

Building Size 0.25 – Detached single-family housing.

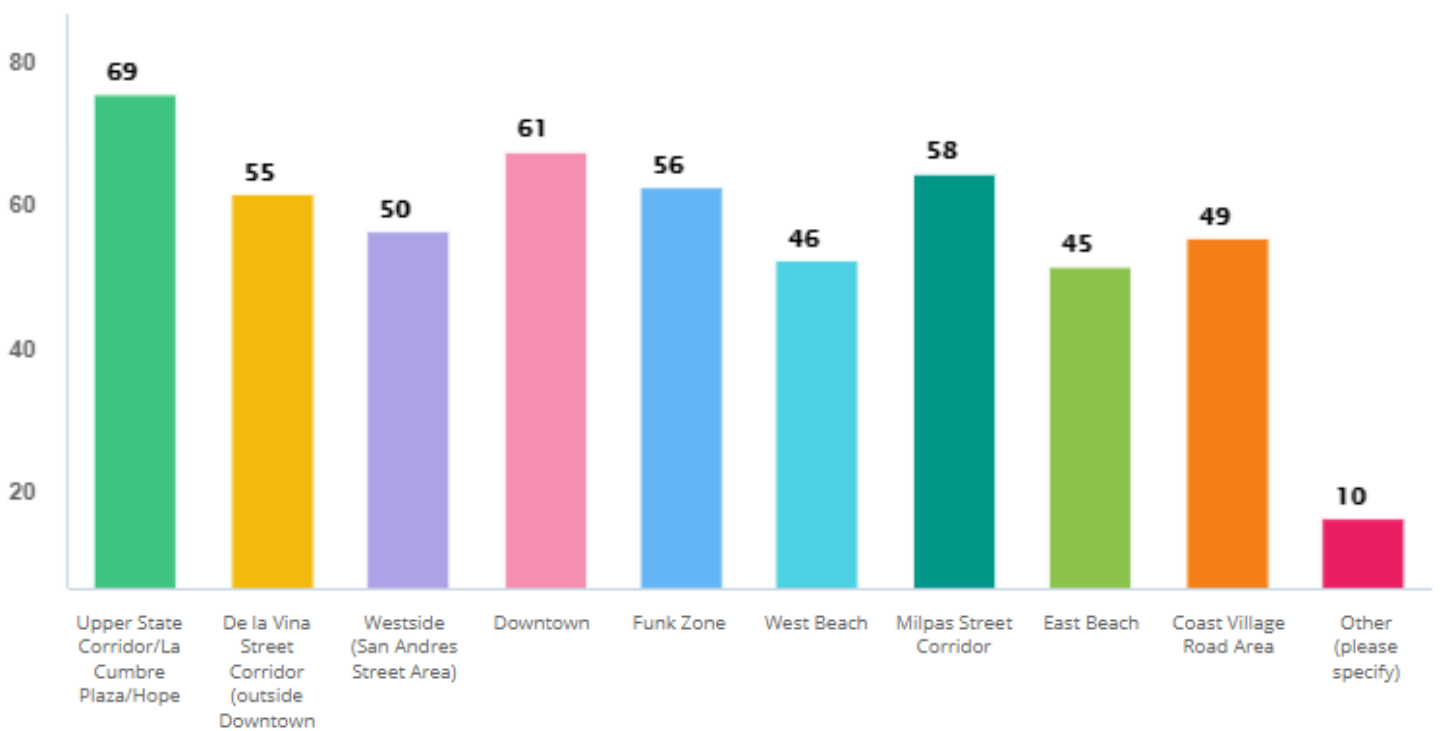

Other Comments: None of the R3 zones; they are too small; Bungalow district; None, Mesa; I believe suburban scale single-family development is no longer appropriate for new housing in urban areas; San Roque; Upper East Side; East of Milpas area; we should build no more new housing of this type; It is not appropriate along any corridor or major thoroughfare; Upper East side; Mesa, Upper East, Lower East, Riviera, San Roque, Oak Park, etc.; Anywhere for single families/affordable for renters; Any size buildings should be allowed in any area, but the city should prioritize the building of large, dense, below-market-rate housing to lower rents and take pressure off of working people; Eastside - Salinas Street corridor; Eastside - not sure where East BEACH ends; San Roque.

Building Size 0.5 - Smaller-sized projects; usually one-story; sometimes with two stories in the rear of the lot. Could be single-housing units or share walls. Parking or open space usually in the center of the units.

