SIGN REVIEW PROCESS

City of Santa Barbara

SIGN COMMITTEE LEVELS OF REVIEW

- **CONCEPT** - This is the first level of plan review for a project at Sign Committee. Applicants are encouraged to come in with sketches and/or very conceptual drawings. The Committee usually gives comments to guide the applicant on the design of the project so that it can advance to the next level of review, which is preliminary. The Committee may give a final approval if sufficient information has been given and no other discretionary review is required.
- **FINAL** - This is the second level of plan review for a project at Sign Committee. If the completed working drawings for the project meet all of the conditions set at the conceptual level and the plan details are provided, such as color samples, roof materials, window details, door hardware, and exterior lighting fixtures, then final approval may be granted.
- **REVIEW AFTER FINAL** - This is the third level of plan review at Sign Committee available for projects that have been given final approval. Review After Final occurs when there is a proposed change to a project after final approval has been granted. An applicant must submit a supplemental application along with revised plans and appropriate fees.
- **CONFORMING REVIEW** - This level is primarily for sign proposals that clearly comply with the Sign Ordinance and Sign Review Guidelines. In addition, the Sign Committee may also direct some projects or portions of projects to the Conforming Sign Review for approval.
