

Annual Sidewalk Replacement Project Begins

The annual Sidewalk Replacement Project to replace existing sidewalks that have uplifted or depressed due to tree root or other damage begins this week. Each year, work is identified City-wide so that all areas typically see some repairs annually. The work will take place from late August through mid-October. The contractor is Granite Construction Company.

The repair areas have been selected based on similar criteria used for the prioritization of sidewalk infill projects, including:

1. Existing conditions;
2. Current use by pedestrians;
3. Proximity to schools;
4. Proximity to parks or recreation areas;
5. Proximity to major destinations or neighborhoods; and
6. Proximity to transit centers.

Sidewalks will be replaced at selected addresses on the following blocks:

Down Town

Garden Street (400-500 blocks)
East Haley Street (400 and 600 blocks)
Reddick Street (700-800 blocks)
