PROJECT TITLE: Community Development Block Grant  
2015-2016 Westside Sidewalk Access Ramps

PROJECT OVERVIEW:

This project consists of constructing a total of eighteen new sidewalk access ramps at five intersections along San Pascual Street between West Pedregosa Street and West Arrellaga Street.

PROJECT BENEFITS:

The proposed access ramps are located within several blocks of La Cumbre Junior High School and the Westside Boys and Girls Club, and bus stops to Adams Elementary School. San Pascual Street is a main neighborhood street for travel to and from these nearby schools and the community center. Once these ramps are constructed, access for vulnerable users (i.e., disabled, elderly, and pedestrians with strollers) will be improved.

QUICK FACTS

Location: San Pascual Street between Pedregosa Street and Arrellaga Street  
Construction Schedule: 2.5 months: spring 2016  
Total Project Costs: $293,641.  
Funding Source: The Project is funded by CDBG and the Streets Capital Fund.
