

City of Santa Barbara

Storm Water BMP Guidance Manual

July 2013
(Final)

THIS PAGE INTENTIONALLY LEFT BLANK

engineers | scientists | innovators

Table of Contents

1 Introduction1-1

 1.1 Purpose of the Manual 1-1

 1.2 Background..... 1-3

 1.2.1 Storm Water Management & LID Concepts..... 1-3

 1.2.2 Benefits of Storm Water Management..... 1-4

 1.2.3 Federal and State Storm water Regulations 1-5

 1.2.4 Storm Water Management Plan/Program Requirements (Local Storm Water Regulations) 1-6

 1.2.5 Local/Regional Coordination & Communication..... 1-6

 1.3 City of Santa Barbara Post-Construction Storm Water Management Requirements (as defined in the SWMP) 1-7

 1.4 Project Tiers 1-8

 1.4.1 Requirements by Tier 1-8

 1.5 How to Use This Manual..... 1-11

2 Site Assessment and BMP Selection2-1

 2.1 Assessing Site Conditions and Other Constraints..... 2-1

 2.2 Assessing Pollutants of Concern 2-2

 2.3 BMP Selection Process..... 2-5

3 Site Soil and Infiltration Assessment3-1

 3.1 Who Should Conduct the Assessment?..... 3-1

 3.2 Preliminary Site Investigation..... 3-1

 3.3 Test Pit Investigation 3-1

 3.4 Infiltration Tests 3-3

 3.5 Falling-Head Infiltration Testing Procedure..... 3-3

 3.6 Laboratory Soil Tests 3-4

4 Site Design BMP Options.....4-1

 4.1 Introduction 4-1

 4.1.1 Goals and Objectives..... 4-1

 4.2 Conserve and Restore Natural Areas..... 4-2

 4.3 Maintain, Restore and Utilize Natural Flow Paths 4-3

 4.4 Site BMPs on Infiltrative Soils 4-4

 4.5 Minimize Soil Disturbance and Compaction 4-4

 4.6 Minimize Impervious Surfaces 4-5

 4.7 Disconnect Impervious Surfaces and Utilize Pervious Areas..... 4-8

 4.8 Site Design Examples 4-9

4.8.1 Single-Family Residential	4-10
4.8.2 Multi-Family Residential	4-12
4.8.3 Commercial Development	4-14
4.8.4 Office Building	4-16
4.8.5 Residential Street	4-18
5 Basic BMP Options	5-1
5.1 How to Choose Basic BMPs	5-1
5.2 Site Assessment (recommended for Tiers 1 and 2; this assessment is NOT intended for Tier 3 projects)	5-2
5.2.1 Soil Assessment	5-2
5.2.2 Simple Infiltration Test	5-3
5.2.3 Simple Texture by Feel Test	5-3
5.2.4 Site Slope Assessment	5-4
5.2.5 Roof Area Assessment	5-6
5.3 Disconnect Downspouts	5-9
5.4 Flow Spreading	5-13
5.5 Rainwater Gardens	5-15
5.6 Rain Barrels	5-20
5.7 Contained Planters	5-23
5.8 Depression Storage	5-25
5.9 Permeable Pavement for Single-Family Residences	5-27
5.10 Soil Amendments	5-29
5.11 Ribbon Driveways	5-31
5.12 Landscaping Considerations	5-33
6 STORMWATER RUNOFF BMP OPTIONS	6-1
6.1 General Considerations	6-1
6.2 Stormwater Runoff Requirements For BMP Sizing	6-1
6.2.1 Peak Runoff Discharge Rate Requirement	6-2
6.2.2 Volume Reduction Requirement	6-2
6.2.3 Water Quality Treatment Requirements	6-3
6.2.4 Meeting Stormwater Runoff Requirements Simultaneously	6-3
6.3 BMP Selection Process	6-3
6.4 Waivers For Storm Water Runoff BMP Requirements	6-4
6.5 Suggested Strategies For Meeting The Storm Water Runoff Requirements	6-7
6.6 Biofiltration And Filtration BMPs	6-9
6.6.1 Bioretention	6-9
6.6.2 Vegetated Swale Filter	6-30
6.6.3 Vegetated Filter Strip	6-55
6.6.4 Sand Filter	6-69

6.7	Infiltration BMPs.....	6-85
6.8	Permeable Pavement BMPs	6-106
6.9	Building BMPs	6-124
6.9.1	Cistern/Rain barrel.....	6-124
6.9.2	Planter Box.....	6-128
6.9.3	Green Roof.....	6-142
6.10	Retention And Detention BMPs.....	6-149
6.10.1	Constructed Treatment Wetland	6-149
6.10.2	Wet Retention Basins	6-167
6.10.3	Dry Extended Detention Basins	6-189
6.11	Proprietary Devices.....	6-214
7	REFERENCES.....	7-1
Appendix A	Glossary Of Terms	A-1
Appendix B	Site Conditions Maps	B-1
Appendix C	BMP Sizing Methodologies	C-1
Appendix D	BMP Design Examples	D-1
Appendix E	Basin Outlet Sizing Examples	E-1
Appendix F	Flow Splitter Design Specifications	F-1
Appendix G	Local Plant List.....	G-1
Appendix H	Facility Inspection And Maintenance Checklists	H-1
Appendix I	Example Agreements, Forms, And Letters	I-1
Appendix J	List Of Discretionary Projects Exempt From Tier 3 Requirements	J-1
Appendix K	DART SWMP Checklist.....	K-1