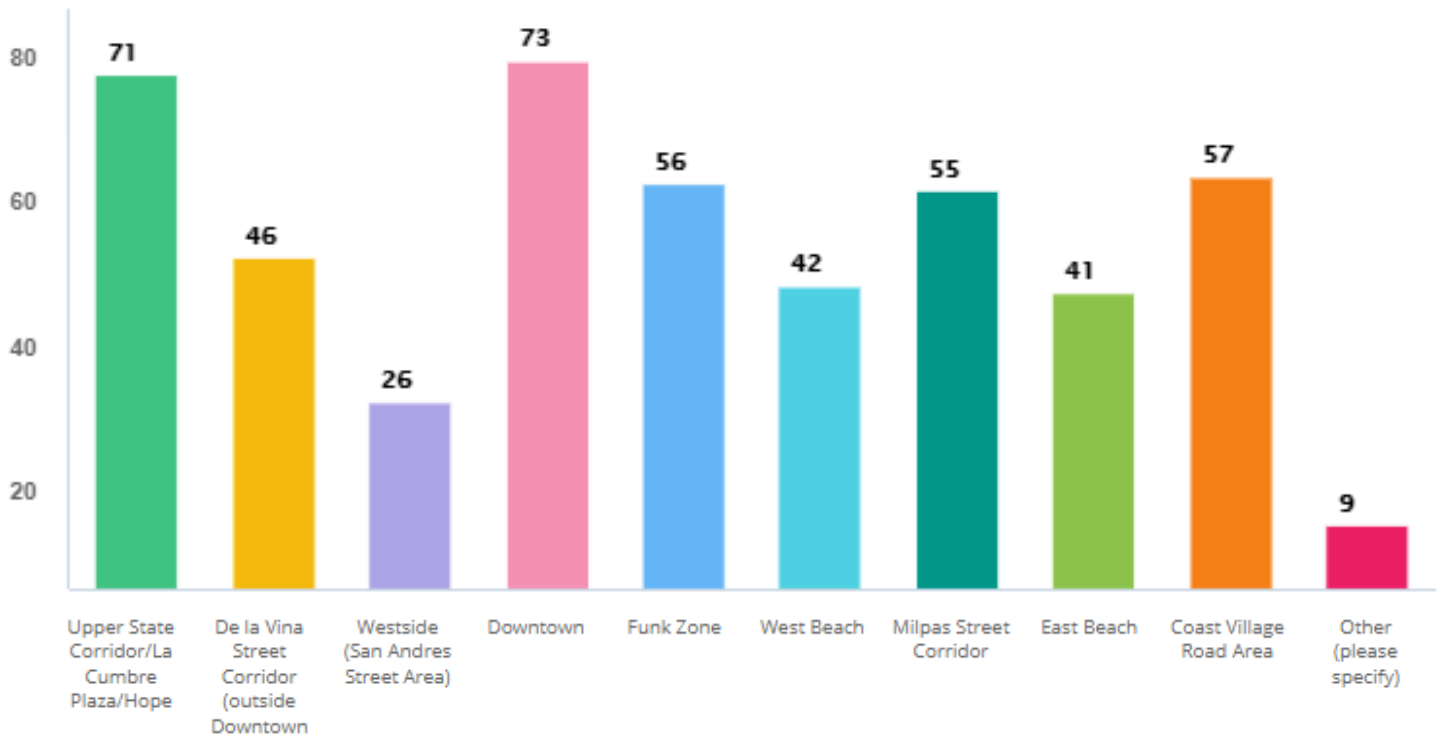

Other Comments: too small for most places; east of Milpas; West Beach; East Beach; Downtown; De la Vina Street Corridor (outside Downtown); Anywhere for single familys/affordable for renters; Any size buildings should be allowed in any area; but the city should prioritize the building of large; dense; below-market-rate housing to lower rents and take pressure off of working people; Lower Westside; San Roque; Upper East Side.

Building Size 1.0 - Medium-sized projects of 2 stories; often with garages on the first floor; open space; and/or parking in the center or behind the buildings.

