

PROJECT TITLE: Quinientos Street Bridge Over Sycamore Creek Replacement Project

WHY THIS PROJECT?

The Quinientos Street Bridge was originally constructed in 1930 and requires replacement to meet current standards. The bridge needs widening and re-aligning of travel lanes to increase pedestrian and vehicle safety.

PROJECT BENEFITS:

The project removes and replaces the existing structurally deficient bridge with a new bridge that has a wider, realigned roadway and sidewalks, improving visibility for motorists. New lighting and landscaping will also be installed.

QUICK FACTS

Location: Quinientos Street between Canada Street and Soledad Street

Construction Schedule: spring 2019 – spring 2020

Total Project Costs: \$6,540,499

Funding Source: Federal Aid Highway Bridge Program
