

## **PROJECT TITLE: Fiscal Year 2020-A Pavement Maintenance (Slurry Seal) Project**

### **PROJECT OVERVIEW:**

The Fiscal Year 2020-A Pavement Maintenance Project will address high priority pavement maintenance needs throughout the City. The Project consists primarily of removing and replacing failed sections of asphalt pavement followed by crack sealing and slurry sealing, and replacement of sidewalk and installation of access ramps on various City streets.

**PROJECT BENEFITS:** Slurry seals extend the life of existing pavements by protecting the undersurface from the effects of aging and the environment, including water intrusion. Additionally, slurry seal gives asphalt surfaces a bright black appearance, improving the roadway aesthetics.

In order to most efficiently deliver the City's annual Pavement Maintenance Program, the Fiscal Year 2020 Project has been split into two separate projects. Construction for the first project (A), which consists of minor concrete work, spot repairs and slurry seal resurfacing is anticipated to start in early 2020. Construction for the second project (B) consists of concrete work, grind and overlay is anticipated to be complete by the end of 2020.

### **QUICK FACTS**

**Locations:** see page two for planned locations

**Construction Schedule:** Fiscal Year 2020-A – winter 2019/spring 2020

**Total Project Costs:** Fiscal Year 2020-A – Approximately \$6,000,000

**Funding Source:** The Project is funded by Measure C

### **CONTACT INFORMATION**

**CITY PROJECT MANAGER:** Max Kashanian, Project Engineer (Construction)

**PHONE:** (805) 564-5450

Yanonali Street	Soledad Street	Montecito Street	April	May

In addition to the work listed above, the Project also includes slurry sealing the Cabrillo East Lot, Cabrillo West Lot, and Harbor commercial lot. Additional work may be added to utilize remaining funding in the contract as appropriate.

\*Phase 1 involves concrete repair, including removal and replacement of select access ramps, sidewalks, curbs, and gutters.

\*\*Phase 2 work involves crack sealing and slurry sealing of the streets, followed by striping.
