

East Cabrillo Boulevard Sidewalks

2001A Bond Fund

Project Description

The project site is within the State-designated East Cabrillo Boulevard Historic District. The original sidewalk was designed and built in the 1920s. In the early 1990s, the State relinquished the boulevard to the City and the City agreed to maintain the original historic design which included landscaping on the boulevard side of the sidewalk. The project consisted of the replacement of approximately 5,000 linear feet of existing sidewalk, access ramps, curb and gutter, driveway, landscaping improvements, concrete benches, trash receptacles, and the addition of decorative ironwork on the light poles on East Cabrillo Boulevard between Anacapa Street and Milpas Street.
