

## FY21A Pavement Maintenance Project

### City News In Brief Submittal

#### Slurry Seal Treatments on City Streets

Beginning on August 9, 2021, American Asphalt South, Inc. will be implementing slurry seal treatments on various high priority streets throughout the City as part of the FY21A Pavement Maintenance Project (see table below). This preventative maintenance operation will extend the life of the roadways, while creating a smoother road surface. The slurry work and striping of the streets is scheduled for completion late-Fall 2021.

No Parking signs will be posted at least 72 hours in advance of the work, and traffic control will be in place. The public is advised to respect and adhere to the No Parking notices in order to avoid having their vehicles towed.

Slurry seal treatments can typically be completed within one working day. The public may use the street once the No Parking signs have been removed from the area at the end of the day.

We greatly appreciate the public's cooperation and apologize for any inconvenience.
