

PROJECT TITLE: High School Wellhead Project

PROJECT OVERVIEW:

The project involves the installation of piping and equipment to connect the existing Santa Barbara High School Well to an existing raw water main in Anapamu Street. The project includes a catch basin and drainage pipe with a connection to the existing sewer system.

PROJECT BENEFITS:

The project will allow for the continued use of the High School Well at its designed capacity. The well will be used for extraction when local groundwater supplies are needed.

QUICK FACTS

Location: Anapamu Street

Construction Schedule: winter to spring 2016

Total Project Costs: \$295,843

Funding Source: Drought – Groundwater Fund
