

Fire Station # 1 Remodel

Capital Fund and 2003A Bond Fund

Project Description

The project was a thorough renovation of the interior of the building including a major seismic retrofit, an extensive remodel of the second floor crew's quarters, partial remodel of the first floor office area, and replacement of all gas, water, sewer and electrical services. Included were an emergency generator, structural caissons and steel moment frame connection modifications, concrete shear walls, tile roofing, LEED-certified building materials, elevator, windows, kitchen, ADA-compliant restrooms, HVAC, hazardous material abatement, electrical, plumbing, and temporary accommodations.
