

## Louise Lowry Davis Center

### 2001A Bond Fund

#### Project Description

Since the Center is for seniors, one of the project's main goals was to bring the Center up to ADA standards with a fully compliant exterior ramp to provide handicapped access via a well-defined entrance and reception area leading from the parking lot. The interior improvements created fully compliant accessible men's and women's restrooms and an accessible drinking fountain. The kitchen was relocated and completely remodeled with new appliances and cabinetry. New flooring was installed throughout the building. All new heating, plumbing and electrical systems were installed. The exterior also received a new roof, lighting and landscaping.
