

Thompson Avenue Improvements

2001A Bond Fund

Project Description

Improvements to the plaza area adjacent to the Lyons Moving and Storage Building in downtown included sidewalk repair and replacement, landscaping, trash enclosure expansion, paseo improvements and general street improvements. The street and sidewalk are constructed of a colored concrete that provides a pedestrian-friendly environment that has the entire layout on one level acting more a pedestrian thoroughfare as opposed to a City street. The Agency and Brooks Institute entered into an agreement to reimburse Brooks up to \$200,000 for these public improvements.
