback recommendations carefully. Additionally, all landscaping projects that go through Design Review must follow the Landscape Design Standards for Water Conservation, [www.SantaBarbaraCA.gov/LandscapeDesignStandards](http://www.SantaBarbaraCA.gov/LandscapeDesignStandards). Residential projects need 80% of all new landscaped area be low (L) or very low (VL) water using plants; commercial projects need 100% L/VL water using plants.

Santa Barbara City Fire Department  
925 Chapala St.  
Santa Barbara, CA, 93101  
(805) 564-5702

The desirable planting list was based on comments from numerous professionals and public agencies, Sunset Western Garden Book, Bob Perry's Landscape Plants for Western Regions. Plant water use designations are from the California Department of Water Resources', WUCOLS IV (Water Use Classification of Landscape Species).