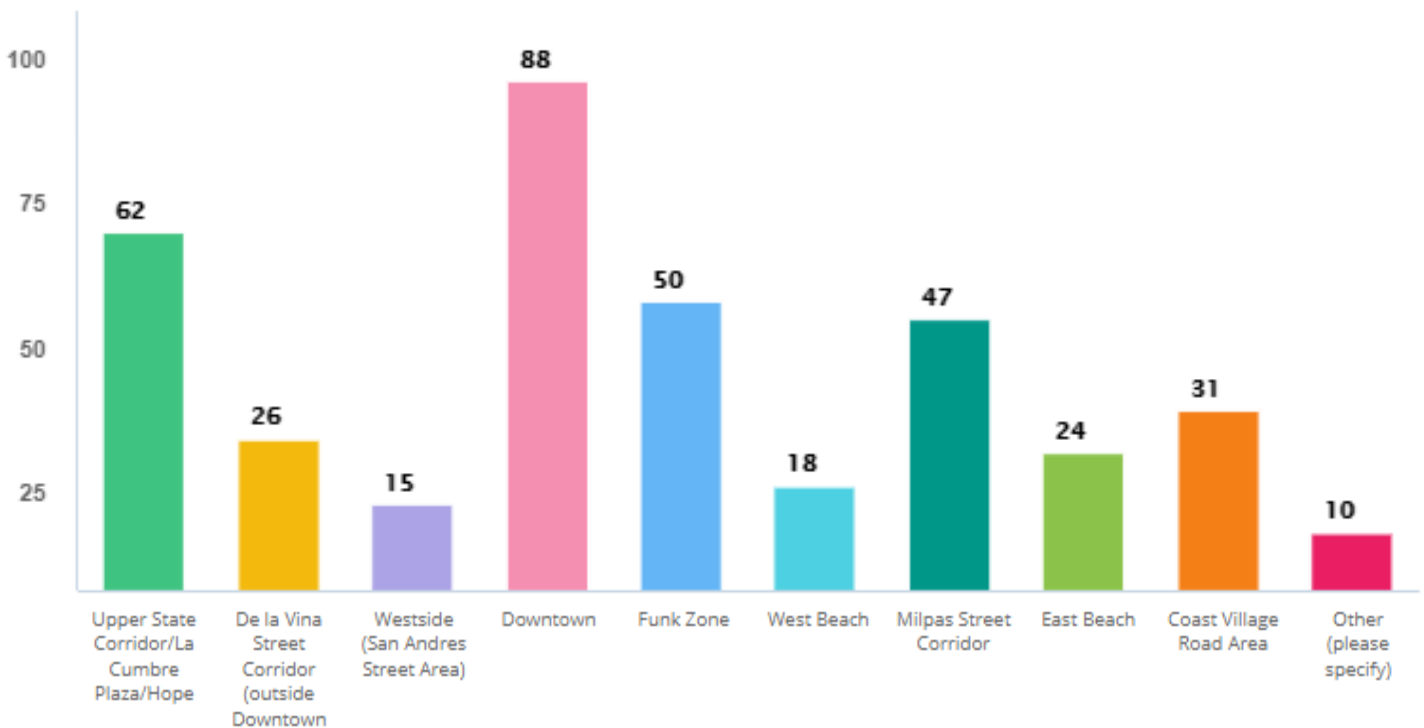

Other Comments: Los Angeles, Pacoima; everywhere in SB!; None; No neighborhood in Santa Barbara should have buildings this dense; Westside (San Andres Street Area); Monolithic, not set back: Industrial & manufacturing zones only; Anywhere only If inclusive of affordable housing; Multi family units are needed desperately throughout the city; Any size buildings should be allowed in any area, but the city should prioritize the building of large, dense, below-market-rate housing to lower rents and take pressure off of working people; Haley St. Corridor; San Roque, Santa Barbara Annex, Oak Park.

Building Size 1.5 - Larger projects of 2-3 stories; often with ground floor commercial space; may be built to the property lines with interior or rooftop open space.

