

PROJECT TITLE: La Colina Force Main No. 1 Replacement Project

WHY THIS PROJECT?

The La Colina Sewer Pump Station was constructed in 1957 and pumps 145,000 gallons of sewage per day through a pressurized sewer main up La Colina Road. That sewer main has deteriorated due to its corrosive material contents and age.

PROJECT BENEFITS:

This Project replaces the existing pressurized sewer main, thereby increasing the overall reliability of the system and relieving the Pump Station's dependence on aging infrastructure.

QUICK FACTS

Locations: La Colina Road, from Bishop Garcia Diego High School to North La Cumbre Road
North La Cumbre Road, from La Colina Road to Via Lucero

Design Schedule: summer 2018 through spring 2019

Construction Schedule: spring 2019 through fall 2019

Total Project Costs: \$429,250

Funding Source: Wastewater Fund
