

CABRILLO BOULEVARD BRIDGE R E P L A C E M E N T

Project Update: December 2016

The bridge deck and portions of the sidewalk for the beach side of the new Cabrillo Boulevard Bridge have been poured, and crews have started utility relocations.

Upcoming Work:

The majority of work in December will focus on utility relocations, including a large gas line, reclaimed and potable water lines, and communications infrastructure. Crews will continue sidewalk and bridge rail improvements throughout the month. Downstream creek bank improvements are ongoing.

Based on the City Council decision in November, engineers and planners are also working on plans and permits to incorporate the pedestrian bridge installed during construction into the final layouts for the multipurpose pathways.

**Closures:**

Throughout Stage 3, the beach-side of Cabrillo Boulevard will remain closed near the bridge. One lane in each direction remains open during daytime construction on the new mountain-side of the bridge.

To accommodate the work area, the left turns from Cabrillo Boulevard to Stearns Wharf (westbound) and on to Helena Avenue (eastbound) are prohibited. Businesses on Helena Avenue remain open with both pedestrian access and vehicle access from westbound Cabrillo Boulevard. Motorists can enter Stearns Wharf from State Street and eastbound Cabrillo Boulevard. Detour signs are in place to highlight access around the closures.

Fall 2014 - Spring 2017:

The Cabrillo Boulevard Bridge Replacement Project includes a new bridge, enhanced Mission Creek banks, and improved pedestrian areas. Cabrillo Boulevard, surrounding businesses, parks, Stearns Wharf, and the Arts and Crafts Show will remain open throughout construction.