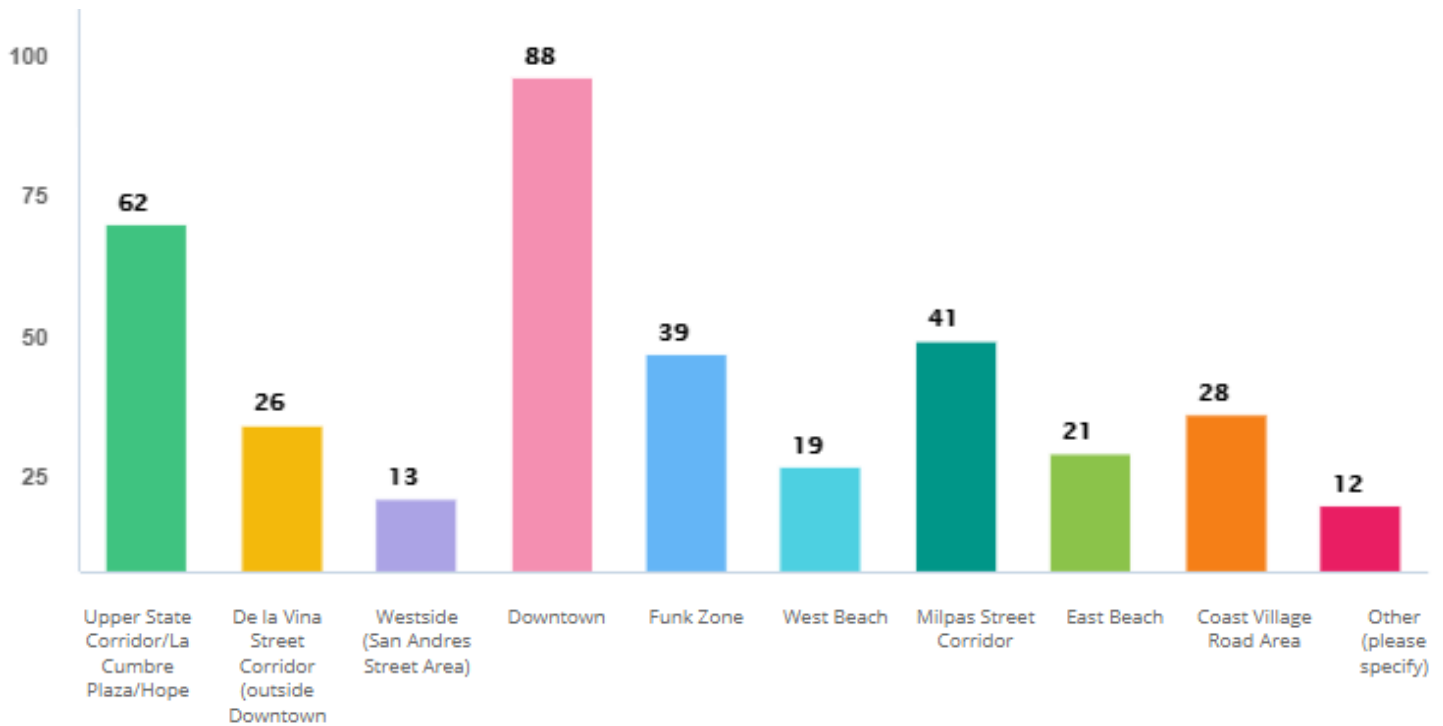

Other Comments: Haley St. Corridor; San Roque; everywhere not too hilly; None; No neighborhood in Santa Barbara should have buildings this size; Downtown/Milpas: Only few and far between (.5 mile apart, and only covering .25 of city block), or in manufacturing/commercial zones. Monolith/straight up walls ONLY in manufacturing/industrial areas; Anywhere only If inclusive of affordable housing; Multi family units are needed desperately throughout the city.

Building Size 2.0 - Larger projects of 2-3 stories; often with ground floor commercial space; may be built to the property lines with interior or roof top open space.

