

## Slurry Seal Treatments on City Streets

Beginning on May 20, 2020, Lash Construction, Inc. will be implementing slurry seal treatments on various high priority streets throughout the City as part of the FY20A Pavement Maintenance Project. This preventative maintenance operation will extend the life of the roadways, while creating a smoother road surface. The slurry work and striping of the streets is scheduled for completion approximately late June 2020.

Tentative dates for work on high-profile streets are as follows:

- Anacapa Street from Micheltorena to Constance: 5/20/20 – 6/1/20
- Cliff Drive between Las Positas Road and Marina Drive and Alameda Padre Serra from Los Olivos to Dover Road: 6/1/20 – 6/19/20

No Parking signs will be posted at least 72 hours in advance of the work. The public is advised to respect and adhere to the No Parking notices in order to avoid having their vehicles towed.

Slurry seal treatments can typically be completed within one working day. The public may use the street once No Parking signs have been removed from the area at the end of the day.

We greatly appreciate the public's cooperation and apologize for any inconvenience.
