

PROJECT TITLE: Fiscal Year 2020-A Pavement Maintenance (Slurry Seal) Project

PROJECT OVERVIEW:

The Fiscal Year 2020-A Pavement Maintenance Project will address high priority pavement maintenance needs throughout the City. The Project primarily consists of removing and replacing failed sections of asphalt pavement, followed by crack sealing and slurry sealing, and sidewalk replacements and installation of access ramps on various City streets.

PROJECT BENEFITS: Slurry seals extend the life of existing roadways by protecting the undersurface from the effects of aging and the environment, such as water intrusion. Additionally, slurry sealing gives asphalt surfaces a bright black appearance, improving the roadway aesthetics.

In order to efficiently implement the City's annual Pavement Maintenance Program, the Fiscal Year 2020 Project has been split into two separate projects. Construction for the first project, FY20-A, which consists of minor concrete work, spot repairs, and slurry seal resurfacing and is anticipated to start in early 2020 and be completed by winter 2020. Construction for the second project, FY20-B, consists of concrete work, grind, and overlay. It is anticipated to be completed by spring 2021.

QUICK FACTS

Locations: see page two for planned locations

Construction Schedule: Fiscal Year 2020-A – winter 2020

Total Project Costs: Approximately \$6,000,000

Funding Source: The project is funded by Measure C

In addition to the work listed above, the Project also includes slurry sealing the Cabrillo East Lot, Cabrillo West Lot, and Harbor commercial lot. Additional work may be added to utilize remaining funding in the contract as appropriate.

*Phase 1 involves concrete repair, including removal and replacement of select access ramps, sidewalks, curbs, and gutters.

**Phase 2 work involves crack sealing and slurry sealing of the streets, followed by striping.
