

Jardin de las Granadas

2003A Bond Fund

Project Description

Once it was determined that the workforce housing project associated with the Granada Garage project would be relocated from the north side to the Anapamu Street side, it became evident that the remaining open space would need to be landscaped. The project includes a new ADA accessibility ramp to 25 E Anapamu, small lawn areas terraced with low sandstone walls, installation bases for temporary public art, coast live oak trees, new lighting, and drought tolerant, irrigated plantings. The Agency entered into an agreement with Peoples' Self-Help Corporation, the developer of Casas las Granadas, to reimburse up to \$200,000 of the costs for the development of the plaza.