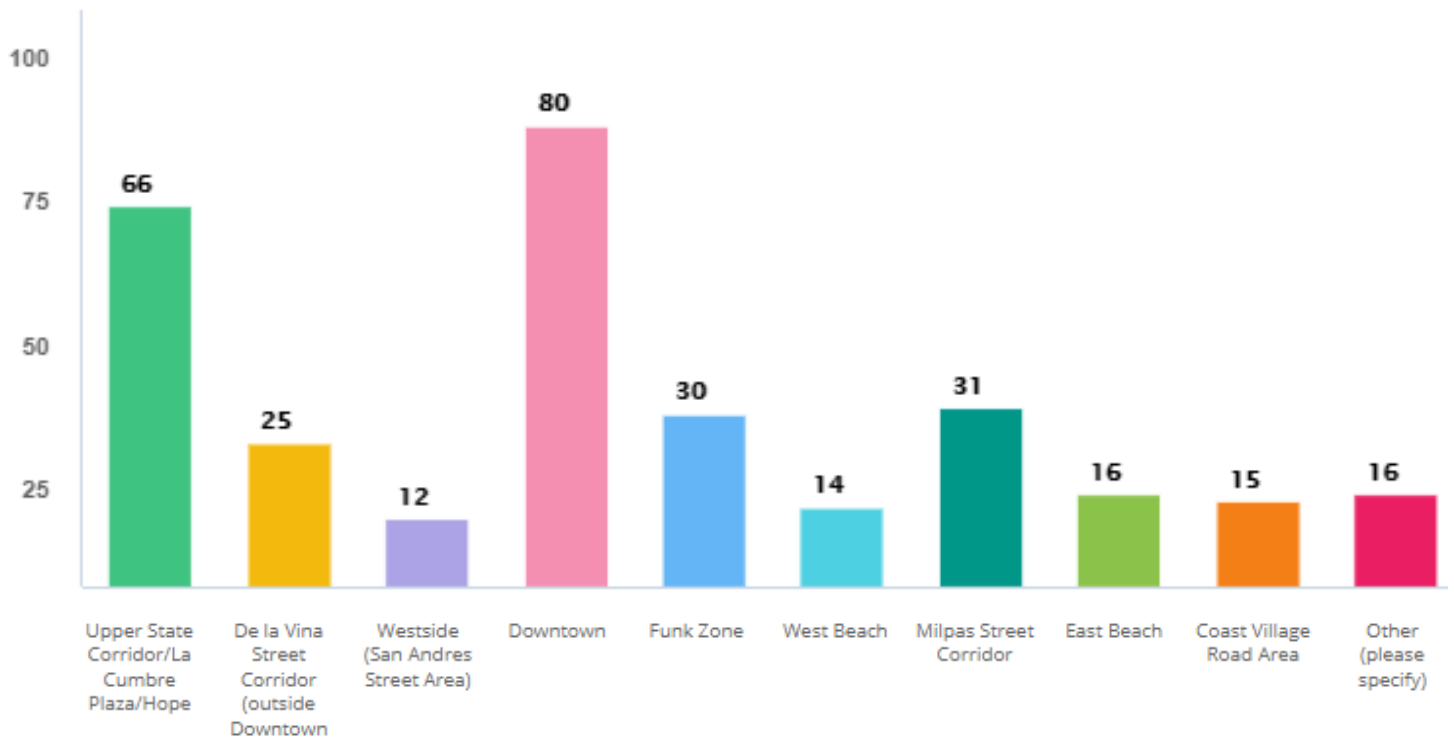

Other Comments: None; None, No neighborhood in Santa Barbara should have buildings this size; None; Coast Village Road Area, Upper State Corridor/La Cumbre Plaza/Hope; Downtown: Only few and far between (.5 mile apart, and only covering .25 of city block), or in manufacturing/commercial zones; Monolith/straight up walls ONLY in manufacturing/industrial areas; Anywhere only If inclusive of affordable housing, Multi family units are needed desperately throughout the city; Any size buildings should be allowed in any area, but the city should prioritize the building of large, dense, below-market-rate housing to lower rents and take pressure off of working people; Downtown; Funk Zone; East Beach; No Buildings without SETBACKS = 1st example, No blocking views of mountains; LOVE 2nd example of re-use; None, Too large.

Building Size 2.5 - Larger projects up to 3-4 stories; often with ground floor commercial space; likely built to property lines with interior or rooftop open space.

Other Comments: None; None; No neighborhood in Santa Barbara should have buildings this size; Upper State Corridor/La Cumbre Plaza/Hope; Downtown; Downtown: Only few and far between (.5 mile apart; and only covering .25 of city block); or in manufacturing/commercial zones; Monolith/straight up walls ONLY in manufacturing/industrial areas; none; none; Upper State Corridor/La Cumbre Plaza/Hope; Westside (San Andres Street Area); Funk Zone; Milpas Street Corridor; Coast Village Road Area; De la Vina Street Corridor (outside Downtown); Downtown; West Beach; East Beach; Anywhere only If inclusive of affordable housing, Multi family units are needed desparately throughout the city; Any size buildings should be allowed in any area; but the city should prioritize the building of large, dense, below-market-rate housing to lower rents and take pressure off of working people; Los Angeles; Haley St. Corridor; Both are nice building; Top is at least attempting set-backs; Please tour the NEW CANYONS of recent Los Angeles architecture; None, Too large.

Building Size 3 - Larger projects built to 4 stories; often with ground floor commercial space; likely built to property lines with interior or rooftop open space.

Other Comment: None; No neighborhood in Santa Barbara should have buildings this size.; None; Downtown; Upper State Corridor/La Cumbre Plaza/Hope; La Cumbre Mall or Downtown: Only few and far between (.5 mile apart, and only covering .25 of city block), or in manufacturing/commercial zones. Monolith/straight up walls ONLY in manufacturing/industrial areas; none; Upper State Corridor/La Cumbre Plaza/Hope; Westside (San Andres Street Area); Funk Zone; Milpas Street Corridor; Coast Village Road Area; De la Vina Street Corridor (outside Downtown); Downtown; West Beach; East Beach; Anywhere only If inclusive of affordable housing; Multi family units are needed desperately throughout the city; Any size buildings should be allowed in any area, but the city should prioritize the building of large, dense, below-market-rate housing to lower rents and take pressure off of working people; top photo of building on Carrillo is waayy too big even for downtown especially if parking is not part of the building; Los Angeles; Haley St. Corridor; LIMITED Downtown Locations - not to replace historically interesting sights; Santa Barbara Annex; Hitchcock; Goleta; No place for this size building in SB; None; Too large for SB.
